

## **The Lowland Maya Postclassic**

Edited by Arlen F. Chase and Prudence M. Rice

"A turning point in the study of an area and a time that are crucial to our knowledge of the Maya before and during the conquest."

—George Stuart, National Geographic Society

Through archaeological investigation and analysis as well as evaluation of ethnohistoric data, this volume presents an entirely updated picture of Postclassic Maya civilization in the Southern Lowlands. \$27.50 hardcover

## **Late Pleistocene Vertebrate Paleoecology of the West**

By Arthur H. Harris

Important for archaeologists, this book examines the relationships between organisms and their environments during the Pleistocene Epoch in a region ranging from the Great Plains of North America to the Pacific Ocean and from southern Canada to northern Mexico. It presents the first comprehensive, testable hypothesis concerning Late Pleistocene patterns of biotic distribution and their proximal causes in western North America. \$25.00 hardcover

Two New Volumes in the *STUDIES IN ARCHAEOLOGY Series*

## Guilá Naquitz Archaic Foraging and Early Agriculture in Oaxaca, Mexico

Edited by **KENT V. FLANNERY**

From the Preface: This is the report of an interdisciplinary study of the origins of agriculture in the southern Mexican highlands. It begins in the preagricultural era and ends with the earliest evidence for cultivated plants in the eastern Valley of Oaxaca. The disciplines employed include archaeology, botany, zoology, palynology, and computer modeling.

Contents (Section Headings): The Problem and the Model. The Cultural and Environmental Setting. Excavation and Artifact Analysis. Comparing the Archaic and Modern Environments. Analysis of Subsistence. Spatial Analysis of Living Floors. Simulating Foraging and Early Agriculture in Oaxaca. Summary and Conclusions.

September 1985, c. 533 pp., in preparation/ISBN: 0-12-259830-X  
Pre-publication price: \$55.00\* Regular price: \$95.00 (tentative)

## The Upper Paleolithic of the Central Russian Plain

**OLGA SOFFER**

This is an ecological study of the hunter-gatherers who lived on the Central Russian plain 26,000 to 12,000 years ago. Soffer reviews the extensive Russian language literature, summarizes the biological, geological, geographical, and archaeological data from 29 major sites, and then draws on evolutionary theory, cultural ecology, and historical materialism to interpret her own fieldwork and generate a new model of human ecology in the Late Pleistocene.

Contents: Introduction. Upper Paleolithic Sites on the Central Russian Plain. The Environmental Given. Chronology and Land Use. Subsistence Practices and Duration of Occupation in Late Valdai. Site Types and the Settlement System. Socio-Political Integration on the Upper Paleolithic Central Russian Plain. Conclusions and Implications. References. Index.

October 1985, c. 635 pp., in preparation/ISBN: 0-12-654270-8  
Pre-publication price: \$65.00\* Regular price: \$98.50 (tentative)

# Reading the Isotopic Clocks.

**Y**our research in age determination and stable isotopes requires reliable data and custom service. Teledyne Isotopes has the expertise and experience to meet these requirements.

We have been pioneers in the industry since 1955 and are the only commercial laboratory that offers all major age determination techniques.

**These include:**

**Radiocarbon**

**Stable isotopes:**  $^{13}\text{C}/^{12}\text{C}$  •  $^{18}\text{O}/^{16}\text{O}$  • H/D  
K/Ar • Rb/Sr • U/Pb • Pb/Pb

We can assure you of reliable data because of well-staffed and well-equipped labs, intercalibration with major universities and government facilities, and through use of N.B.S. and international standards.

For the most reliable reading of the isotopic clocks, come to the experts.

**DISTINGUISHED SERVICE AWARD NOMINATIONS SOLICITED**

The Distinguished Service Award established by the Society for American Archaeology is presented annually to a member for specific accomplishments of extraordinary quality. Recognition can be granted in a wide range of areas relating to archaeology including, for example, teaching (academic as well as public education), research (theory, method, application of new technology, analysis, etc.), and conservation of archaeological data (curatorial, legal, managerial), as long as two basic criteria are met. First, the contribution must be truly extraordinary in nature (not expected in the normal course of events) and must be widely recognized as such, and second, it must be of a positive and lasting quality.

The Society is accepting nominations from members for the 1986 Award, which will be presented at its Annual Meeting in April 1986, in New Orleans, LA. Each recommendation should be supported by a statement documenting concisely and thoroughly the achievements of the nominee. Mail by November 11, 1985, to Dr. George C. Frison, Chair, DSA Committee, Department of Anthropology, University of Wyoming, Box 3431, University Station, Laramie, WY 82070.
