INTERNATIONAL GLACIOLOGICAL SOCIETY

The Society was founded in 1936 to provide a focus for individuals interested in practical and scientific aspects of snow and ice. Membership is open to all individuals who have a scientific, practical or general interest in aspects of snow and ice study.

Papers on glaciology are printed in the *Journal of Glaciology*, which is published six times a year. The Society also publishes the *Annals of Glaciology*, a peer-reviewed, thematic journal, two to four times a year. The Society's news bulletin, *ICE*, is published three times a year.

The Society sponsors symposia, meetings and workshops in many countries throughout the year.

Journal of Glaciology publishes original articles and letters concerning scientific research into any aspect of ice and snow, and interactions between ice, snow, climate and other environmental phenomena including the biosphere and permafrost. Research techniques described in the Journal include, for example, field studies, remote sensing, computer modelling and laboratory studies. Research topics include the nature of and changes in mountain glaciers and ice sheets, including former ice sheets. For example, ice cores extracted from the glaciers and ice sheets reveal detailed information on past atmospheric composition and climate, and changes in the extent and thickness of the ice sheets are also related to climate change. The physical, chemical and crystallographic properties of ice and snow are included, especially but not only as they relate to the flow of ice and to past climate. The Journal also publishes studies of sea ice, and of icebergs, along with their interactions with climate on shorter time scales, and with the ocean. Snow and avalanche research is included in the Journal, with several recent articles investigating avalanche dynamics. Snow and ice on other planets is also within the realm of the Journal of Glaciology, as are studies of atmospheric ice.

Journal of **GLACIOLOGY**

CONTENTS Vol 65 No 254 2019

- 873 **J. R. Leigh, C. R. Stokes, R. J. Carr, I. S. Evans, L. M. Andreassen, D. J. A. Evans**
Identifying and mapping very small (<0.5 km²) mountain glaciers on coarse to high-resolution imagery
- 889 **Louise Steffensen Schmidt, Christine Schott Hvidberg, Jung Rack Kim, Nanna Bjørnholt Karlsson**
Non-linear flow modelling of a Martian Lobate Debris Apron
- 900 **Sarah L. St Germain, Brian J. Moorman**
Long-term observations of supraglacial streams on an Arctic glacier
- 912 **Michael G. Baker, Richard C. Aster, Robert E. Anthony, Julien Chaput, Douglas A. Wiens, Andrew Nyblade, Peter D. Bromirski, Peter Gerstoft, Ralph A. Stephen**
Seasonal and spatial variations in the ocean-coupled ambient wavefield of the Ross Ice Shelf
- 926 **Henna-Reetta Hannula, Jouni Pulliainen**
Spectral reflectance behavior of different boreal snow types
- 940 **Xinyue Zhong, Shichang Kang, Wei Zhang, Junhua Yang, Xiaofei Li, Yulan Zhang, Yajun Liu, Pengfei Chen**
Light-absorbing impurities in snow cover across Northern Xinjiang, China
- 957 **Stephanie C. Mills, Anne M. Le Brocq, Kate Winter, Michael Smith, John Hillier, Ekaterina Ardakova, Clare M. Boston, David Sugden, John Woodward**
Testing and application of a model for snow redistribution (Snow_Blow) in the Ellsworth Mountains, Antarctica
- 971 **Marzieh Foroutan, Shawn J. Marshall, Brian Menounos**
Automatic mapping and geomorphometry extraction technique for crevasses in geodetic mass-balance calculations at Haig Glacier, Canadian Rockies
- 983 **Davide Castelletti, Dustin M. Schroeder, Elisa Mantelli, Andrew Hilger**
Layer optimized SAR processing and slope estimation in radar sounder data
- 989 **Lynn Kaluzienski, Peter Koons, Ellyn Enderlin, Gordon Hamilton, Zoe Courville, Steven Arcone**
Crevasse initiation and history within the McMurdo Shear Zone, Antarctica
- 1000 **Michael A. Imhof, Denis Cohen, Julien Seguinot, Andy Aschwanden, Martin Funk, Guillaume Jouvet**
Modelling a paleo valley glacier network using a hybrid model: an assessment with a Stokes ice flow model
- 1011 **Pinlu Cao, Qi Zhao, Zhuo Chen, Hongyu Cao, Baoyi Chen**
Orthogonal experimental research on the structural parameters of a novel drill bit used for ice core drilling with air reverse circulation
- 1023 **Soroush Rezvanbehbahani, Leigh A. Stearns, C. J. van der Veen, Gordon K. A. Oswald, Ralf Greve**
Constraining the geothermal heat flux in Greenland at regions of radar-detected basal water
- 1035 **Ji-Young Ham, Soon Do Hur, Won Sang Lee, Yeongcheol Han, Hyejung Jung, Jeonghoon Lee**
Isotopic variations of meltwater from ice by isotopic exchange between liquid water and ice
