

## INFORMATION FOR AUTHORS

The Bulletin of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. To ensure speedy publication, only articles which are sufficiently well presented, able to be published without revision, and which are judged by the Editor (often in consultation with an Associate Editor) to be competitive are refereed. This policy is in the interests of authors, as a quick rejection is better than a slow rejection. The Bulletin receives more than five times the material that can be published, therefore there are many commendable papers not accepted. Editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after peer review.

Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere. For a paper to be acceptable for publication, not only should it contain new and interesting results, but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Further information regarding these requirements may be found through our website [www.austms.org.au/Bulletin](http://www.austms.org.au/Bulletin). Authors are asked to avoid, as far as possible, the use of mathematical symbols in the title.

Articles should be prepared in  $\text{\LaTeX}$  using  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{\LaTeX}$  packages and submitted as a PDF file via our journal management system, at [www.austms.org.au/Publications/Submissions/BAustMS](http://www.austms.org.au/Publications/Submissions/BAustMS). This permits authors to track their papers through the editorial process. Recent versions of  $\text{\TeX}$  are able to produce PDF files directly. A  $\text{\LaTeX}$  class file for the Bulletin can be downloaded from the website. Authors who need assistance may email the secretary of the Bulletin at [jams@ms.unimelb.edu.au](mailto:jams@ms.unimelb.edu.au).

Authors are advised to keep copies of all files of the submitted article; the Bulletin will not accept responsibility for any loss.

## EDITORIAL POLICY

**1. References.** Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are in preparation or submitted. Where the work cited is not readily accessible (for example, a preprint) a copy of the article should be included with your submission.

### 2. Abstracts.

1. Each paper must include an abstract of not more than 150 words, which should contain a brief but informative summary of the contents of the paper, but no inessential details.
2. The abstract should be self-contained, but may refer to the title.
3. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

**3. Subject Classification and Key Words.** Authors should include a few key words and phrases and one or more classification numbers, following the American Mathematical Society 2000 Mathematics Subject Classification. Details of this scheme can be found on the web at [www.ams.org/msc](http://www.ams.org/msc).

**4. Abstracts of Ph.D. Theses.** The Bulletin endeavours to publish abstracts of all accepted Australasian Ph.D. theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within six months of the degree being approved.

**Mixed Sources**  
Product group from well-managed  
forests and other controlled sources

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.

## Table of Contents

---

<b>Limit sets and commensurability of Kleinian groups</b> <i>Yang, W.-Y. &amp; Jiang, Y.-P.</i>	1
<b>Asymptotic properties of Kolmogorov widths</b> <i>Ostrovskii, M. I.</i>	10
<b>Approximate weak amenability of <math>I_0(\mathrm{SL}(2, \mathbb{R}))</math></b> <i>Bharucha, P.</i>	18
<b>Nonexpansive mappings and expansive mappings on the unit spheres of some <math>F</math>-spaces</b> <i>Tan, D.-N.</i>	22
<b>A remark on the strong law for <math>B</math>-valued arrays of random elements</b> <i>Hu, T.-C., Chen, P. Y. &amp; Weber, N. C.</i>	31
<b>Superadditivity of some functionals associated with Jensen's inequality for convex functions on linear spaces with applications</b> <i>Dragomir, S. S.</i>	44
<b>Families of fractional Fantappiè transforms</b> <i>Doubtsov, E.</i>	62
<b>Solution to a question on a family of imprimitive symmetric graphs</b> <i>Xu, G. &amp; Zhou, S.</i>	79
<b>On finite <math>p</math>-groups with subgroups of breadth 1</b> <i>Cutolo, G., Smith, H. &amp; Wiegold, J.</i>	84
<b>Modules with abelian endomorphism rings</b> <i>Călugăreanu, G. &amp; Schultz, P.</i>	99
<b>On prime-like radicals</b> <i>Tumurbat, S. &amp; France-Jackson, H.</i>	113
<b>Periodic 2-graphs arising from subshifts</b> <i>Pask, D., Raeburn, I. &amp; Weaver, N. A.</i>	120
<b>Existence of resolvent for Volterra integral equations on time scales</b> <i>Adıvar, M. &amp; Raffoul, Y. N.</i>	139
<b>Generalized inverses of a sum in rings</b> <i>Castro-González, N., Mendes-Araújo, C. &amp; Patricio P.</i>	156
<b>Abstracts of Australasian PhD theses</b>	
<b>Some mathematical models arising in nano- and bio-technology</b> <i>Chan, Y.</i>	165
<b>On the number of Latin rectangles</b> <i>Stones, D. S.</i>	167
<b>Optimal designs for two-colour microarray experiments</b> <i>Sanchez, P. S.</i>	171
<b>Increasing power of M-test through pre-testing</b> <i>Yunus, R. M.</i>	173
<b>The design of efficient stated choice experiments</b> <i>Bush, S.</i>	175
