# PC-PDF

## The Powder Diffraction File on CD-ROM

**Search** on key fields within the data base.

**Search** on combinations of fields.

**Display** results within seconds.

**PC-PDF**, a low cost personal computer based system, makes the entire Powder Diffraction File available on a single CD-ROM disk ... and, through use of optimum packing and access algorithms, displays results within seconds.

- Use with an IBM-XT or equivalent system.
- Annually updated disks will be made from the full data base and will include all additions and corrections.
- Space saving: One disk contains data equivalent to a file cabinet full of Data Cards.

You can now enhance your present system for search, retrieval and display. For additional descriptive material and ordering information, contact:

JCPDS-International Centre for Diffraction Data

# D/Max-B Series with IBM System/2

...the most complete  
self-contained,  
x-ray diffraction  
system available!

Rigaku's D/Max-B Series utilizes a high-speed, high capacity microprocessor controller, and a variety of computers ranging from the IBM System/2 all the way through DEC's MICROVAX Series. This system features:

- Computer aided alignment
- Self diagnostics
- Full color graphics
- Software with a full line of data processing programs

The D/Max-B Series is a complete x-ray diffraction system that will satisfy all your technical requirements without devastating your entire budget!

**X-ray... our only business!**
