

Certificate in Quantitative Finance

Are you ready for the next step in Mathematical Finance?

The CQF is an intensive mathematical finance program consisting of formal lectures and workshops delivering the necessary knowledge base and skills needed to succeed in the fast-paced environment of the financial markets.

The fastest-growing Quantitative Finance Program in the world. Delivered by leading practitioners and led by Dr Paul Wilmott.

Programs are designed for professionals and delivered on a part-time basis via 2.5 hour sessions.

All classroom sessions are recorded so delegates have the option of studying in their own time and repeating the classes as often as they wish – all modules are fully supported by programming workshops.

Delegates can access the course from anywhere in the world. The CQF Alumni Network represents an exclusive global community of quantitative practitioners.

If you would like to find out more about the CQF and would like to meet Paul Wilmott and his team to discuss the program in further detail, please join us at one of our Information Sessions that are regularly held throughout North America, Europe and the Far East.

To find an Information Session near where you are, visit www.7city.com/cqf or contact Geoff Brown at g.brown@7city.com

www.7city.com/cqf

STATEMENT OF OWNERSHIP, MANAGEMENT, AND CIRCULATION

The Journal of Financial and Quantitative Analysis (ISSN 0022-1090) is published quarterly (4 issues per year) by the University of Washington Michael G. Foster School of Business, a nonprofit organization located at 115 Lewis, Seattle, WA 98195-3200. The Managing Editor is Paul Malatesta, Michael G. Foster School of Business, University of Washington, 115 Lewis, Box 353200, Seattle, WA 98195-3200. There are no known bondholders, mortgagees, or other security holders owning or holding 1 percent or more of the total amount of bonds, mortgages, or other securities. The purpose, function, and nonprofit status of this organization and the exempt status for federal income tax purposes have not changed during the preceding 12 months. The annual subscription price for the Journal of Financial and Quantitative Analysis is \$160/\$180 for institutions and \$80/\$100 for individuals. During the preceding 12 months, the average number of copies printed for each issue was 2,475; the average paid circulation 2,150; the average free distribution 62; the average number of copies distributed 2,212. Corresponding figures for the last issue before filing: total number of copies printed 2,400; total paid circulation 2,169; free copies distributed 58; total distribution 2,227. Average percent paid 97%; actual percent paid 97%.

I certify that the statements made by me above are correct and complete.

Ms. Susan Huot
Business Manager, Journal of Financial and Quantitative Analysis

(This statement is for 2008.)

JFQA Style Requirements

Submit manuscripts online at www.jfqa.org. The cover page must show title, author name(s) and affiliation(s), e-mail address(es), and work phone number(s). The first page of text should include the title and a one-paragraph abstract of no more than 250 words. Manuscripts must be double-spaced on one side of the page. All sections of the paper, beginning with the introduction and ending with a conclusion or summary, must be numbered with Roman numerals. Subsection headings must be lettered A, B, C, etc.

The manuscript should explain its relation to other research in the field, especially recently published material. References cited in the text should be noted by the last name(s) of the author(s) followed by the publication year enclosed in parentheses without punctuation: Smith (1988). When a particular page, section, or equation is referred to, the reference also should be placed within parentheses: (Smith and Jones (1988), p. 222), (Green (1988a), eq. 3).

Lengthy mathematical proofs and extensive tables should be placed in an appendix or omitted from the manuscript entirely. In the latter case, the author may indicate in a footnote that proofs or tables are available on request. The author should make every effort to explain the meaning of mathematical proofs.

The author should check the manuscript for clarity, grammar, spelling, and punctuation to minimize editorial changes and the necessity of extensive corrections at the proof stage. All abbreviations must be defined.

Equations. All but very short mathematical expressions should be displayed on a separate line and centered. Important displayed equations must be identified by consecutive Arabic numerals in parentheses on the left. Expressions should be aligned and subscripts and superscripts clearly marked to avoid confusion.

Tables. Each table must be titled and numbered consecutively with Arabic numerals. Please check the text to make sure there is a reference to each table. General footnotes should be marked a, b, c, etc., for specific footnotes. Asterisks * or ** indicate significance at the 5% and 1% levels, respectively. The author should check tables to be sure that totals are correct and that the title, column headings, and footnotes clearly explain the content of the table. Place tables on separate pages at the end of the article and indicate approximate placement within the text.

Figures. Figures must be titled and numbered consecutively with Arabic numerals. Captions should present sufficient information to describe the purpose of the figure. Figures for accepted manuscripts must be of professional quality and ready for reproduction.

Footnotes. Footnotes must be double-spaced. Footnotes must not be used for the purpose of citation. Footnotes with extensive content should be avoided.

References. All works cited in the text must be alphabetically arranged in a double-spaced list at the end of the manuscript. Examples:

Brown, S., and J. Warner. "Using Daily Stock Returns: The Case of Event Studies." *Journal of Financial Economics*, 14 (1985), 1–31.

Ross, S. A. "Return Risk and Arbitrage." In *Risk and Return in Finance*, Vol. 1, I. Friend and J. L. Bicksler, eds. Cambridge, MA: Ballinger (1977).

Titman, S.; K. C. Wei; and F. Xie. "Capital Investments and Stock Returns." *Journal of Financial and Quantitative Analysis*, 39 (2004), 677–700.
