Vol. LXVI. No. 3

The Journal of Laryngology and Otology

EDITED BY

WALTER HOWARTH

ASSISTANT EDITOR

R. SCOTT STEVENSON

WITH THE COLLABORATION OF

G. H. BATEMAN V. E. NEGUS R. G. MACBETH

Contents

- DYSPHAGIA LUSORIA: WITH A RECORD OF THREE
CASES N. ASHERSON
- THE ORIGIN AND TREATMENT OF MALIGNANT DISEASE
OF THE UPPER JAW AND NASAL SINUSES A. J. MOFFETT
- PENICILLIN, AUREOMYCIN AND CHLORAMPHENICOL IN
THE TREATMENT OF ACUTE OTITIS MEDIA ROLAND S. LEWIS,
J. D. GRAY, and
A. B. HEWLETT
- THE PERIPHERAL EXTRINSIC AND THE CENTRAL
INTRINSIC EQUILIBRIUM OF THE VESTIBULAR
ORGAN E. WODAK
- CLINICAL RECORD—
A CASE OF GUMMA OF THE LARYNX H. J. M. STRATTON
- GENERAL NOTES

The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

WALTER HOWARTH

ASSISTANT EDITOR

R. SCOTT STEVENSON

WITH THE COLLABORATION OF

G. H. BATEMAN V. E. NEGUS R. G. MACBETH

1. Original Articles are accepted on the condition that they have not been published elsewhere.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.

The Harvard system of recording references should be used, e.g. GREEN, C., and BROWN, D. (1951) *J. Laryng. and Otol.*, 65, 33.

It is most important that authors should verify *personally* the accuracy of every reference before submitting a paper for publication.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked, and no additional matter added.

4. Blocks illustrating articles are normally paid for by the *Journal*. Authors may, however, be required at the Editor's discretion, to contribute towards the cost of these in cases where this is particularly heavy.

5. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied.

6. Authors of original communications on Oto-Laryngology in other journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.

7. Editorial communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS LTD, 109 Kingsway London WC 2.

8. The annual subscription is three guineas sterling, post free, and is payable in advance.

9. Single copies will be on sale at 7s. 6d. each; copies of parts up to Vol. LXIII may be purchased at 4s. each.

10. All subscriptions, advertising and business communications should be sent to the publishers, HEADLEY BROTHERS LTD, 109 Kingsway London WC 2.

United States of America

Orders for this *Journal* may be sent either through a local bookseller, or to Messrs. G. E. STEGHERT & Co., 31-33 East 10th Street, New York, or they may be sent direct to the publishers, HEADLEY BROTHERS LTD, 109 Kingsway London WC2, England.

ENDOSCOPIC INSTRUMENTS

as designed for V. E. NEGUS, M.S., F.R.C.S.

In Para-nasal infections
ARGYROL provides
**physiological
 action without
 CNS stimulation
 or rebound congestion**

● A return to normal function by the decongestive, demulcent and bacteriostatic actions of ARGYROL is achieved without the side effects and rebound so frequent with many vasoconstrictors. In the solution of para-nasal problems, the ultimate advantages of using ARGYROL are readily apparent.

The ARGYROL Technique

1. The nasal meatus . . . by 20 per cent ARGYROL instillations through the nasolacrimal duct.
2. The nasal passages . . . with 10 per cent ARGYROL solution in drops.
3. The nasal cavities . . . with 10 per cent ARGYROL by nasal tamponage.

Its Three-fold Effect

1. Decongests without irritation to the membrane and without ciliary injury.
2. Definitely bacteriostatic, yet non-toxic to tissue.
3. Stimulates secretion and cleanses, thereby enhancing Nature's own first line of defence.

There is no
 chemical substitute for
ARGYROL

Argyrol can be prescribed
 on N.H.S. form E.C.10

Decongestion and Relief without Rebound ● Decongestion without Dysfunction
 —the medication of choice in treating para-nasal infection.

* Argyrol is a registered trade mark, the property of the makers

PRESCRIBE THE EASY EFFECTIVE METHOD

When spraying, the patient can hold his head in a natural position, yet the solution spreads throughout the nasal cavity, assuring thorough treatment. Effective dropper-application, on the other hand, requires a complicated posture technique which patients are apt to neglect in home treatment.

**DeVilbiss
ATOMIZERS**

DROPPER ?

ATOMIZER?

These illustrations, which are based on X-ray research, clearly demonstrate the advantages of the atomizer as compared with the dropper

Announcing
**A NEW SERIES OF
AUDIOMETERS**

combining the advantages of continuous frequency and fixed frequency instruments.

They incorporate for the first time in Audiometry a continuous pure tone frequency from 0 to 12,000 cycles per second with a single threshold reference level for all air and bone conduction readings.

Readings at all frequencies in the range are accurate to $1\frac{1}{2}$ decibels.

The attenuation is entirely silent and gives attenuator readings to $2\frac{1}{2}$ decibels or less.

White noise masking is included as standard and there is high fidelity voice reproduction with special facilities for speech Audiometry.

In established nasal infections

'PENDEX' *provides*

**prompt and
prolonged
vasoconstriction**

plus

**the potent
bacteriostasis
of penicillin**

Penicillin (unlike the sulphonamides) is not inhibited by the presence of pus, and has proved highly effective both in acute sinusitis and in flare-ups of chronic sinusitis.

'Pendex'—providing the bacteriostatic action of penicillin, plus the aeration and drainage effected by 'Paredrinex'—has proved particularly useful in such conditions. 'Pendex' can be used to irrigate the sinuses, followed by the displacement technique; or it may be administered by tampon.

PENDEX

*—the penicillin-vasoconstrictor for intranasal use
Available in 15 ml. (½-oz.) bottles, on prescription only*

MENLEY & JAMES, LIMITED, COLDHARBOUR LANE, LONDON, S.E.5
