doi: 10.1192/j.eurpsy.2021.1878

Introduction: Psychiatric emergency visits have been associated to several climate variables. However, the influence of relative humidity has been not well established.

Objectives: The analyse the influence of relative humidity on emergency care visits.

Methods: Daily urgency visits were extracted from electronic medical records of Hospital Universitario La Paz from 1st January 2019 to 31st December 2019. Relative humidity data (%) was obtained from a local climate station. A negative binomial multivariate regression model was performed with relative humidity, weekday and month as covariates.

Results: Relative humidity was not associated with number of psychiatric emergency department visits (IRR 1.00; 95%CI 0.99-1.00)

Conclusions: Relative humidity did not influence emergency help seeking for patients suffering from suicidal phenomena

Disclosure: No significant relationships.

Keywords: Emergency Care; Ecological factors

Introduction: Social PSYCHIATRY is essential for solutions of RH-conflicts leading to immense psychic&medical problems-[2a-e,3]. Millions tenants in Europe: Germany-54.3%/Austria-30.2%/France-25.3%/GB-24.1%/Italy-12.9%/Slovenia-4.5%. German journals reflect catastrophic situation of tenant-lessor conflicts-[3].

Methods: Psychological-medical-social observations-[2a,e].

Results: Complex interaction of social-natural factors (micro-ecology/apartments) are demonstrated by conflicts tenants-lessors (RH-Munich). Conflicts conc. high-rents, luxurious repair, cause dangerous psychoneurological diseases: anxiety-neurosis-insomnia-depression,etc., esp. in patients/seniors with cardio-vascular pathology. Defect-doors&radiators&windows (air-currents) induce respiratory-diseases, defect-illumination causes accidents (neuro-orthopaedic diseases: commotio-cerebri,etc.). Examples for impossible situation in German-RH: After 47years annihilation of RH-contract (tenant-woman 74years); over 4.5years lessor tries to eliminate 2scientists from RH, living-working 40/50years (one invalid, other 86years, both with complex pathology) by justice-terror; RH-contracts of tenants 90years with dementia&blind-senior (90years) are annihilated. RH-conflict leads to lethal consequences of 73 year tenant-[3].

Conclusions: SOCIAL PSYCHIATRY could help millions of tenants injured by RH-conflicts-[2a-c,1a,b] by (a)-psychotherapy&education considering “total symptoms of mind-body, acc. to Emperor AKIHITO during ICPM-2005-Kobe-[2d], (b)-education of RH-administrators incl. philosophical/psychological/psychiatric-examination, (c)-foundation of „house-councils“ for „RH-industry“ counteracting psychopathological/-somatic diseases. This way will be supported UNO-Agenda21 for better health/education/ecology on global-level.

Disclosure: No significant relationships.
