The following papers have been accepted for publication and will appear shortly

McCrudden, M. On the Brunn–Minkowski coefficient of a locally compact unimodular group.

Mohanty, R. and Ray, B. K. On the convergence factor of a Fourier series and a differentiated Fourier series.

Bondy, J. A. On Kelly's congruence theorem for trees.

Jain, R. N. General series involving H-functions.

Burridge, R. The rotation group and tensor spherical functions.

McKenzie, D. P. The oscillations of a viscous gravitating sphere.

Hofmann, K. H. Finite dimensional submodules of G-modules for a compact group G.

Bajpai, S. D. Transformation of an infinite series of G-Function.

Rajwade, A. R. Arithmetic on curves with complex multiplication by the Eisenstein integers.

Jones, J. R. and Lewis, M. K. Non-Newtonian effects in axially symmetric rotational flows of some elastico-viscous liquids.

Miller, D. R. The boundary layer on a paraboloid of revolution.

Welsh, D. J. A. On the hyperplanes of a matroid.

Shah, M. On some results involving generalised hypergeometric polynomials.

Lewin, J. and Lewin, T. Semigroup laws in varieties of solvable groups.

Dore, B. D. The decay of oscillations of a non-homogeneous fluid within a container.

McLenaghan, R. G. An explicit determination of the empty space-times on which the wave equation satisfies Huygens' principle.

Wimp, J. and Colton, D. Jacobi series which converge to zero, with applications to a class of singular partial differential equations.

Iyahen, S. O. Ultrabarrelled groups and the closed graph theorem.

Yang, J. S. Almost periodicity and B-equicontinuity in topological dynamics.

Carter, S. A class of compressible embeddings.

Mitra, A. K. and Mitra, S. The Boltzmann–Landau transport equation I. The first order Chapman–Enskog approximation.

Mitra, A. K. and Mitra, S. The Boltzmann–Landau transport equation II. The transport coefficients.

Sibson, R. An existence theorem for H-space inverses.
