

Mental Health Foundation

RESEARCH GRANTS

The Research Committee of the Foundation exists to foster and support research in all fields bearing on mental health, mental illness and disorders of mental development.

The Committee meets twice a year to award RESEARCH GRANTS TO PROVIDE SCIENTIFIC ASSISTANCE, EXPENSES or EQUIPMENT for research workers.

Closing Dates:

March 1st for Meeting in May

September 1st for Meeting in November

For Grant application forms and further details apply in writing to:

The Honorary Secretary,
The Research Committee,
Mental Health Foundation,
8 Hallam Street,
London W1N 6DH

Cambridge

New titles from the American Psychiatric Press Inc.
Now distributed by Cambridge University Press.

Family Violence

Edited by L. J. DICKSTEIN and
C. C. NADELSON

Based on a symposium which took place during the 1986 annual meeting of the A.P.A., this book considers all aspects of the identification, treatment, and prevention of violence within the family. Contributors include doctors, psychiatrists, social workers, lawyers and the law enforcement agencies.
£20.00 net 0 521 35715 2 271 pp. 1989
Clinical Insights Series

Current Approaches to the Prediction of Violence

Edited by D. A. BRIZER and M. L. CROWNER

This volume outlines current approaches to the prediction of violence, from neuroanatomic to psychopathologic studies. The contributors conclude that, contrary to conventional wisdom, certain types of violence *may* be predicted. Essential reading for all who deal with potentially dangerous patients.

Progress in Psychiatry Series

Anxiety

Edited by PETER P. ROY-BYRNE

Recent advances in neurobiological research have had great implications for the practising clinician. The contributors to this new book analyse these findings, paying particular attention to the 'masked' anxiety syndromes: hyperventilation, irritable bowel, and alcohol and caffeine abuse, which affect such a large proportion of the population.

Clinical Insights Series

Anxiety and Depressive Disorders in the Medical Patient

L. R. DEROGATIS and T. N. WISE

Anxiety and depression complicate the clinical picture in physical and mental illness. This book considers how to conceptualise all aspects of anxiety and depression, how to assess them, and how and when to intervene therapeutically.

£20.00 net 0 521 36417 5 272 pp. 1989
Clinical Insights Series

Brain Imaging

Applications in Psychiatry

Edited by NANCY C. ANDREASEN

This book makes modern brain imaging techniques accessible to a broad range of readers. In covering all of the major methods of brain imaging, the authors have combined a substantial amount of technical information with an approach which makes these techniques clear, accessible, and clinically informative.

Eating Behaviour in Eating Disorders

Edited by B. TIMOTHY WALSH

How does the eating behaviour of individuals suffering from anorexia nervosa, bulimia nervosa, or obesity, differ from normal patterns? The authors of this new book draw upon recent research results to examine this growing problem.

Progress in Psychiatry

Cambridge

Concise Guides from A.P.P.I.

These handy pocket size reference books cover all aspects of psychiatry and are ideal quick reference tools for both the psychiatrist-in-training and the physician dealing with emotionally or psychiatrically ill patients.

Concise Guide to Consultation Psychiatry

M. G. WISE and **J. R. RUNDELL**

Based on psychiatric consultations with patients in general hospitals, this book provides an overview of the types of problems that may be spotted during consultation. Areas covered include anxiety, depression, drug action and suicidality.

£9.95 net Pb 0 521 37817 6 183 pp. 1989

Concise Guide to Clinical Psychiatry

STEVEN L. DUBOVSKY

Steven Dubovsky provides a thorough but succinct introduction to this exciting field of psychiatry. A chapter is devoted to each major type of clinical disorder with discussion of symptoms, family histories, associated problems, the course of the illness, and current treatments.

£9.95 net Pb 0 521 37818 4 198 pp. 1989

Concise Guides to Somatic Therapies in Psychiatry

LAURENCE B. GUTTMACHER

The selection and proper administration of drugs and E.C.T. is an important issue every practitioner must face. This book describes and assesses E.C.T. and the major psychiatric drugs and provides clear guidelines for the psychiatrist to consider when using these forms of treatment.

£9.95 net Pb 0 521 37816 8 164 pp. 1989

International Classification in Psychiatry

Unity and Diversity

Edited by **JUAN E. MEZZICH** and

M. VON CRANACH

With 75% of the psychiatrically disordered population living in the Third World, a truly international overview of psychiatric diagnosis and nosology is increasingly important. This book reviews the classification schemes of a range of countries drawing them together to provide a new uniform scheme.

£35.00 net 0 521 32754 7 411 pp. 1989

The Homeless Mentally Ill

Senior editor **H. RICHARD LAMB**

This book summarises the findings of the A.P.A.'s study on the homeless mentally ill in America. Its discussion topics, including deinstitutionalisation, clinical work and the implications of biological psychiatry, will have international implications.

£22.50 net 0 521 34498 0 339 pp. 1989

Mental Health Foundation

Career Development Fellowships for Research into Mental Disorders

Applications are invited from medical and scientific graduates for a Fellowship for research training in the field of mental disorder.

These awards which are tenable for up to 3 years, are intended for clinicians with a training in psychiatry or intending to train in psychiatry, or postdoctoral scientists who wish to extend their research experience. The research proposals should be relevant to mental health or related basic science and the applicant should intend to continue research in this field. These Fellowships may be held in appropriate departments or clinical centres in Great Britain. The Trustees are prepared to consider a request that part of the Fellowship be spent in a suitable centre, or centres, abroad in cases where the necessary research training cannot all be obtained in Great Britain. Candidates are welcome to discuss their plans with the Honorary Secretary of the Research Committee.

Candidates should not normally be over 32 years of age for science graduates and 34 years for medical graduates. However, consideration will be given to those over this age where their career has been affected either by a late start or by interruption for personal/family reasons. Applications should be made jointly with the Head of the Department in which the candidate proposes to work. Salaries will be in the range of University Lecturer or NHS Registrar scales (whichever is appropriate) according to age and experience.

Application forms can be obtained by writing to

The Secretary of the Research Committee
The Mental Health Foundation
8 Hallam Street, London W1N 6DH

**APPLICATIONS MUST BE RETURNED
BY MARCH 1st.**

(Late applications will not be considered)

MONOGRAPH SUPPLEMENTS

14. Eating disorders in a general practice population. Prevalence, characteristics and follow-up at 12 to 18 months M. B. King
15. The natural history of schizophrenia: a five-year follow-up study of outcome and prediction in a representative sample of schizophrenics M. Shepherd, D. Watt, I. Falloon and N. Smeeton
16. The cardiovascular effects of antidepressants S. J. Warrington, C. Padgham and M. Lader

NOTES FOR CONTRIBUTORS

PAPERS Papers for publication should be addressed to the Editor, Professor Michael Shepherd, Institute of Psychiatry, De Crespigny Park, Denmark Hill, London SE5 8AF. Contributors should send at least three copies of the text, tables, and figures. Copies other than the first may be xeroxed. The S.I. system should be adopted for text and figures. A short synopsis of about 50 words should be provided at the beginning of each article. Foreign quotations and phrases should be followed by a translation. If necessary, guidelines for statistical presentation may be found in: Altman, D. G., Gore, S. M., Gardner, M. J. & Pocock, S. J. (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

Submission of a paper will be held to imply that it contains original work that has not been previously published and that it is not being submitted for publication elsewhere.

In addition to longer articles, the Editor is prepared to accept preliminary and brief communications of between 1500 and 2500 words.

Manuscripts must be typewritten on one side of the paper in double-spacing with wide margins throughout, including references. The following information must be given on a single separate sheet: (1) title and short title for running head (not more than 100 characters); (2) authors' names, and (3) department in which work was done. Footnotes on the same sheet should list: (i) the authors' present addresses if different from departments in which work was done; (ii) name and address of the author to whom correspondence should be addressed; (iii) receipt of grants. Authors who would like a reprint address to be printed should include this on their manuscript.

REFERENCES (1) In the text these should follow the Harvard system – that is, name followed by date: Brown (1970). If there are more than two authors the first author's name followed by *et al.* should be used, even the first time that the reference appears. (2) The list of references should be typed in alphabetical order on a separate sheet and should appear as follows: Brown, J., Williams, E. & Wright, H. (1970). Treatment of heroin addiction. *Psychological Medicine* **1**, 134–136. Journal titles should be given in full.

Books should be cited as follows: Brown, J. (1970). *Psychiatric Research*. Smith: Glasgow.

Articles from edited books should be cited as follows: Brown, G. W. (1974). Meaning, measurement and stress of life events. In *Stressful Life Events: Their Nature and Effects* (ed. B. S. Dohrenwend and B. P. Dohrenwend), pp. 217–244. John Wiley: New York.

ILLUSTRATIONS Only essential figures and tables should be included. *Photographs* Unmounted photographs on glossy paper should be provided. Magnification scales, if necessary, should be lettered on these. Where possible, prints should be trimmed to column width (i.e. 70 mm). *Diagrams* These will usually be reduced to 70 mm wide. Lettering should be in either Letraset or stencil, and care should be taken that lettering and symbols are of comparable size. Illustrations should not be inserted in the text, they should be marked on the back with figure numbers, title of paper, and name of author. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in the text in Arabic numerals. The legends for illustrations should be typed on a separate sheet. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet.

PROOFS AND OFFPRINTS Page proofs will be sent to the senior author. Corrections other than printer's errors may be charged to the author. Fifty offprints of each paper are supplied free; additional offprints are available according to a scale of charges if they are ordered when the proof is returned.

Psychological Medicine

Volume 19 Number 4 November 1989

CONTENTS

Editorials

- Gene expression and mental disease P. J. HARRISON & R. C. A. PEARSON 813
- Chronic Post-Traumatic Stress Disorder: implications of recent epidemiological and neuropsychological studies L. C. KOLB 821
