## A Mediterranean island holiday

Sun Alonissos offers cheap but excellent accommodation on the unspoilt Greek island of Alonissos in the Northern Sporades. One of the organisers is married to a Greek fisherman in the co-operative that is helping to protect the Mediterranean monk seals. In 1981 ffPS ran an appeal to help save these highly endangered seals and members generously contributed £7900, part of which was used to buy a freezer for the co-operative. For details of Sun Alonissos please write to the Executive Secretary at ffPS.

These two stickers are part of a set produced by the Society for the Study and Conservation of Nature in Malta as part of their campaign to conserve the Maltese flora. In the past 50 years 100 species have become extinct in the islands. ffPS grant-aided this project to the extent of £700. A limited number of the stickers are available from the ffPS office, free—but please send an SAE.
