HOOVER

CHINA'S GLOBAL ROLE

John Franklin Copper

Publication 226 197 pages \$7.95 paper

China will undoubtedly exercise some, perhaps considerable, influence on the development of a new style of international politics as we evolve away from the bipolar system. This relevant analysis defines China's rank among the hierarchy of world powers by specifically assessing its ability to influence other nations and to play a role in world affairs.

Copper's study is critically relevant to the theory that a Sino-American/Japanese alliance would be an effective response to the growth of Soviet power.

SCIENCE, TECHNOLOGY AND CHINA'S DRIVE FOR MODERNIZATION

Richard P. Suttmeier

Publication 223 133 pages \$6.95 paper

China's new international posture on science and technology has as one purpose the use of resources available through international relations. How should the United States respond to China's demands for the most advanced science and technology within the context of this new foreign policy? How can the United States properly supervise the export to the People's Republic of China of its most advanced scientific knowledge? Or should it? These and other significant questions are probed in this incisive monograph.

Subscription Office

All subscriptions should be sent to the above address, marked: subscriptions.

Subscription Rates

£15 or U.S.\$30 per year, post free. Reduced rates for full-time students at £7.50 or U.S.\$15 per year. Individual copies, £3.75 or U.S.\$8.50 for current and recent issues, otherwise £4 or U.S.\$9.50. Special arrangements can be made for subscribers in areas with currency regulations and for posting by airmail.

Manuscripts

The China Quarterly welcomes the submission of manuscripts from all scholars, including research students, on all aspects of contemporary China and from all points of view, including those which deal with Taiwan and Overseas Chinese. Articles on China prior to 1949 are also welcome, particularly, but not exclusively, when these relate directly to contemporary China or to the history of the Chinese Communist Party. Articles should be submitted, in triplicate, to the editorial office. They should be typed in double spacing and, preferably, conform to the styling of *The China Quarterly*.

The China Quarterly is published by the Contemporary China Institute of the School of Oriental and African Studies, London University. The views expressed in articles are those of individual authors and do not necessarily represent the views of the Contemporary China Institute.

Rebels and Revolutionaries in North China, 1845–1945

Elizabeth J. Perry. Why do peasants rebel? In particular, why do some peasants rebel and not others? Starting from the fact that only in certain geographical areas does rebellion seem to recur persistently, the author examines three notable rebel movements in the region of Huai-pei: the Nien rebels of the 1850's and 1860's, the Red Spear Society of the Republican era, and the Communist movement of the 1930's and 1940's. The author also throws new light on the role of secret societies in peasant protest, and offers a fresh interpretation of the relationship between rebellion and revolution. \$25.00

The International Energy Relations of China

Kim Woodard. Certain to be the standard reference work on the subject, this comprehensive political and statistical analysis treats all aspects of China's energy development and foreign energy policy. Part I describes, analyzes, and projects the course of China's international energy relations from 1949 through the year 2000. Part II presents a detailed, coordinated set of energy balance statistics and nearly 100 statistical tables that give data for the resource, production, consumption, and trade stages of each energy industry, with projected statistics to the year 2000. \$50.00

The Emergence of Maoism

*Mao Tse-tung, Ch'en Po-ta, and the
Search for Chinese Theory, 1935–1945*

Raymond F. Wylie. This study investigates the political and ideological context of Mao's rise to power in the Chinese Communist Party, and in particular the development of the political ideology known as "Mao Tse-tung's thought." The author's analysis of the complex interplay of elite politics within the CCP falls into two main periods: 1935–40, when the basic ideas behind the Chinese brand of Marxism were worked out by Mao and Ch'en; and 1940–45, when the two men worked to systematize and disseminate Mao's thought as the CCP's official guiding doctrine. \$25.00
