VERIFY WITH CONFIDENCE

HEALTHMARK'S CLEARLY
VISIBLE, OBJECTIVE TESTS OF
CLEANING METHODS

SCREEN WITH THE **NOW! TEST**

Rapid Indicator of Gram-Negative bacteria

Simply flush the lumen or swab the elevator mechanism of a flexible endoscope, such as a duodenoscope, and follow the procedure for gram-negative bacteria detection in less than 12 hours.

AUDIT WITH THE **FLEXIBLE ENDOSCOPE SAMPLING KIT**

For testing of duodenoscopes in compliance with FDA guidelines

After flushing and brushing the lumen and elevator mechanism of a duodenoscope, simply follow the procedure to have the sample solution & brush heads quickly sent to Nelson Laboratories, the leader in independent testing of flexible endoscopes.

MONITOR WITH **PROFORMANCE™ CLEANING VERIFICATION TOOLS**

Perform weekly testing of all assets of the cleaning process

Challenge the cleaning efficacy of the ultrasonic bath with SonoCheck™, the automated washer with TOSI®, pulse-flow lumen washers with LumCheck™, endoscope washers with FlexiCheck™ and more!

CONTENTS

SHEA/IDSA/APIC Practice Recommendation

- 527** Strategies to prevent *Clostridioides difficile* infections in acute-care hospitals: 2022 Update
Larry K. Kociolek, Dale N. Gerding, Ruth Carrico, Philip Carling, Curtis J. Donskey, Ghinwa Dumyati, David T. Kuhar, Vivian G. Loo, Lisa L. Maragakis, Monika Pogorzelska-Maziarz, Thomas J. Sandora, David J. Weber, Deborah Yokoe and Erik R. Dubberke

SHEA White Paper

- 550** SHEA Neonatal Intensive Care Unit (NICU) White Paper Series: Practical approaches for the prevention of central-line-associated bloodstream infections
Martha Muller, Kristina A. Bryant, Claudia Espinosa, Jill A. Jones, Caroline Quach, Jessica R. Rindels, Dan L. Stewart, Kenneth M. Zangwill and Pablo J. Sánchez

Original Articles

- 565** Measuring empiric antibiotic spectrum—A journey through space and time
Michael E. Yarrington, Rebekah H. Wrenn, Justin Spivey, Christina Sarubbi, Deverick J. Anderson and Rebekah W. Moehring
- 570** Pharmacist gender and physician acceptance of antibiotic stewardship recommendations: An analysis of the reducing overuse of antibiotics at discharge home intervention
Valerie M. Vaughn, Daniel L. Giesler, Daraoun Mashrah, Adamo Brancaccio, Katie Sandison, Emily S. Spivak, Julia E. Szymczak, Chaorong Wu, Jennifer K. Horowitz, Linda Bashaw and Adam L. Hersh
- 578** Molecular concordance of methicillin-resistant *Staphylococcus aureus* isolates from healthcare workers and patients
Timileyin Y. Adediran, Stephanie Hitchcock, J. Kristie Johnson, O. Colin Stine, Surbhi Leekha, Kerri A. Thom, Yuanyuan Liang, David A. Rasko and Anthony D. Harris
- 589** Epidemiology and genomics of a slow outbreak of methicillin-resistant *Staphylococcus aureus* (MRSA) in a neonatal intensive care unit: Successful chronic decolonization of MRSA-positive healthcare personnel
Kathleen A. Quan, Mohamad R. A. Sater, Cherry Uy, Robin Clifton-Koeppel, Linda L. Dickey, William Wilson, Pat Patton, Wayne Chang, Pamela Samuelson, Georgia K. Lagoudas, Teri Allen, Lenny Merchant, Rick Gannotta, Cassiana E. Bittencourt, J. C. Soto, Kaye D. Evans, Paul C. Blainey, John Murray, Dawn Shelton, Helen S. Lee, Matthew Zahn, Julia Wolfe, Keith Madey, Jennifer Yim, Shruti K. Gohil, Yonatan H. Grad and Susan S. Huang
- 597** Survey of coronavirus disease 2019 (COVID-19) infection control policies at leading US academic hospitals in the context of the initial pandemic surge of the severe acute respiratory coronavirus virus 2 (SARS-CoV-2) omicron variant
Chanu Rhee, Meghan A. Baker and Michael Klompas
- 604** Transmission of severe acute respiratory coronavirus virus 2 (SARS-CoV-2) between hospital workers and members of their household: Nationwide, registry-based, cohort study from Norway
Ingeborg Hess Elgersma, Kjetil Telle, Petter Elstrøm, Håvard Skagseth and Oliver Kacelnik

- 610** Surgical site infection trends in community hospitals from 2013 to 2018
Jessica L. Seidelman, Arthur W. Baker, Sarah S. Lewis, Sonali D. Advani, Becky Smith and Deverick Anderson, for the Duke Infection Control Outreach Network Surveillance Team
- 616** Semiautomated surveillance of deep surgical site infections after colorectal surgeries: A multicenter external validation of two surveillance algorithms
Janneke D.M. Verberk, Tjallie I.I. van der Kooi, David J. Hetem, Nicolette E.W.M. Oostdam, Mieke Noordergraaf, Sabine C. de Greeff, Marc J.M. Bonten and Maaïke S.M. van Mourik
- 624** Combined laparoscopic and open colon surgery rankings fail to accurately rank hospitals by surgical-site infection rate
Daniel A. Caroff, Christina Chan, Ken Kleinman, Michael S. Calderwood, Robert Wolf, Richard Platt and Susan S. Huang
- 631** The utility of routine autologous bone-flap swab cultures in predicting post-cranioplasty infection
Tuan Hoang, Nick Daneman, Jerome A. Leis, Eric A. Coomes, Marion Elligsen, Connie Colavecchia, Alison Halliday, Yulia Lin, Leodante da Costa and Philip W. Lam
- 638** The impact of automated hand hygiene monitoring with and without complementary improvement strategies on performance rates
James W. Arbogast, Lori D. Moore, Megan DiGiorgio, Greg Robbins, Tracy L. Clark, Maria F. Thompson, Pamela T. Wagner, John M. Boyce and Albert E. Parker
- 643** The utility and sustainability of US Ebola treatment centers during the coronavirus disease 2019 (COVID-19) pandemic
Jocelyn J. Herstein, Paul D. Biddinger, Shawn G. Gibbs, Angela L. Hewlett, Aurora B. Le, Michelle M. Schwedhelm and John J. Lowe

Concise Communication

- 651** Pathogens attributed to central-line-associated bloodstream infections in US acute-care hospitals during the first year of the coronavirus disease 2019 (COVID-19) pandemic
Lindsey M. Weiner-Lastinger, Kathryn Haass, Cindy Gross, Denise Leaptrot, Emily Wong, Hsiu Wu and Margaret A. Dudeck
- 655** Duration of isolation and contagiousness in coronavirus disease 2019 (COVID-19) patients receiving tocilizumab and dexamethasone: A case series
Florence Côté, Guy Boivin, Vilayvong Loungnarath, Annie Ruest, Julie Bestman-Smith, Julie Carbonneau, Marie-Ève Hamelin and Marie-Claude Roy
- 659** Persistence of infectivity in elderly individuals diagnosed with severe acute respiratory coronavirus virus 2 (SARS-CoV-2) infection 10 days after onset of symptoms: A cross-sectional study
Yves Longtin, Leighanne O. Parkes, Hugues Charest, Stacy Rajarison, Gerasimos J. Zaharatos, Judith Fafard, Michel Roger and Gaston De Serres
- 663** Effectiveness of commercial portable air cleaners and a do-it-yourself minimum efficiency reporting value (MERV)-13 filter box fan air cleaner in reducing aerosolized bacteriophage MS2
Jennifer L. Cadnum, Austin Bolomey, Annette L. Jencson, Brigid M. Wilson and Curtis J. Donskey
- 666** Assessing the confidence, knowledge and learning preferences of healthcare workers regarding personal protective equipment use during the coronavirus disease 2019 (COVID-19) pandemic
Rachel Brown, Amanda M. Brown, Sharon Markman, Rukhshan Mian, Vineet M. Arora and Craig A. Umscheid

670 A randomized trial to determine whether wearing slippers reduces transfer of bacteriophage MS2 from floors to patients and surfaces in hospital rooms
Muhammed F. Haq, Heba Alhmidi, Sarah N. Redmond, Jennifer L. Cadnum, Sandra Y. Silva, Brigid M. Wilson and Curtis J. Donskey

674 Uptake in newly approved antibiotics prescribed to patients with carbapenem-resistant Enterobacterales (CRE)
Katie J. Suda, Alfredo Traversa, Ursula Patel, Linda Poggensee, Margaret A. Fitzpatrick, Geneva M. Wilson and Charlesnika T. Evans

Research Brief

678 Prolonged severe acute respiratory coronavirus virus 2 (SARS-CoV-2) viral shedding in lower-respiratory specimens of critically ill patients does not correlate with nasopharyngeal swab results
Daniel M. Brailita, Allison M. Cushman-Vokoun, Macy G. Wood, Ann M. Crowley, Sharleen A. Rapp, Paul D. Fey, Mark E. Rupp and Angela L. Hewlett

679 A pilot randomized trial to evaluate the efficacy of oral and nasal povidone iodine in reducing the burden of severe acute respiratory syndrome coronavirus 2 RNA in patients with coronavirus disease 2019
Sarah N. Redmond, Daniel F. Li, Hussein Abou Ghaddara, Muhammed F. Haq, Lucas D. Jones, Alexandria M. Nguyen, Margaret Tiktin, Jennifer L. Cadnum, Maria E. Navas, Jessica Bingham, Brigid M. Wilson and Curtis J. Donskey

681 Evaluation of cycle threshold to assist with safe return to work for healthcare workers with coronavirus disease 2019 (COVID-19)
Laura M. Selby, Angela Hewlett, Macy G. Wood and Richard Starlin

682 Fit testing of masks worn by frontline healthcare workers
Louisa M. Sasko, Brian Oliver and Sheree M. Smith

Letters to the Editor

685 Steps toward zero central-line-associated bloodstream infections (CLABSIs) in a long-term acute-care hospital: Multidisciplinary teamwork, a prevention bundle, education, and audits
Mohamed O. Adawee, Laretta J. Ellsworth, Kristy A. Beckholt, Tina M. Gross and Martha B. Samsel

686 Ventilated patient headboards in the postanesthesia care unit as an alternative to universal preprocedural severe acute respiratory coronavirus virus 2 (SARS-CoV-2) testing
Jessica A. Penney and Shira Doron

688 Reproducibility of cycle threshold values from severe acute respiratory coronavirus virus 2 (SARS-CoV-2) reverse-transcription polymerase chain reaction (RT-PCR) assays
Ahad Azeem, Ryan W. Walters, Stephen J. Cavalieri and David S. Quimby

690 Intentions for uptake of the coronavirus disease 2019 (COVID-19) vaccine booster in healthcare workers
Tyler D. Stone, Cerina Lee, Jacqueline Bannon, Thanh-Huyen T. Vu, Lisa R. Hirschhorn, John T. Wilkins and Charlesnika T. Evans

692 Hepatitis A virus transmission in a dental clinic setting
Adi Vinograd, Debby Ben-David, Yael Gozlan, Orna Mor, Zohar Mor, Rivka Sheffer and Michal Savion

Infection Control & Hospital Epidemiology (ISSN 0899-823X) is published monthly by Cambridge University Press, One Liberty Plaza, New York, NY 10006, USA.

Editorial Office

Communications should be addressed to the Editor, *Infection Control & Hospital Epidemiology*, One Liberty Plaza, New York, NY 10006 (email: iche.managingeditor@cambridge.org). Contributors should consult the Instructions for Contributors, which is available at the journal's Web site.

Advertising

Please direct advertising inquiries to M. J. Mrvica Associates, 2 West Taunton Avenue, Berlin, NJ 08009 (e-mail: mjmrvica@mrvica.com; telephone: 856-768-9360, fax: 856-753-0064). Publication of an advertisement in *Infection Control & Hospital Epidemiology* does not imply endorsement of its claims by the Society for Healthcare Epidemiology of America, by the Editor, or by Cambridge University Press.

Permissions

Articles may be copied or otherwise reused without permission only to the extent permitted by Sections 107 and 108 of the US Copyright Law. Permission to copy articles for personal, internal, classroom, or library use may be obtained from the Copyright Clearance Center (<http://www.copyright.com>,

email: info@copyright.com). For all other uses, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, please contact Cambridge University Press. Full details may be found at: www.cambridge.org/about-us/rights-permissions.

Subscriptions

The individual subscription prices for 2023 are: Print & Online: \$305; Online Only: \$236. Individuals have the option to order directly from Cambridge University Press. Institutional print + electronic and e-only subscriptions are available from Cambridge University Press and include unlimited online access; rates are tiered according to an institution's type and research output and may be reviewed at the journal's homepage on Cambridge Core: cambridge.org/ICHE.

Please direct subscription inquiries and requests for back issues to Customer Services at Cambridge University Press, e-mail: subscriptions_newyork@cambridge.org (USA, Canada, and Mexico) or journals@cambridge.org (outside of USA, Canada, and Mexico).

Postmaster: Send address changes to *Infection Control & Hospital Epidemiology*, Cambridge University Press, One Liberty Plaza, New York, NY 10006 USA.

About the cover:

Title: *Nile's Joy, Horses & Hope, 2006*

Beginning with volume 43 (January 2022), the cover of *Infection Control & Hospital Epidemiology* (ICHE) will feature art inspired by or reflective of topics within the scope of the journal and their impact on patients, healthcare personnel and our society. These topics include healthcare-associated infections, antimicrobial resistance, and healthcare epidemiology. The intent is to feature original artwork that has been created by individuals who have a personal connection to one or more of these topics through their clinical work, research, or experience as a patient or an affected patient's family member, friend or advocate. The goal is to provide readers with a visual reminder of the human impact of the topics addressed in the journal and the importance of the work being done by those who read or contribute to ICHE and by all who are trying to make healthcare safer through the elimination of healthcare-associated infections.

For more information about the ICHE cover and how to submit artwork for consideration for a future cover, please visit the ICHE website: <https://www.cambridge.org/core/journals/infection-control-and-hospital-epidemiology/front-covers>

Artist: Nile Moss (1990-2006)

Medium: Tissue paper, stained glass technique

Nile's parents, Carole and Ty Moss, spoke to ICHE about his artwork.

What was the inspiration for this artwork? Nile began every morning with a loud announcement, "It's going to be such a great day!" At the end of the day, he would jump off the school bus and announce, "I had such a great day!" Nile's love of horses began very early in life thanks to his school's participation at a nearby therapeutic riding center. His horses brought him great joy and his faith gave him the hope and promise of a rainbow every day. This piece was inspired by the love Nile had for his horses, Tex and Clutch.

Why is this work appropriate for the cover of *Infection Control & Hospital Epidemiology*? Nile's art expression and techniques blossomed from August 2005 to April 2006 in his first high school art class. He returned home with this final creation on April 14, 2006. His life ended only days later when physicians failed to recognize the initial symptoms of sepsis caused by methicillin-resistant *Staphylococcus aureus* (MRSA) that he had acquired while receiving care in a local hospital. Nile's story represents the preventable harm that happens when people are unaware and unprepared to protect their loved ones and their patients. Patient safety begins with a robust bench of healthcare professionals, including healthcare epidemiologists, infection preventionists and antimicrobial stewards, that are given the knowledge, tools, training and support they need to do their work effectively. Our healthcare professionals deserve to feel joy and hope at the start of each new day, just as Nile did, and not doubt that their hard work saving lives is appreciated.

What is your personnel connection to the content of ICHE? When Nile died, our lives were changed forever. After researching the "why" and the "how," we decided to become a part of the solution to end preventable harm in honor of Nile. We became educated on the science of infection prevention to help inform and empower the public and educate healthcare professionals about what happens when healthcare facilities don't maintain a culture of safety and allow preventable healthcare-associated infections to occur. We celebrate his life every day by empowering the public and healthcare professionals with our story of prevention and action to end preventable healthcare harm.

Carole and Ty Moss are the founders and Executive Directors of Nile's Project, a non-profit organization founded in 2007 to end unnecessary deaths due to preventable hospital-acquired infections. Nile's Project works with survivors, families, healthcare professionals, public health officials, and other advocacy groups to increase public awareness and advocate for changes that will make the healthcare system safer. For more information, visit www.nilesproject.com.
