

#### INSTRUCTIONS TO AUTHORS

**Submission of manuscripts** Papers may be submitted to any member of the editorial board. Three copies should be sent; originals of figures should *not* be included until the paper has been accepted. Papers may be submitted electronically by sending a LaTeX file to [EJAM@UK.AC.OX.VAX](mailto:EJAM@UK.AC.OX.VAX); this file should include the figures (line figures only). Electronic communications can also be used for minor corrections and for messages to the editors.

**Layout of manuscripts** Papers should be typewritten in **double spacing throughout**, on one side of the paper. Please avoid footnotes if possible. Papers must begin with an abstract of not more than 300 words, and they should end with a brief concluding section. The SI system of units must be used throughout.

**Illustrations** Figures should be drawn in indian ink on good quality white paper. Wherever possible they will be reproduced *with* the author's lettering. A list of captions for figures should be attached separately.

Where appropriate, articles may be illustrated by photographs: high-quality glossy black and white prints are necessary.

**References** References should be listed in alphabetical order at the end of the main text. Please include the article title in the reference, which should be in the order: author's surname, initials; year in parentheses; article title; journal name, abbreviated in accordance with the *World List of Scientific Periodicals* (4th Edn); volume number (underlined); inclusive page numbers.

**Citations in the text** Any unambiguous system is acceptable. Three recommended ways of citing a 1992 paper by A. European are: European (1992); European [Eu]; European [7]. In the second case, the reference at the end of the text should be preceded by [Eu], and in the third by [7]. Please note that in the third system, alterations may lead to wholesale renumbering.

#### EDITORIAL POLICY

The **European Journal of Applied Mathematics** aims to publish papers in all areas of applied mathematics, with especial emphasis on the following.

(i) **The exposition of new mathematical ideas relevant to the modelling and analysis of modern technological processes.**

(ii) **The development of interesting mathematical methods with broad areas of applicability.**

There is no restriction in the areas of applicability or the style of mathematics, although standard mathematical techniques will only be published if they are associated with novel applications or lead to substantial advances in established problem areas.

#### COPYING

This journal is registered with the Copyright Clearance Center, 27 Congress Street, Salem, MA 01970. Organisations in the USA who are also registered with the C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of \$5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0956-7925/91 \$5.00 + .00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorised to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American branch of Cambridge University Press.

VOLUME 2 · PART 4 · DECEMBER 1991

## CONTENTS

Algorithms for reducing a system of PDEs to standard form, determining the dimension of its solution space and calculating its Taylor series solution	page 293
G. R. REID	
Finding abstract Lie symmetry algebras of differential equations without integrating determining equations	319
G. R. REID	
Asymptotic and numerical study of Brusselator chaos	341
K. DELLER, T. ERNEUX and A. BAYLISS	
Laminar channel flow driven by accelerating walls	359
P. WATSON, W. H. H. BANKS, M. T. ZATURSKA and P. G. DRAZIN	
Forthcoming conferences	386
Author Index to Volume 2	388
