THE JOURNAL
OF THE
American Society of Agronomy

ISSUED ON THE 15th OF EACH MONTH AT GENEVA, N.Y., U.S.A.

Object:

*The increase and dissemination of knowledge concerning soils
and crops and the conditions affecting them.*

A Journal now in its 25th year devoted to new material of interest to investigators and teachers in the fields of crop production and soil science. It contains papers reporting on original researches by soil and crop chemists, plant physiologists, botanists, geneticists, phytopathologists, soil microbiologists, and others. Also notes on technic, book reviews, and timely items of agronomic interest.

Each volume of twelve numbers contains approximately a thousand pages, with a subject and author index; also the proceedings of the annual meeting of the American Society of Agronomy.

Author and subject index to Vols. 1 to 20, inclusive, available at 50 cents per copy. Many back numbers of the Journal still obtainable.

Subscription price \$5.00 per volume (12 numbers)
anywhere in the world.

THE CALCULATION & INTERPRETATION OF ANALYSIS OF VARIANCE AND COVARIANCE

By GEORGE W. SNEDECOR

Professor of Mathematics and Director of Statistical Laboratory, Iowa State College

105 pages, $5\frac{1}{4}'' \times 7\frac{1}{2}''$, \$1.00, *postpaid*

This is a systematic treatment of the many forms of analysis of variance now in use, written primarily for the research worker who has no extensive knowledge of the subject. The treatment begins with the simplest case and progresses to the more intricate forms of analysis of covariance.

Detailed methods are given for calculating ten different types, together with the experimental design under which each can be used. These methods are illustrated by problems drawn from current research data in zoology, animal nutrition, horticulture, botany, education, agronomy, genetics, cooking and economics.

There are adequate and specific references to recent works on theory and application for those who wish to continue the study.

The methods of isolating valid estimates of experimental error are emphasized.
