

Aerospace

The following is a list of main papers published in Aerospace during the past year:

DECEMBER 1975

- British Air Transport Policy—a review of the
Civil Aviation Review
Sir David Nicolson
- Aeronautics at Cayley's Second Century
J. E. Allen, FRAeS
- RAE tanker trials
J. A. Bagley, MRAeS
- Aerospace talks to Gordon Wansbrough-White

JANUARY 1976

- Engineering and maintenance preparations
for TriStar
E. Gregory, FRAeS
- Commercial flying on the North Atlantic
from infancy to maturity
Captain J. C. Kelly-Rogers, FRAeS
- Aerospace talks to Tom Pike

FEBRUARY 1976

- The technology and economics of air transport
in its next phase
K. G. Wilkinson, FRAeS
- The Pathfinder Force
Air Vice-Marshal D. C. T. Bennett
- Aerospace talks to Chris Wren

MARCH 1976

- Flying the YF-16
Neil R. Anderson
- The Military Aircraft Scene
B. P. Laight, FRAeS
- Aerospace talks to Sir David Nicolson

APRIL 1976

- Europe's Tornado
R. P. Beamont
- Powerplant for Tornado
J. C. Allan
- BAC's Military Aircraft Division
Canberra
- Aerospace talks to Freddie Page

MAY/JUNE 1976

- Hanover preview
- The Annual Report of Council 1975
European Space Agency
D. Cavanagh

JULY/AUGUST 1976

- Test flying the VFW 614—
Airframe Development
L. Nielsen
- M45H Turbofan Development
J. T. S. Lewis
- European Space Agency (Part 2)
D. Cavanagh
- Aerospace talks to Russell Meyer

SEPTEMBER 1976

- Martel—an air-to-surface guided weapon
Air Cdre. P. E. Bairsto, RAF
- Engineering—art and science
Professor L. F. Crabtree
- Aerospace talks to Sir Stanley Hooker

OCTOBER 1976

- Unassailable aerodynamical logic (Part 1)
G. H. Lee
- The Wet Lease Airline
Paul Bray

NOVEMBER 1976

- Organisation of the collaborative programme
for the A.300 Airbus
R. Beteille
- Unassailable aerodynamical logic (Part 2)
G. H. Lee

DECEMBER 1976

- Recent Canadian technical developments in STOL
D. C. Whittley
- Perring—the Man
Sir Morien Morgan
- Aerospace talks to Dick Stratton
- Index to Vol. 3

Copies of Aerospace, price 50p each (\$1.20) may be obtained from The Royal Aeronautical Society, 4 Hamilton Place, London W1V 0BQ.

Conference Proceedings

The following proceedings from symposia organised by the Society are available. Should they become out-of-print they may be photo-copied by the Society at cost.

1. Symposium on Optimisation in Aircraft Design. 15th November 1972. Price £2.25.
2. RAeS/IEE Symposium on Electro-magnetic Interference in Aircraft. 15th February 1973. Price £2.25.
3. Management Studies Group Symposium on Problems and Opportunities for Aerospace and Allied Technology. 7th March 1973. Price £2.00.
4. Symposium on Flight Deck Environment and Pilot Workload. 15th March 1973. Price £3.00.
5. Second Flight Simulation Symposium. 16th/17th March 1973. Price £5.00.
6. 13th Anglo-American Aeronautical Conference in London. June 1973. Price £8.00.
7. Air Transport Group Symposium on Air Transport in Europe. 16th January 1974. Price £2.75.
8. RAeS/IEE Symposium on The Application of Electrical Control to Aircraft Propulsion Systems. 20th/21st February 1974. Price £5.00.
9. 2nd International Symposium on Air Breathing Engines in Sheffield. 24th–29th March 1974. Price £12.00.
10. 1974 Spring Convention. A Review of Precious Resources and Their Effect on Air Transport. 15th/16th May 1974. Price £5.00.
11. RAeS/IEE Symposium on The Application of Digital Avionic Systems in Aircraft. 12th December 1974. Price £4.25.
12. Symposium on Designing from the Inside Out. 6th February 1975. Price £3.25.
13. Man Powered Aircraft Group Symposium. 10th February 1975. Price £3.10.
14. Air Transport Group Symposium on The Changing Balance of Design Requirements and How Designers are Reacting to it. 26th February 1975. Price £3.25.
15. 8th International Aerospace Instrumentation Symposium at Cranfield. 24th–27th March 1975. Price £13.00.
16. Lightning and Static Electricity Conference at Culham. 14th–17th April 1975. Price £15.00.
17. Symposium on The Impact of Economics on the Design and Operation of Quieter Aircraft. 23rd/24th April 1975. Price £4.25.
18. 1975 Spring Convention. The Customer and the Surface Phase of Air Transport. 14th/15th May 1975. Price £7.50.
19. Symposium on the Future of the Airship: A Technical Appraisal. 20th November 1975. Price £4.50.
20. Astronautics and Guided Flight Section on Remotely Piloted Vehicles. 27th January 1976. Price £4.50.
21. Agricultural Aviation Group Symposium on Aircraft for Use in Specialised Operations Worldwide (Agriculture, Fisheries, Forestry and Resources Management). 4th February 1976. (Limited quantity only.) Price £3.50.
22. Symposium on Co-operation in European Air Transport. 25th February 1976. Price £4.50.
23. Management Studies Group Symposium on Future Developments in the Organisation and Management of Design. 11th March 1976. Price £4.50.
24. RAeS/IEE Symposium on Equipment and Systems Design for Minimum Cost of Ownership. 16th March 1976. Price £3.50.
25. Symposium on The Presentation of Information to Pilots. 18th March 1976. Price £3.50.
26. Third Flight Simulation Symposium. 8th April 1976. Price £4.50.
27. 1976 Spring Convention. Seeds for Success in Civil Aircraft Design in the Next Two Decades. 19th/20th May 1976. Price £8.50.

The prices quoted for the proceedings include postage (by surface mail). Air mail postage is charged extra. For further information please contact the Deputy Secretary at the Society.

Between the sketch and the successful design— you need ESDU Data Items

Design engineers need accurate, reliable information on which to base their designs and specifications. But much of the information available in essential areas is conflicting. Values for vital parameters such as pressure drops or stress concentrations in one source often differ widely from those in another.

Unless you choose the *best* values, you risk over-specifying materials and dimensions, with consequent cost penalties. Or you may under-specify, which could lead to unscheduled stoppages and breakdowns.

Engineering Sciences Data Unit can help you get things right, first time.

ESDU produces thoroughly evaluated and authoritative engineering design data in

aeronautical, chemical, mechanical and structural engineering.

Committees of practising engineers and scientists monitor and guide qualified ESDU staff who sift and evaluate all the available data on each topic. Sometimes hundreds of separate references are involved.

ESDU issues the results of this work as Data Items in which information is presented in a way best suited to the engineer. Graphs, tables, flow charts, equations and presentation in both British and SI units are all combined to help you to get your design and specifications drawn up precisely and accurately.

ESDU's work is sponsored by the Institutions of Chemical, Mechanical and Structural Engineers and by the Royal Aeronautical Society.

Users of ESDU Data Items may become Associates of ESDU. As an

Associate, you would be entitled to a range of valuable services. If you want to know more about ESDU and the wide range of data always available, contact us for full details.

DECCA AVIONICS

Decca Aviation Electronics – the choice of an ever growing number of users.

Decca Doppler Navigation Systems have been installed in 75 different types of rotary and fixed wing aircraft and supplied to 35 different countries.

The TANS Computer/Display is in service in a number of countries and has been ordered by the British Ministry of Defence for a number of aircraft programmes.

The Decca Navigator is used by the Royal Air Force, British

Airways and in a wide variety of fixed and rotary wing civil and military aircraft throughout the world.

Decca Loran is used by the RAF, the USAF and the US Coast Guard.

The MONA area navigation system, certified by the CAA and FAA in the Lockheed TriStar, is now in widespread airline service.

Decca provides a range of airborne VHF Nav/Comm and DME equipment, ordered in quantity by the M.O.D.

Ground equipment includes a CAA approved NDB, ILS and a Doppler/VOR Beacon recently awarded a contract by the Portuguese Directorate General of Civil Aviation. The AN/TRN-26 portable TACAN has been chosen by the Ministry of Defence (RAF).

The Decca range of equipment includes electronic warfare systems, ASMI, radio communications and Omega.

Throughout the world, Aviation relies on Decca for safety and reliability in navigation.
