# The IOCDC Tradition

By Eric Hollander, MD, Joseph Zohar, MD, and Donatella Marazziti, MD, PhD

On behalf of the International Organizing Committee of the Third International Obsessive Compulsive Disorder Conference (3rd IOCDC) including Eric Hollander, MD, Joseph Zohar, MD, and Donatella Marazziti, MD, PhD, it gives us great pleasure to welcome you to this special Academic Supplement of *CNS Spectrums*—New Developments in Obsessive Compulsive and Spectrum Disorders. The 11 papers in this journal were derived from the planning meeting of the 3rd IOCDC held in Westchester, New York, on Friday, December 5, 1997. This lively discussion among the workshop chairs helped to reshape the program for the upcoming 3rd IOCDC—to be held in Madeira, Portugal, September 11–12, 1998.

In concurrence with the tradition of International Obsessive Compulsive Disorder Conferences, this upcoming meeting is being held on a remote and hard-to-reach tropical island. The 1st IOCDC was held in Capri, Italy in March, 1993, and resulted in the book *Current Insights in Obsessive Compulsive Disorder*, edited by Drs. Hollander, Zohar, Marazziti, and Olivier, and published by John Wiley & Sons of Chichester, UK in 1994. The 2nd IOCDC was held in Guadeloupe, French West Indies, in February, 1996, and resulted in the first two Academic Supplements which helped launch *CNS Spectrums* (1996;1[1/2]).

We would like to acknowledge the generous support and unrestricted educational grants from Solvay Pharmaceuticals and Pharmacia & Upjohn for both the IOCDC mission, and for this Academic Supplement in *CNS Spectrums*. Special mention of Jack Redmond and David Dodd of US Solvay Pharmaceuticals and Chantel Vekens of Solvay Pharmaceuticals International is well deserved. We are proud of the fact that the IOCDC mission will now progress to an annual closed meeting, bringing together the world's experts in obsessive-compulsive disorder (OCD) to generate new hypotheses and synthesize the latest research findings in the field.

The 3rd IOCDC will constitute eight closed workshops that focus on epidemiology, childhood OCD and immune function, the OCD spectrum, genetics/molecular biology, neuroimaging, behavior therapy,

and experimental pharmacology and treatment. We are pleased to be able to set the tone of the 3rd IOCDC meeting in Madeira, Portugal, with this special supplement in *CNS Spectrums*. We plan to communicate more of the exciting syntheses and hypotheses that are derived from the workshops of the 3rd IOCDC in an additional *CNS Spectrums* supplement to be published shortly after the meeting. In the meantime, please enjoy the abundance of riches in OCD included in this issue. These include articles on cross-national epidemiology, uncomplicated and comorbid OCD, the next millennium, new biological models and subtypes, neuroimaging, transcranial magnetic stimulation, schizo-obsessive subtype, the seven deadly sins and OCD, psychopharmacology, childhood OCD, and the economic costs of OCD. **CNS**
