CAMBRIDGE JOURNALS

JFM ARCHIVE

Journal of Fluid Mechanics
Digital Archive
1956–1996

Vital research from the definitive source

The JFM Digital Archive contains every article from the first 40 years of the journal, scanned and digitised to the highest standards.

Please speak to your librarian about gaining access.

CAMBRIDGE JOURNALS

JFM FAST TRACK HAS EVOLVED

JFM RAPIDS

- Faster publication
- Greater visibility for papers
- Freely available to all for the first year

For more information visit

JFM Rapids (online only)

R1 Transition near the edge of a rotating disk
B. Pier

R2 A swirling spiral wave solution in pipe flow
K. Deguchi & A. G. Walton

S R3 Counter-gradient heat transport in two-dimensional turbulent Rayleigh–Bénard convection
Y.-X. Huang & Q. Zhou

R4 Elastically induced turbulence in Taylor–Couette flow: direct numerical simulation and mechanistic insight
N. Liu & B. Khomami

S indicates supplementary data or movies available online.

https://doi.org/10.1017/jfm.2013.631 Published online by Cambridge University Press

737 ISSN 0022-1120
Journal of Fluid Mechanics 25 December 2013

1 Local effects of gravity on foams
M. J. Davis, P. S. Stewart & S. H. Davis

19 High-speed laminar flow past a fin–body junction
O. R. Tutty, G. T. Roberts & P. H. Schuricht

56 The Boussinesq approximation in rapidly rotating flows
J. M. Lopez, F. Marques & M. Avila

78 Optimal vortex formation in a self-propelled vehicle
R. W. Whittlesey & J. O. Dabiri

105 Receptivity of a supersonic boundary layer to solid particulates
A. V. Fedorov

132 Splash jet generated by collision of two liquid wedges
Y. A. Semenov, G. X. Wu & J. M. Oliver

146 Steady one-dimensional nozzle flow solutions of liquid–gas mixtures
S. LeMartelot, R. Saurel & O. Le Métayer

S 176 A description of turbulent wall-flow vorticity consistent with mean dynamics
J. C. Klewicki

205 Stability of columnar convection in a porous medium
D. R. Hewitt, J. A. Neufeld & J. R. Lister

232 The velocity of 'large' viscous drops falling on a coated vertical fibre
L. Yu & J. Hinch

249 Linear stability analysis of channel flow of viscoelastic Oldroyd-B and FENE-P fluids
M. Zhang, I. Lashgari, T. A. Zaki & L. Brandt

280 On the active feedback control of a swirling flow in a finite-length pipe
S. Wang, Z. Rusak, S. Taylor & R. Gong

308 Nematic–isotropic phase transition in turbulent thermal convection
S. Weiss & G. Ahlers

329 On the k_1^{-1} scaling in sink-flow turbulent boundary layers
S. A. Dixit & O. N. Ramesh

349 Linearized no-slip boundary conditions at a rough surface
P. Luchini

368 A linearized model of water exit
A. A. Korobkin

387 On the longitudinal optimal perturbations to inviscid plane shear flow: formal solution and asymptotic approximation
C. Arratia & J.-M. Chomaz

412 Precession-driven flows in non-axisymmetric ellipsoids
J. Noir & D. Cébron

440 Nonlinear control of unsteady finite-amplitude perturbations in the Blasius boundary-layer flow
S. Cherubini, J.-C. Robinet & P. De Palma

466 Organized large structure in the post-transition mixing layer. Part 1. Experimental evidence
A. D'Ovidio & C. M. Coats

499 Linear stability analysis of wind turbine wakes performed on wind tunnel measurements
G. V. Iungo, F. Viola, S. Camarri, F. Porté-Agel & F. Gallaire

527 Effects of fluctuating energy input on the small scales in turbulence
C.-C. Chien, D. B. Blum & G. A. Voth

552 A trajectory equation for walking droplets: hydrodynamic pilot-wave theory
A. U. Oza, R. R. Rosales & J. W. M. Bush

571 Orientation dynamics of small, triaxial–ellipsoidal particles in isotropic turbulence
L. Chevillard & C. Meneveau
