Unfortunately, an error occurred in Table 4 of this article. The correct table is presented below.

Table 4. Content of cytokines in 24 h splenocytes supernatants stimulated with 250 ng/ml of PMA plus ionomycin (Mean values with their standard errors, *n* 10)

Cytokines	A		B		C		D	
	Mean	SEM	Mean	SEM	Mean	SEM	Mean	SEM
Th1								
IL-2 (ng/ml)	4.10	1.04	4.10	1.01	5.65	0.93	4.10	0.79
IFN γ (ng/ml)	4.61	0.79	5.93	1.02	6.37	1.36	3.70	0.81
Th2								
IL-4 (pg/ml)	29.32	7.97	32.43	5.99*	15.86	1.31	12.44	1.82
IL-10 (pg/ml)	181.68	47.24	176.33	43.80	90.59	8.53	108.03	19.62

A: pups supplemented with 1% CLA during gestation and suckling through dams (5 week). B: pups supplemented with 1% CLA during gestation through dams and during suckling by oral gavage (5 week). C: pups supplemented with 1% CLA only during suckling by oral gavage (3 week). D: pups non-supplemented (0 week).

* $P = 0.06$ v. group D (one-way ANOVA).
