# Canadian Journal on Aging / Revue canadienne du vieillissement

**Editor:** Mark Rosenberg, *Queen's University, Canada*

The *Canadian Journal on Aging / La Revue canadienne du vieillissement (CJA/RCV)* promotes excellence in research and disseminates the latest work of researchers in the social sciences, humanities, health and biological sciences who study the older population of Canada and other countries; informs policy debates relevant to aging through the publication of the highest quality research; seeks to improve the quality of life for Canada's older population and for older populations in other parts of the world through the publication of research that focuses on the

broad range of relevant issues from income security to family relationships to service delivery and best practices; and encourages the exchange of the latest ideas in gerontological research through the publication of work by international scholars to the benefit of the Canadian and international scholarly communities as well as older adults in Canada and around the world.

## The International Journal for Healthcare Ethics and Ethics Committees

# Cambridge Quarterly of Healthcare Ethics

*Cambridge Quarterly of Healthcare Ethics* is designed to address the challenges of biology, medicine and healthcare and to meet the needs of professionals serving on healthcare ethics committees in hospitals, nursing homes, hospices and rehabilitation centres. The aim of the journal is to serve as the international forum for the wide range of serious and urgent issues faced by members of healthcare ethics committees, physicians, nurses, social workers, clergy, lawyers and community representatives.

**Editors:**

Thomasine Kushner  
University of California, Berkeley, USA

Steve Heilig  
San Francisco Medical Center, USA

Matti Häyry  
University of Manchester, UK

Tuija Takala  
University of Helsinki, Finland

### Cambridge Quarterly of Healthcare Ethics Digital Archive 1992-1997

- is a repository of every single article published in the journal between 1992 and 1997 reproduced as high-resolution, searchable PDFs
- marks the complete digitisation of *Cambridge Quarterly of Healthcare Ethics*, with all material available through Cambridge Journals Online

For pricing information in the Americas: [USJournals@cambridge.org](mailto:USJournals@cambridge.org)

UNIVERSITY PRESS**

# International Journal of Technology Assessment in Health Care

## Instructions for Contributors

The editors welcome submissions of articles that deal with the wide range of topics related to assessment for health care policy and practice, including issues of technology diffusion, economics, ethics, law, and social and cultural perspectives. All manuscripts are screened by the Editors and members of the Editorial Board. Those that pass proceed to an international review process, which usually is completed within 4 to 10 weeks. Accepted manuscripts will be published within 4 to 6 months. Articles must be in English. Spelling, capitalization, and punctuation should conform to the 15th Edition of *The Chicago Manual of Style* (University of Chicago Press).

**MANUSCRIPT SUBMISSION AND REVIEW.** All manuscript submissions to the *International Journal of Technology Assessment in Health Care* must be made electronically via ScholarOne Manuscripts, at the following website address:

<http://mc.manuscriptcentral.com/thc>

Complete instructions are provided on this website. Please follow the instructions on the website to avoid delays. The instructions will prompt the author to provide all necessary information, including the corresponding author's contact information, which includes complete mailing address, phone and fax numbers, and an e-mail address. The website also requests suggested reviewers. The website will automatically acknowledge receipt of the manuscript and provide a manuscript reference number. Every effort will be made to provide the author with a rapid review. Correspondence should be sent *by email only* to Marjukka Mäkelä at: [marjukka.makela@thl.fi](mailto:marjukka.makela@thl.fi).

**PREPARATION OF MANUSCRIPT.** The entire manuscript (in word format), including all notes and references, must be typed, *double-spaced* on 8½ × 11 inch or A4 paper, with at least 1-inch (2.54 cm) margins. Manuscript pages should be numbered consecutively. Manuscripts should be arranged as follows: 1) cover sheet with title and short title; 2) abstract and key words; 3) acknowledgments, including source of funding; 4) text; 5) references; 6) tables with titles; and 7) figures, with captions on a separate page. Manuscripts should typically have *no more than 4,000 words*—including the abstract, which should not exceed 250 words. There should be no more than a total of four tables and illustrations together and no more than 25 references. Tables and illustrations exceeding these limits may be posted on the Journal's web site ([www.journals.cambridge.org/thc](http://www.journals.cambridge.org/thc)) as supplementary materials. Supplementary figures and tables should be numbered separately from the figures and tables in the printed issue, beginning with Supplementary Figure 1 and Supplementary Table 1. Where relevant, all manuscripts should include one paragraph on the policy implications of the findings of the study. Acronyms should be clearly spelled out on first use. The use of product trade names should be avoided; generic names should be used except where discussion of proprietary brands is essential to the manuscript.

**COVER SHEET AND COVER LETTER.** A cover letter, signed by all authors, must attest that 1) each named author contributed to both the conception/design and/or analysis/interpretation of the project and the writing of the paper; 2) each has approved the version being submitted; and 3) the content has not been published nor is being considered for publication elsewhere.

As relevant to the content of the paper, the letter should also attest to the fact that any research with human or animal subjects conforms to the legal and standards of the country in which it was performed. *All authors must disclose any financial arrangements with companies whose products are discussed in the paper or their competitors*; such information will not be revealed to reviewers but may be included in

a suitable format in the final publication if the manuscript is accepted. The cover letter should also provide all authors' full names, professional degrees, and institutional mailing addresses.

The cover sheet should list the article's title, the name, complete mailing address, telephone and fax numbers, and e-mail address of the corresponding author, and a short title (50 characters or less) for the running head.

**ABSTRACT AND KEYWORDS.** A 100- to 250-word abstract, submitted on a separate page, should *summarize* the objectives of the study or analysis, the article's major arguments and/or results, and its conclusions/recommendations. *Abstracts must be submitted in four sections: Objectives; Methods; Results; and Conclusions*, except where the subject and/or format of the article do not permit. Three to five key words, using terms from the Medical Subject Headings from *Index Medicus*, should follow the abstract.

**REFERENCES AND NOTES.** Bibliographic citations in the text should be indicated by numbers in parentheses usually at the end of the sentence after the period. When authors are mentioned in the text, the citation number should immediately follow the name(s) as follows:

**In-text citations:** "Jones and Smith (7) maintained that. . ."

*The reference list must be in alphabetical order* If a work has more than five authors, the first three authors should be listed, followed by et al. Abbreviate journal titles according to the listing in the current *Index Medicus*.

**Book:** 1. Jones AB, Smith JK. *Computer diagnosis and results*. New York: Penta Publishers; 1998.

**Journal:** 1. Jones AB, Smith JK. The relationship between health needs, the hospital, and the patient. *J Chron Dis*. 1995;32:310-312.

**Article in edited work:** 1. Jones AB, Smith JK. The diagnostic process. In: Brown R, Wilson T, eds. *New technology and its medical consequences*, vol. 1. New York: Apple Publishers; 1992:101-134.

In the reference list, do not include material that has been submitted for publication but has not yet been accepted. This material, with its date, should be noted in the text as "unpublished data" as follows:

**Unpublished data:** "Similar findings have been noted by L. W. Smith (unpublished data, 1998)."

*The Journal does not accept footnotes or appendices.*

**TABLES AND FIGURES.** Tables and figures should be numbered consecutively. All tables and figures must have a caption and must be cited in the text. Abbreviations in tables and figures should be avoided, except in the case of acronyms already used in the text. Table footnotes appear directly after the table; table references follow the footnotes. Figures must be submitted in Excel, PageMaker, or equivalent.

**PERMISSIONS.** Authors are responsible for obtaining written permission to publish material for which they do not own the copyright. Contributors will be asked to assign their copyrights to Cambridge University Press.

**COPYEDITING AND PROOFREADING.** The publishers reserve the right to copyedit and proofread all accepted articles. Page proofs will be sent to the lead author for final review.

**REPRINTS.** Reprints may be purchased if ordered at proof stage.
