

International Journal of Technology Assessment in Health Care

Official journal of Health Technology Assessment
International (HTAi)

Editor-in-Chief

Marjukka Mäkelä, *Finnish Office for Health Technology Assessment, Finland*

International Journal of Technology Assessment in Health Care serves as a forum for researchers, health policy makers, professionals and industry representatives interested in the medical, social, ethical and economic implications of the diffusion and use of both established and new health practices and technology. Health technology assessment covers essentially all issues of relevance to health policy and practice including systematic reviews; economic, social, ethical and legal analysis; methodological developments in evaluative research; and the impact of health technology on organisation and management of health care systems, as well as issues in public health. In addition to general essays and research reports, thematic sections are published.

Medicine

NOW AVAILABLE!

The new edition of the popular and clinically oriented user-friendly text...

Edited by **David Schlossberg, MD**
Temple University, Philadelphia, USA

A fully updated version of this popular, clinically oriented, user-friendly text on infectious disease, with even more helpful graphics, tables, algorithms and images. It is packed full of information on diagnosis, differential diagnosis and therapy. In addition to the traditional organization of organ-system and pathogen-related information, this text also includes clinically helpful sections on the susceptible host (with individual chapters, for example, on the diabetic, the elderly, the injection drug user and the neonate), infections related to travel, infections related to surgery and trauma, nosocomial infection and bioterrorism. Positioned between the available encyclopedic tomes and the smaller pocket guides, this is a convenient, comprehensive, and highly practical reference for all those practicing in infectious diseases as well as internal or general medicine.

- Fully updated and user-friendly
- Abundantly illustrated with high-quality images and tables
- Bridges the gap between the available encyclopedic tomes and smaller pocket guides

Hardback | 1608 pages | 114 b/w illus | 236 color illus | 522 tables
9781107038912 | May 2015

XENEX
GERM-ZAPPING ROBOTS™

I made a change that reduced HAIs in my hospital.

Sue Moeslein RN, MSA, CIC
Riverside Regional Medical Center

Join Sue - Become a Face of Change Today.

CDC statistics show that in the United States, 1 in every 25 patients will contract a hospital acquired infection (HAI) costing upwards of \$30 billion annually, with close to 75,000 patients dying.

Our mission at Xenex is to eliminate the pathogens that cause infections affecting the health and lives of millions of patients and their families by providing the only Full Spectrum™ Pulsed Xenon UV Disinfection Robot.

Peer reviewed patient outcomes:

- ✓ 53% reduction in *C. diff* infection rates.¹
- ✓ 57% reduction in MRSA infection rates.²
- ✓ 100% elimination of VRE in isolation rooms.³
