

INSTRUCTIONS FOR CONTRIBUTORS

SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via our manuscript submission and tracking site, <http://www.editorialmanager.com/psm/>. Full instructions for electronic submission are available directly from this site. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

Papers for publication from Europe (except those on genetic topics, irrespective of country), and all papers on imaging topics, should be submitted to the UK Office.

Papers from the Americas, Asia, Africa, Australasia and the Middle East (except those dealing with imaging topics), and all papers dealing with genetic topics, irrespective of country, should be sent to US Office.

Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

Declaration of Interest: A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

REFERENCES The APA referencing system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. In the References section. Where several references are cited together they should be listed in rising date order. The References section should be supplied in alphabetical order listing all authors up to 7 in number, or the first 6 authors plus the last author, date, article title, journal title in full, volume, page numbers and/or DOI. (authors' names in bold, journal titles in full), following the text. Some examples follow:

Journal article with DOI:

Nevin, A. (1990). The changing of teacher education special education. *Teacher Education and Special Education: The Journal of the Teacher Education Division of the Council for Exceptional Children*, 13(3-4), 147-148. doi:XXX

Light, M. A., & Light, I. H. (2008). The geographic expansion of Mexican immigration in the United States and its implications for local law enforcement. *Law Enforcement Executive Forum Journal*, 8, 73–82. doi:XXX

Journal article without DOI (when DOI is not available):

Good, C. D., Johnsrude, I. S., Ashburner, J., Henson, R. N. A., Firston, K. J., & Frackowiak, R. S. J. (2001). A voxel-based morphometric study of ageing in 465 normal adult human brains. *NeuroImage*, 14, 21–36. Retrieved from <http://xxxx>

No retrieval date is needed.

Journal article with DOI, more than seven authors:

Gilbert, D. G., McClernon, F. J., Rabinovich, N. E., Sugai, C., Plath, L. C., Asgaard, G., ... Botros, N. (2004). Effects of quitting smoking on EEG activation and attention last for more than 31 days and are more severe with stress, dependence, DRD2 A1 allele, and depressive traits. *Nicotine and Tobacco Research*, 6, 249–267. doi:XXX

Citations for Websites:

Simmons, B. (2015, January 9). The tale of two Flaccos. Retrieved from <http://grantland.com/the-trian...>

[Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.]

FIGURES AND TABLES Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

PROOFS Page proofs will be sent to the author designated to receive correspondence, corrections other than to printer's errors may be charged to the author. The corresponding author of each paper will receive a PDF file of their article.

PSYCHOLOGICAL MEDICINE

CONTENTS

REVIEW ARTICLES

Depression networks: a systematic review of the network paradigm causal assumptions
Huang D et al 1665

The effects of childhood maltreatment on cortical thickness and gray matter volume: a coordinate-based meta-analysis
Yang W et al 1681

INVITED REVIEW

What is formulation in psychiatry?
Owen G 1700

ORIGINAL ARTICLES

Effect of high-endurance exercise intervention on sleep-dependent procedural memory consolidation in individuals with schizophrenia: a randomized controlled trial
Lo LLH et al 1708

Neuroanatomical markers of familial risk in adolescents with conduct disorder and their unaffected relatives
Fairchild G et al 1721

The impact of sex, age at onset, recurrence, mode of ascertainment and medical complications on the family genetic risk score profiles for alcohol use disorder
Kendler KS et al 1732

Combining CBT and sertraline does not enhance outcomes for anxious youth: a double-blind randomised controlled trial
Hudson JL et al 1741

Developmental milestones in early childhood and genetic liability to neurodevelopmental disorders
Hannigan LJ et al 1750

Independent contribution of polygenic risk for schizophrenia and cannabis use in predicting psychotic-like experiences in young adulthood: testing gene × environment moderation and mediation
Elkrief L et al 1759

An exploration of gender and prolonged grief symptoms using network analysis
Maccallum F et al 1770

Estimating measurement equivalence of the 12-item General Health Questionnaire across ethnic groups in the UK
King K et al 1778

Social and occupational recovery in early psychosis: a systematic review and meta-analysis of psychosocial interventions
Frawley E et al 1787

Treating depression with a smartphone-delivered self-help cognitive behavioral therapy for insomnia: a parallel-group randomized controlled trial
Chan CS et al 1799

A multinational case-control study comparing forensic and non-forensic patients with schizophrenia spectrum disorders: the EU-VIORMED project
de Girolamo G et al 1814

Context v. algorithm: evidence that a transdiagnostic framework of contextual clinical characterization is of more clinical value than categorical diagnosis
van Os J et al 1825

Neurobiological correlates of antisociality across adolescence and young adulthood: a multi-sample, multi-method study
Blankenstein NE et al 1834

Opportunity cost determines free-operant action initiation latency and predicts anxiety
Nair A et al 1850

Disentangling heterogeneity of psychosis expression in the general population: sex-specific moderation effects of environmental risk factors on symptom networks
Betz LT et al 1860

Dysfunction in differential reward-punishment responsiveness in conduct disorder relates to severity of callous-unemotional traits but not irritability
Zhang R et al 1870

Aberrant adapting of beliefs under stress: a mechanism relevant to the formation of paranoia?
Krkovic K et al 1881

Cognitive reserve as a moderator of outcomes in five clusters of first episode psychosis patients: a 10-year follow-up study of the PAFIP cohort
Ayesa-Arriola R et al 1891

Hippocampal volume and volume asymmetry prospectively predict PTSD symptom emergence among Iraq-deployed soldiers
Cobb AR et al 1906

Early childhood adversity and non-affective psychosis: a study of refugees and international adoptees in Sweden
Hjern A et al 1914

Self-processing in relation to emotion and reward processing in depression
Hobbs C et al 1924

General v. specific vulnerabilities: polygenic risk scores and higher-order psychopathology dimensions in the Adolescent Brain Cognitive Development (ABCD) Study
Waszczuk MA et al 1937

Disentangling the links between gastric emptying and binge eating v. purging in eating disorders using a case-control design
Keel PK et al 1947

Validity of the DSM-5 craving criterion for alcohol, tobacco, cannabis, cocaine, heroin, and non-prescription use of prescription painkillers (opioids)
Shmulewitz D et al 1955

Synergistic effects of childhood adversity and polygenic risk in first-episode psychosis: the EU-GEI study
Aas M et al 1970

Mortality among inpatients with bipolar disorders and COVID-19: a propensity score matching analysis in a national French cohort study
Fond G et al 1979

Condensed Internet-delivered prolonged exposure provided soon after trauma: a randomised trial
Bragesjö M et al 1989

Involuntary treatment in patients with anorexia nervosa: utilization patterns and associated factors
Mac Donald B et al 1999

Dynamic association of the first identifiable symptom with rapidity of progression to first-episode psychosis
Paquin V et al 2008

Impact of data extraction errors in meta-analyses on the association between depression and peripheral inflammatory biomarkers: an umbrella review
Lee S et al 2017

Effects of prior deployments and perceived resilience on anger trajectories of combat-deployed soldiers
Campbell-Sills L et al 2031

Causal pathways to social and occupational functioning in the first episode of schizophrenia: uncovering unmet treatment needs
Miley K et al 2041

Antipsychotic treatment effects and structural MRI brain changes in schizophrenia
Emsley R et al 2050

The priming effect of repetitive transcranial magnetic stimulation on clinical response to electroconvulsive therapy in treatment-resistant depression: a randomized, double-blind, sham-controlled study
Rothämel M et al 2060

Mental health comorbidities following peer victimization across childhood and adolescence: a 20-year longitudinal study
Onoioiu SI et al 2072

Mindfulness-Oriented Recovery Enhancement remediates anhedonia in chronic opioid use by enhancing neurophysiological responses during savoring of natural rewards
Garland EL et al 2085

Disrupted state transition learning as a computational marker of compulsivity
Sharp PB et al 2095

Associations between primary care recorded cannabis use and mental ill health in the UK: a population-based retrospective cohort study using UK primary care data
Keerthy D et al 2106

Evidence that infant and early childhood developmental impairments are associated with hallucinatory experiences: results from a large, population-based cohort study
Carey E et al 2116

Aberrant global and local dynamic properties in schizophrenia with instantaneous phase method based on Hilbert transform
Sheng D et al 2125

Continuities in maternal substance use from early adolescence to parenthood: findings from the intergenerational cohort consortium
Thomson KC et al 2136

Progressive brain structural abnormality in depression assessed with MR imaging by using causal network analysis
Han S et al 2146

Risk for depression tripled during the COVID-19 pandemic in emerging adults followed for the last 8 years
Alzueta E et al 2156

Brain signatures in children who contemplate suicide: learning from the large-scale ABCD study
Wiglesworth A et al 2164

CORRESPONDENCE

Student mental health consultations at a Japanese university and the current state of affairs on the increase in suicide victims in Japan during the COVID-19 pandemic
Fushimi M 2174

Meta-analysis of virtual reality exposure therapy for social anxiety disorder
Morina N et al 2176

Response to Morina et al.'s criticisms of Horigome et al.'s recent report on the efficacy of virtual reality exposure therapy for social anxiety disorder
Horigome T et al 2179

Emotion regulation difficulties and interpersonal problems during the COVID-19 pandemic: predicting anxiety and depression
Solbakken OA et al 2181

Recognizing flawed assumptions in suicide risk assessment research and clinical practice
Rudd MD 2186

Role of stressors in adult fibromyalgia – a response to Kaleycheva et al.
Crawford JS 2188

INVITED LETTER REJOINER

The role of lifetime stressors in adult fibromyalgia: a response to Joan S. Crawford's letter to the editor
Kaleycheva N et al 2190

PERSONAL TRIBUTE

Professor Michael King 1950–2021
Osborn D 2192
