This supplement has been prepared especially for our readers to bring them information and announcements of professional interest. By placing advertisements in the pages of this journal, our advertisers have indicated a desire to communicate with our readers. We hope our readers will acknowledge their indirect support of the journal and its purposes by mentioning the journal in correspondence with advertisers.

SOCIAL FORMATIONS AND POWER IN LATIN AMERICA

edited by **JORGE GRACIANRENA** and **ROLANDO FRANCO**,
*United Nations Economic Commission for Latin America,
Santiago, Chile*

Two perspectives are presented concerning the political development of Latin America over the last three decades—the political process in relation to inherent values and ideological frames of reference, and as it has been reflected in the social sciences—through a discussion of regional contributors.

NATIONAL ATTRIBUTES AND BEHAVIOR:

Data, Dimensions, Linkages and Groups, 1950-1965

Volume 3: Dimensions of Nations Series

by R. J. RUMMEL, *University of Hawaii*

The more the power, the more the conflict behavior of a nation.

The political alignment of nations does not indicate much about their conflict behavior.

Energy production times population is the best indicator of a nation's power pattern.

Nations are disposed to have more conflict with those that are small, non-Catholic, and diverse.

Such findings are included in the third volume of this series, which presents the basic analyses and empirical data of the Dimensions of Nations project over the course of 11 years' research. Compiling data on international behavior from 1950-1965, the author presents here the body of raw information from which the project's conclusions were drawn.

CONTENTS

1. Introduction
 2. Attributes and Nations
 3. International Behavior
 4. Towards Delineating Dimensions and Linkages
 5. Space-Time Dimensions of Nations, 1950-1965
 6. Space-Time Dimensions of Behavior
 7. Linkage Analysis
 8. The Most General Linkages
 9. Common Actors and Their Linkage
 10. International Social Indicators
- References / Appendices

"What is presented here comprise the most extensive and intensive range of national multivariate analyses of which I am aware. They cover all nations in the post World War II years; they involve the full range of national attributes, from economic, social and cultural to demographic, political and military; they consider the variety of international behaviors of nations, including solidary or integrative, contractual and antagonistic behaviors; they concern the many linkages between such behaviors and national attributes and the most general equations for predicting behavior; they uncover what pairs of nations are most alike in their linkages; and they point to a set of national and international social indicators."

SUPPLEMENTARY MILITARY FORCES

Reserves, Militias, and Auxiliaries

Edited by **LOUIS A. ZURCHER**, *University of Texas, Austin*
GWYN HARRIES-JENKINS, *University of Hull*

As the primary link between the military and civilian worlds, reserve, militia, and auxiliary forces offer a unique opportunity for the study of many of the major political, social, and economic issues of our time. Some of the most current, original investigations of the reserves, militias, and/or auxiliaries of eighteen nations are presented here. The major questions addressed include: how effective are these supplementary forces? are they legitimate organizations deserving of maintenance? do supplementary forces facilitate interaction between military and civilian social institutions? what are the differences between the military professional and the citizen-soldier?

MILITARY RULE

IN LATIN AMERICA

Functions, Consequences and Perspectives

edited by **PHILIPPE C. SCHMITTER**, *University of Chicago*

"fresh original, first-rate pieces of scholarship which explore some previously unexplored areas and subject to empirical testing and analysis some untested, unanalyzed—but fairly commonly-held—propositions, explanations, and assumptions having to do with the armed forces."

— JOURNAL OF LATIN AMERICAN STUDIES

"This valuable collection is for the specialist . . . Each author presents a useful summary of the relevant literature, and a number of previous propositions are challenged or modified."

— PERSPECTIVE

"The volume's innovative features relate to its strong emphasis on theoretical considerations and scientific method. It should find its greatest appeal at the graduate level, given its rather technical and sophisticated approaches."

MONEY AND POWER

Banks and the World Monetary System

by **JONATHAN D. ARONSON**

This volume is an analysis of the role and power of private American banks in the international monetary system. The impact of banks on the creation and downfall of the Bretton Woods monetary system (1944-1971) is discussed in detail as is their influence on several currency crises both before and after the downfall of the dollar. The book also examines the increasingly crucial interaction between banks and underdeveloped countries in the seventies. Aronson concludes that banks have rarely directly determined government policies, but they have had considerable indirect, "circumventing" influence.

METROPOLITAN LATIN AMERICA: The Challenge and the Response

Latin American Urban Research, Volume 6

edited by WAYNE A. CORNELIUS, *Massachusetts Institute of Technology*
ROBERT V. KEMPER, *Southern Methodist University*

This volume focuses on the most critical problems confronting nine major Latin American and Caribbean cities, and the actual responses of local and national governments to these problems. Each chapter provides a comprehensive overview of urban development problems and government performance in dealing with them in a single metropolitan area. Contributors also discuss the role of the metropolitan area in regional and national development, and the tensions between government policies aimed at the problems of the metropolitan area and policies for national and regional development. The volume provides indispensable source material for scholars doing research on specific cities as well as an empirical base for comparative urban studies. It also includes a 1,600-item bibliography of studies on urban Latin America published during the 1974-1976 period.

CONTENTS

Introduction, WAYNE A. CORNELIUS

Case Studies

1. Guadalajara: Creating the Divided City, JOHN WALTON, *Northwestern University*

EVALUATION RESEARCH AND DEVELOPMENT ACTIVITIES

by **FRANCIS W. HOOLE**

This study concerns the methodology used to evaluate the impact of development activities. The book presents the methodology of the evaluation research approach; illustrates its use in the development field, and discusses its advantages and limitations. These topics have significant practical importance today as it becomes apparent that numerous development programs of national governments are ineffective and as various technical assistance agencies undergo crises concerning their abilities to accomplish objectives. The book concludes by summarizing the implications which result from this discussion, and makes suggestions for further research.
