VOL. LXVIII

1959-1964

PUBLISHED BY THE
ROYAL SOCIETY OF EDINBURGH
22 GEORGE STREET
EDINBURGH 2

1964

CONTENTS

NO.	PAGE
<p>*1. Genetics of Gametes. I. A Quantitative Analysis of Five Characteristics of Rabbit Spermatozoa. By R. A. Beatty and R. A. N. Napier, Agricultural Research Council Unit of Animal Genetics, Institute of Animal Genetics, Edinburgh. <i>Communicated by</i> Professor C. H. Waddington, C.B.E., F.R.S. Issued September 19, 1960,</p>	1
<p>*2. Genetics of Gametes. II. Strain Differences in Characteristics of Rabbit Spermatozoa. By R. A. Beatty and R. A. N. Napier, Agricultural Research Unit of Animal Genetics, Institute of Animal Genetics, Edinburgh. <i>Communicated by</i> Professor C. H. Waddington, C.B.E., F.R.S. Issued September 21, 1960,</p>	17
<p>*3. Genetics of Gametes. III. Strain Differences in Spermatozoa from Eight Inbred Strains of Mice. By R. A. Beatty and K. N. Sharma, Institute of Animal Genetics, Edinburgh. <i>Communicated by</i> Professor C. H. Waddington, C.B.E., F.R.S. (With One Text-figure and Seven Tables.) Issued September 23, 1960,</p>	25
<p>*4. Genetics of Gametes. IV. The Phenotype of Mouse Spermatozoa in Four Inbred Strains and their F₁ Crosses. By K. N. Sharma, Institute of Animal Genetics, Edinburgh. <i>Communicated by</i> Professor C. H. Waddington, C.B.E., F.R.S. Issued September 23, 1960,</p>	54
<p>*5. Genetics of Gametes. V. The Frequency Distribution of the Head Length of Rabbit Spermatozoa, and a Search for Dimorphism. By R. A. Beatty, Agricultural Research Council Unit of Animal Genetics, Institute of Animal Genetics, Edinburgh. <i>Communicated by</i> Professor C. H. Waddington, C.B.E., F.R.S. (With One Text-figure and Two Tables.) Issued April 4, 1961,</p>	72
<p>*6. Genetics of Gametes. VI. Attempted Genetic Transformation in the Rabbit. By R. A. Beatty, Agricultural Research Council Unit of Animal Genetics, Institute of Animal Genetics, Edinburgh, and F. S. Billet, Department of Zoology, University College, London. <i>Communicated by</i> Professor C. H. Waddington, C.B.E., F.R.S. Issued April 4, 1961,</p>	83
<p>7. Some Observations on the Development of the Nasal Capsule of the Chondrocranium in <i>Camelus dromedarius</i>. By C. V. Kanan, Faculty of Veterinary Science, University of Khartoum, Khartoum, Sudan. <i>Communicated by</i> Professor Tom Grahame. (With Five Text-figures.) Issued September 8, 1961,</p>	91
<p>*8. Density Measurements of Rocks in South-west Scotland. By Adam C. McLean, B.Sc., Ph.D., F.G.S., Department of Geology, University of Glasgow. <i>Communicated by</i> Professor T. Neville George. (With Three Tables and One Text-figure.) Issued September 8, 1961,</p>	103

NO.	PAGE
*9. A Gravity Survey of the Sanquhar Coalfield. By Adam C. McLean, B.Sc., Ph.D., F.G.S., Department of Geology, University of Glasgow. <i>Communicated by</i> Professor T. Neville George. (With Six Text-figures.) Issued September 8, 1961,	112
10. On the Accessory Respiratory Organs of <i>Heteropneustes fossilis</i> Bloch. By J. S. Datta Munshi, Department of Zoology, Banaras Hindu University, Varanasi, India. <i>Communicated by</i> Professor M. M. Swann. (With Three Plates, Eleven Text-figures and One Table.) Issued February 2, 1962,	128
*11. The Species of <i>Architeuthis</i> Inhabiting the North Atlantic. By A. C. Stephen. (With Two Plates and Eight Text-figures.) Issued July 8, 1962	147
12. Electron Microscopy of the Epithelial Cells of the Mid-gut and Hepatic Caeca of <i>Blatta Orientalis</i> . By L. T. Threadgold and R. A. R. Gresson, Department of Zoology, The Queen's University of Belfast, Northern Ireland. (With Three Plates.) Issued July 18, 1962,	162
*13. The Polysaccharides Synthesized by <i>Monodus subterraneus</i> when Grown on Artificial Media under Bacteria-free Conditions. By Anne Beattie and Elizabeth Percival, Department of Chemistry, University of Edinburgh. Issued October 22, 1962,	171
14. Origin and Development of the Digestive System of the Giant Land Snail <i>Achatina fulica</i> Bowdich. By Krishna Chandra Ghose, D.Sc., Department of Zoology, City College, Calcutta. (With Nineteen Text-figures.) Issued October 22, 1962,	186
*15. Hermaphroditism in the Herring (<i>Clupea harengus</i> L.). By F. G. T. Holliday, Natural History Department, University of Aberdeen. (With One Plate and Two Text-figures.) Issued October 22, 1962,	208
*16. A Partial analysis of <i>Drosophila</i> Larval Hæmolymph. By Michael Begg, Department of Zoology, University of Aberdeen, and William J. Cruickshank, Department of Zoology, Birbeck College, University of London. (With Thirteen Text-figures and Six Tables.) Issued August 16, 1963,	215
17. Embryogenesis and Larval Organs of the Giant Land Snail <i>Achatina fulica</i> Bowdich. By Krishna Chandra Ghose, D.Sc., Department of Zoology, University of Calcutta. (With Twenty-five Text-figures.) Issued August 16, 1963,	237
18. The Large Neurones and Interstitial Material of <i>Fasciola Hepatica</i> L. By R. A. R. Gresson and L. T. Threadgold, Department of Zoology, The Queen's University of Belfast. (With Three Plates.) Issued November 25, 1964,	261
19. Morphology and Histology of the Males of <i>Acanthobonellia</i> . By A. K. DattaGupta and P. K. B. Menon, Department of Zoology, Birla College, Pilani. <i>Communicated by</i> Dr A. C. Stephen. (With Four Text-figures.) Issued November 25, 1964,	267

Contents

vii

NO.	PAGE
*20. Quantitative Studies on the Invertebrate Fauna of Sandy and Stony Substrates in the River Endrick, Scotland. By Peter S. Maitland. <i>Communicated by</i> Dr H. D. Slack. Issued December 31, 1964,	277
21. The External Anatomy of <i>Allenopithecus</i> . By W. C. Osman Hill, M.D., Yerkes Regional Primate Center, Emory University, Atlanta, Georgia. (With Four Plates, Eight Text-figures and Six Tables.) Issued December 31, 1964,	302
*22. A Quantitative Study of Spermatozoan Nucleus Length in <i>Drosophila melanogaster</i> (Meig.). By N. S. Sidhu, Institute of Animal Genetics, Edinburgh. (With Two Tables.) <i>Communicated by</i> Dr R. A. Beatty. Issued December 31, 1964,	327

* The thanks of the Society are due to the Carnegie Trust for the Universities of Scotland for grants towards the costs of these papers.

INSTRUCTIONS TO AUTHORS (*continued*)

The overall space available for figures and plates is $9\frac{1}{2}'' \times 7\frac{1}{2}''$ in *Transactions* and $7\frac{1}{2}'' \times 4\frac{3}{4}''$ in *Proceedings*.

Photographs should be unmounted glossy black and white prints, marked on the back with the name of the author, number of the figure, and an indication of the top. Prints should not be trimmed or cut out. Authors should suggest the arrangement of the figures on each plate, either by a diagram or a paste-up of rough prints, with indication of any lettering to be inserted.

Lettering must be in black ink in neat and legible style, or lightly written in pencil.

Indicating Lines and Arrows required on wash drawings or photographs should have the point marked by a pin-hole, and must be drawn on the back or on a covering tissue and not on the photograph or drawing. On line drawings such lines should be drawn thin but firmly.

Graphs should be drawn on white Bristol board or on squared paper ruled in faint blue lines: no other colour ruling is suitable. Since blue lines do not appear in reproductions, any cross-lines required must be drawn. If a tracing of a graph constructed on an unsuitable grid is submitted, white tracing paper should be used.

Numerical values. In papers concerned with the biological sciences ALL numerical values must be accompanied by their decimal equivalents.

Tables. Tabular matter must be kept to a minimum. No paper should present both tables and corresponding graphs, except where good reason can be given.

Duplicates. When the author can conveniently do so, it is desirable that duplicates of illustrations should be supplied for the use of the referees.

Proofs of papers will be sent to authors or communicators to the addresses indicated in correspondence or on MSS. The cost of authors' corrections in excess of 5 per cent of the printer's charges for the setting of a particular paper will be charged to the authors. Proofs should, if possible, be returned within one week to *The Secretary, Royal Society of Edinburgh, 22 George Street, Edinburgh, 2*, and not to the printer. To prevent delay, authors who are abroad should, if possible, appoint someone in this country to correct proofs.

Offprints. As soon as a *Transactions* paper, or the sheet in which the last part of a *Proceedings* paper appears, is ready for press, copies of offprints, in covers bearing the title of the paper and the name of the author, are printed and placed on sale. The date of such separate publication is printed on each paper. Authors of papers will receive twenty-five offprints free, if they so desire. Additional offprints may be obtained at a fixed scale of prices given on a form attached to the first proof. To prevent disappointment, especially if a paper contains plates, authors should, as soon as possible, notify the Secretary of the number of additional copies required.

Indexes. To facilitate the compilation of indexes, and to secure due attention being given to the important points of a paper in Catalogues of Scientific Literature, authors are requested to supply to the Secretary, with the final proofs of papers, a brief index (on the model given below) of the points in a paper which are considered new or important. Indexes will be edited by the Secretary for publication in each volume of the *Transactions* and *Proceedings*.

MODEL INDEX

Houstoun, R. A.—A measurement of the velocity of light. *Proc. Roy. Soc. Edin.*, A, 63, 1949–50, 95–104.

Light, A measurement of the velocity of.

R. A. Houstoun. *Proc. Roy. Soc. Edin.*, A, 63, 1949–50, 95–104.

Velocity of Light, A measurement of the.

R. A. Houstoun. *Proc. Roy. Soc. Edin.*, A, 63, 1949–50, 95–104.

Authors are advised, before sending in papers, to consult *Notes on the Preparation of Papers to be communicated to the Royal Society of London* (1951), and especially the chapters dealing with symbols, signs, and abbreviations recommended for British Scientific Publications. A copy may be had on application to the Secretary.

Fellows of the Society purchasing publications for their own use will be allowed a special discount of $33\frac{1}{3}$ per cent on the stated prices (see Law XVI).
