Notices	600

THE BULLETIN OF SYMBOLIC LOGIC (ISSN print: 1079-8986, ISSN online: 1943-5894) is published quarterly, in the months of March, June, September, and December, by the Association for Symbolic Logic, Inc., 124 Raymond Avenue, Poughkeepsie, NY 12604-0001, USA. Periodicals postage is paid at Poughkeepsie NY and at additional mailing offices. The BULLETIN is distributed with THE JOURNAL OF SYMBOLIC LOGIC. The 2010 annual subscription price for the two journals, in either print or electronic form, is US\$590; visit <http://www.aslonline.org/Journals-subscription.html> for more information. **Postmaster:** Send address changes to *The Bulletin of Symbolic Logic, c/o American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294, USA*. Business correspondence should be sent to the Secretary-Treasurer of the Association, Charles Steinhorn (address on inside back cover).

The BULLETIN, the JOURNAL, and the REVIEW OF SYMBOLIC LOGIC are the official organs of the Association for Symbolic Logic, an international organization for furthering research in all aspects of symbolic logic. The BULLETIN encourages submission of *Articles and Communications* in all areas of logic, including mathematical or philosophical logic, logic in computer science or linguistics, the history or philosophy of logic, and applications of logic to other fields. The BULLETIN also publishes reviews of publications in logic.

Articles should be of broad interest and accessible to a wide audience of logicians. They may be purely expository, survey, or historical articles, or they may contain, in addition, new ideas or results or new approaches to old ones.

Communications should be announcements of important new results and ideas in any aspect of logic; they may be short papers in their final form or preliminary announcements (extended abstracts, position papers) of longer, full papers that will be published elsewhere. In any case, they should include, in addition to a description of the new results or ideas, enough history, background, and explanation to make the significance of the work apparent to a wide audience. *Communications* will be quickly refereed and published within six months of the submission of final versions.

WITH SUPPORT FROM INSTITUTIONAL MEMBERS.

The four numbers of Volume 16 are copyrighted ©2010 by the Association for Symbolic Logic, Inc. Reproduction of copyrighted numbers of the BULLETIN by photostat, photoprint, microfilm, or like process is forbidden, except by written permission, to be obtained from the Secretary of the Association, Charles Steinhorn, ASL, Box 742, Vassar College, 124 Raymond Avenue, Poughkeepsie, NY 12604, USA.

The paper used in this BULLETIN is acid-free and falls within the guidelines established to ensure permanence and durability.

This BULLETIN has been registered with the Copyright Clearance Center, Inc. The appearance of a code at the bottom of the first page of an article indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the per-copy fee stated in the code is paid directly to Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, USA. This consent does not extend to copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale. Specific written permission for such copying must be obtained from the Association.

CONTENTS OF VOLUME 16

ARTICLES

ABDULLA, PAROSH AZIZ. Well (and better) quasi-ordered transition systems	457
COSKEY, SAMUEL and KOSSAK, ROMAN. The complexity of classification problems for models of arithmetic	345
FUJIMOTO, KENTARO. Relative truth definability of axiomatic truth theories	305
KLEMENT, KEVIN C. The senses of functions in the Logic of Sense and Denotation	153
MCLARTY, COLIN. What does it take to prove Fermat's Last Theorem? Grothendieck and the logic of number theory	359
MEDVEDEV, ALICE and TAKLOO-BIGHASH, RAMIN. An invitation to model-theoretic Galois theory	261
MOSCHOVAKIS, YIANNIS N. Kleene's amazing Second Recursion Theorem	189
RAGHAVAN, DILIP. Almost disjoint families and diagonalizations of length continuum	240
SHORE, RICHARD A. Reverse mathematics: the playground of logic	378
URQUHART, ALASDAIR. Von Neumann, Gödel and complexity theory	516

COMMUNICATIONS

CORAZZA, PAUL. The Axiom of Infinity and transformations $j: V \rightarrow V$	37
KOELLNER, PETER. Strong logics of first and second order	1
