# Journal of the Marine Biological Association of the United Kingdom

Published for the Marine Biological Association of the United Kingdom

## Executive Editor

Dr. P. R. Dando, The Marine Biological Association of the UK, Plymouth, UK

## Editor-in-Chief

Dr. Ann L. Pulsford, The Marine Biological Association of the UK, Plymouth, UK

*JMBA* is an international journal, publishing original research on all aspects of marine biology. It includes pioneering work on major issues concerning marine organisms and their environment. Subjects covered include: ecological surveys and population studies of marine communities; physiology and experimental biology; taxonomy, morphology and life history of marine animals and plants; and chemical and physical oceanographic work.

# Genetics Research

## Editor-in-Chief

T. F. C. Mackay, North Carolina State University, USA

## Executive Editors

D. J. Finnegan, University of Edinburgh, UK

William G. Hill, University of Edinburgh, UK

Shizhong Xu, University of California, USA

*Genetics Research* is a key forum for original research on all aspects of genetics. Building on the success and history of its previous incarnation, *Genetical Research*, the journal has a publishing remit that provides comprehensive coverage of subjects vital to the field, including: evolutionary and population genetics, genetics of complex traits, quantitative and statistical genetics, bioinformatics, genomics, molecular and developmental genetics, Evo-Devo, conservation genetics and environmental genetics.

# Expert Reviews in Molecular Medicine

Published in association with the Centre for Applied Research  
in Educational Technologies (CARET)

## Editor

Andrea Bowden, Centre for Applied Research in Educational Technologies, Cambridge,  
UK

Carolyn Elliss, Centre for Applied Research in Educational Technologies, Cambridge, UK

*Expert Reviews in Molecular Medicine* is an exciting online journal featuring high-quality reviews of the latest developments in this fast-growing field. Coverage includes gene therapy, immunotherapeutics, drug design, vaccines, genetic testing, pathogenesis, epidemiology, genomics, diagnostics and techniques. Reviews are published continually on the website. The journal's innovative functionality allows viewers to access not only the review articles, but also fully abstracted references, figures, photographs, tables, animations and molecular models. *Expert Reviews in Molecular Medicine* will be of interest to biomedical researchers, clinicians and students, as well as researchers in the pharmaceutical and biotechnology industries.

## Instructions for Contributors

*Zygote* is an international journal dedicated to the rapid publication of original research in early embryology. It covers interdisciplinary studies on gametogenesis through fertilization to gastrulation in animals and humans. The scope has been expanded to include clinical papers, molecular and developmental genetics. While the editors will favour work describing fundamental processes in the cellular and molecular mechanisms of animal development, and, in particular, the identification of unifying principles in biology, new technologies, review articles, debates and letters will become a prominent feature.

Subjects covered include gametogenesis, sperm–oocyte interaction, gamete and embryo physiology, cell polarity, cell–cell interactions, nuclear transfer, haploidization, molecular and developmental genetics, in-vitro fertilization, stem cell and cryoconservation technologies.

To submit a manuscript, please email a complete copy, including figures and illustrations to:

- Brian Dale, Editor-in-Chief, *Zygote*, Centre for Reproductive Biology, Italy.  
Email: [brian.dale@virgilio.it](mailto:brian.dale@virgilio.it) or to
- Jacques Cohen, North American Editor, *Zygote*, Tyho-Galileo Research Laboratories, 3 Regent Street, Suite 301, Livingston, NJ 07039, USA  
Email: [jc@embryos.net](mailto:jc@embryos.net) or to
- Professor Norio Suzuki, Asian Pacific Editor, *Zygote*, Department of Biological Science, Hokkaido University, Japan.  
Email: [medaka-s@kdp.biglobe.ne.jp](mailto:medaka-s@kdp.biglobe.ne.jp)

Submission of a paper will be taken to imply that it is unpublished and it is not being considered for publication elsewhere. Authors of articles published in the journal assign copyright to Cambridge University Press (with certain rights reserved) and you will receive a copyright assignment form for signature on acceptance of your paper.

There is no formal restriction on length; however, original articles and reviews of less than 15000 words are likely to appear sooner than longer ones. Short communications should not exceed 1500 words and News and Views Commentaries 500 words.

### Preparation of manuscripts

Manuscripts should be organised as follows: Title page (with full names and addresses of all authors, a running headline of up to 35 characters, and a contact address with telephone number and email address), an Abstract

of not more than 250 words followed by 5 Keywords, Introduction, Materials and Methods, Results, Discussion (combined Results and Discussion may be used for short papers), Acknowledgements, References, Endnotes, Tables and Figure Legends.

Manuscripts should be prepared using SI units

### Figures

Figures should be numbered consecutively as they appear in the text. Any indication of features of special interest should also be included. Figures must be supplied electronically. They must be saved at final publication size and supplied in the following file formats: halftone figures (black & white, and colour) as TIF files at 300 dpi; black & white line figures as TIF or EPS files at 800 – 1200 dpi. When relevant, photographs should be submitted with proposed reduction or magnification indicated, when relevant, by a scale line on or beside, the illustration. The places for insertion into the text should be indicated in the text as 'Fig. 1' etc. Legends for all illustrations should be typed together, separately from the main text. A charge of £500 per figure will be made for colour photograph reproduction and printing.

### Tables

Tables with concise headings should be placed at the end of the paper. Each table must have a text reference, in the form 'Table 1' etc.

### References

References should be cited in the text as Conklin (1905) showed or as shown (Conklin, 1905). For papers with three or more authors use et al. A full list of references in alphabetical order should be given at the end of the text: surname of author and initials; year of publication (in parentheses); title of paper; journal or book name (the former being abbreviated in accordance with the World List of Scientific Periodicals); volume number; first and last page of the reference. For books and conference proceedings, place of publication and publisher (and editor(s) if appropriate) should be included.

### Proofs

Proofs will be sent to the author for checking. Typographical or factual errors only may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

### Offprints

A PDF offprint of each article will be supplied free to each first named author. Paper offprints may be purchased from the publisher if ordered at proof stage.

The Biology of Gametes and Early Embryos

## CONTENTS

### ORIGINAL ARTICLES

**Activation of AMP-activated protein kinase may not be involved in AICAR- and metformin-mediated meiotic arrest in bovine denuded and cumulus-enclosed oocytes *in vitro***

Bilodeau-Goeseels, S., Panich, P. L. & Kastelic, J. P. 97

**Meiotic inhibition of bovine oocytes in medium supplemented with a serum replacer and hormones: effects on meiosis progression and developmental capacity**

Barretto, L. S. S., Castro, V. S. D. C., Garcia, J. M. & Mingoti, G. Z. 107

**Identification of a 2-cell stage specific inhibitor of the cleavage of preimplantation mouse embryos synthesized by rat hepatoma cells as 5'-deoxy-5'-methylthioadenosine**

Kobayashi, M., Saito, K., Tamogami, S., Takashima, J., Kasuga, K. & Kojima, I. 117

**Real-time qRT-PCR analysis of EGF receptor in cumulus-oocyte complexes recovered by laparoscopy in hormonally treated goats**

Almeida, K. C., Pereira, A. F., Neto, A. S. A., Avelar, S. R. G., Bertolini, L. R., Bertolini, M., Freitas, V. J. F. & Melo, L. M. 127

**Detrimental effects of antibiotics on mouse embryos in chromatin integrity, apoptosis and expression of zygotically activated genes**

Liu, J., Tang, S., Xu, W., Wang, Y., Yin, B. & Zhang, Y. 137

**Ooplasm transfer and interspecies somatic cell nuclear transfer: heteroplasmy, pattern of mitochondrial migration and effect on embryo development**

Sansinena, M. J., Lynn, J., Bondioli, K. R., Denniston, R. S. & Godke, R. A. 147

**In *X. laevis* embryos high levels of the anti-apoptotic factor p27BBP/elf6 are stage-dependently found in BrdU and TUNEL-reactive territories**

De Marco, N., Campanella, C. & Carotenuto, R. 157

**Methylation patterns in 5' terminal regions of pluripotency-related genes in mature bovine gametes**

Lan, J., Hua, S., Yuan, Y., Zhan, L., He, X. & Zhang Y. 165

**Participation of inositol trisphosphate and ryanodine receptors in *Bufo arenarum* oocyte activation**

Ajmat, M. T., Bonilla, F., Zelarayán, L. & Bühler, M. I. 171

**Participation of MAPK, PKA and PP2A in the regulation of MPF activity in *Bufo arenarum* oocytes**

Toranzo, G. S., Bonilla, F., Bühler, M. C. G. & Bühler, M. I. 181
