

ECOLOGY OF AN AFRICAN RAIN FOREST

*Logging in Kibale and the Conflict
Between Conservation and Exploitation*

Thomas T. Struhsaker

"A much-needed volume that will be of interest to a wide audience, written by a leader in the field, and one with an international reputation. The current rosy advocacy for 'sustainable development' needs a wake-up call, and this is it. This volume combines some of the hottest topics in conservation science today into a cohesive whole that looks clear-eyed into the face of modern conservation in the tropics and finds it frighteningly lacking in scientific underpinning, rational consideration, and effective implementation." —Truman Young, University of California at Davis
