

# Subject Index to Volume 32

## A

Aging pathology, 17  
Anthropometry, 17  
Ascertainment, 37, 49

## B

Bed rest, 251  
Behavioral development, 1  
Blood pressure, 17

## C

C-bands, 257  
Child development, 251  
Chromosome variability, 257  
Chronogenetics, 17  
Cigarette smoking, 239  
Concordance rate, 49  
Congenital malformations, 31  
Conjoined twins, 239  
Covariance structure analysis,  
163  
Cross circulation, 239

## D

Densitometric analysis of chromosomes, 257  
Dental caries, 17  
Dermatoglyphics, 163  
Developmental genetics, 1  
Dietary intake, 261  
Dominance, 229

## E

Ecology, 17  
Environment, 17  
Evolution, 1

## F

Finger ridge counts, 163

## H

Half-sib model, 163  
Heritability, 23, 229  
Heterochromatin, 257

## I

Ibeji, 221  
Infanticide, 221

## M

Magic powers of twins, 221  
Monochorionic placentation, 31  
Monozygotic twins, 163, 245  
Multiple pregnancy, 251  
Multivariate trait, 163  
Monozygotic pairs, 31

## N

Neonatal behavior, 209  
Neurobiology, 1  
Neurofibromatosis, 245

**316 Subject Index**

Newborn twins, 209  
Nicotine, 239  
Nigeria, 261  
Nutritional status, 261

**P**

Path analysis, 23  
Preterm behavior, 209  
Proband concordance rate, 37

**Q**

Quantitative genetics, 23

**S**

Saliva, 239  
Separated twins, 17  
Serum components, 23  
Socioeconomic factors, 251

Statistical model, 49  
Substance exposure, 17

**T**

Triplets, 251

**Twin**

assessment, 209  
concordance, 209  
cult, 209  
methods, 221  
Twins, 1, 31, 229, 261  
Twin study methodology, 37

**V**

v. Recklinghausen disease, 245

**Y**

Yoruba, 221
