

LIST OF FORTHCOMING PAPERS

- L.A. Dávalos-Orozco: Rayleigh-Taylor Instability of a Two-Fluid Layer under a General Rotation Field and a Horizontal Magnetic Field (Received 18 April, 1996; accepted October 9, 1996.)
- S.N. Goderya, K.C. Leung and E.G. Schmidt: Photometric Investigation of the Short Period Eclipsing Binary Star V719 Her (Received May 8, 1996; accepted October 9, 1996.)
- L.S. Lyubimkov: Observational Manifestations of Early Mixing in B- and O-Type Stars (Received October 3, 1996; accepted October 9, 1996.)
- Ranjna Bakaya and R.R. Rausaria: Microwave Emission From Solar Flares and Comparison with Observations (Received January 19, 1996; accepted October 11, 1996.)
- Q. Zeng: Methanol $7_2-8_1A^+$ Emission and Some Maser Series in Orion KL (Received April 10, 1996; accepted October 22, 1996.)
- J.L. Han and X.Z. Zhang: A Possible Association of a Long-Period Pulsar with a Supernova Remnant? (Received April 23, 1996; accepted October 22, 1996.)
- Young-Jong Sohn, Yong-Ik Byun and Mun-Suk Chun: Color Gradients in Four King Type Globular Clusters: NGC 2298, NGC 6402, NGC 6934, and NGC 7089 (Received June 27, 1996; accepted October 22, 1996.)
- Huang Guang-Li, Qin Zhi-Hai and Yao Qi-Jun: A Model for Solar Radio Pulsations at Short Centimetric Band (Received August 13, 1996; accepted October 22, 1996)
- W. Köhnlein: Cross-Correlation of Solar Wind Parameters with Sunspots ('Long-Term Variations') at 1 AU During Cycles 21 and 22 (Received May 31, 1996; accepted November 13, 1996)
