

PROCEEDINGS

of the

GLASGOW MATHEMATICAL ASSOCIATION

Published with the assistance of the University Court of the University of Glasgow

VOLUME III

DECEMBER 1956

PART I

CONTENTS

The structure of normal inverse semigroups : G. B. PRESTON	page 1
On the closed graph theorem : ALEX. P. ROBERTSON and WENDY ROBERTSON	page 9
On a conjecture of Hanna Neumann : B. H. NEUMANN	page 13
On semi-special permutations I : K. R. YACOUB	page 18
On recurrence formulae : T. M. MACROBERT	page 36
Remarks on the upper central series of a group : D. H. MCLAIN	page 38
Solution of the word problem for certain types of groups I J. L. BRITTON	page 45
A note on integer solutions of the diophantine equation $x^2 - dy^2 = 1$: JOHN HUNTER	page 55

OLIVER AND BOYD

EDINBURGH : TWEEDDALE COURT

LONDON : 39A WELBECK STREET, W. 1

PROCEEDINGS OF THE GLASGOW MATHEMATICAL ASSOCIATION

THE *Proceedings* are published in Parts and issued twice yearly. Four Parts complete a Volume of approximately 200 pages, and the Title Pages and Index are published in Part 4 of each Volume.

The prepaid subscription for each Volume is Forty Shillings (U.S.A. \$6.00), post free. Single Parts may be supplied at a cost of Ten Shillings and Six Pence each (U.S.A. \$1.50) post free.

Copies may be ordered direct from the publishers or from any bookseller.

Information for Contributors

While the *Proceedings* are intended primarily for Pure Mathematics, papers on Applied Mathematics will also be accepted. Manuscripts from all parts of the world will be welcomed and given careful consideration.

Manuscripts should be prepared so as to conform with the practice in current Numbers of the *Proceedings*, especially with regard to line illustrations, references, tables, and summaries. The name of the author and the date of the receipt of the manuscript will be printed under the title. Text figures must be suitable for line block reproduction, lettered in pencil, numbered, and separated from the text but allocated clearly to sections of the text.

References should be placed at the end of the paper, arranged and numbered according to the order of reference. In the text, reference numbers should be enclosed in square brackets and underlined, to distinguish them from formula numbers, which should be quoted in round brackets. The following particulars should be given, in the order indicated :

for references to books—*author, title, edition, place of publication, year of publication, page reference* ;

for references to articles in periodicals—*author, title of article, short title of periodical, series no. (if any), volume no., year, pagination.*

A proof is supplied once in galley form, together with an Order Form for offprints. Offprints are supplied free to the number of twenty-five ; additional copies, if ordered prior to publication, will be supplied, at cost, at the request of the contributor. Excessive corrections may be charged to the author.

Manuscripts should be sent to :

CONTENTS

	PAGE
Atkinson, F. V. Asymptotic formulae for linear oscillations	105
Bell, M. A note on Mathieu functions	132
Britton, J. L. Solution of the word problem for certain types of groups I .	45
Britton, J. L. Solution of the word problem for certain types of groups II	68
Carlitz, L. A formula of Bateman	99
Erdős, P. On the growth of the cyclotomic polynomial in the interval $(0, 1)$.	102
Everitt, W. N. A note on positive definite matrices	173
Fulton, J., and Sneddon, I. N. The dynamical stresses produced in a thick plate by the action of surface forces	153
Glatfeld, Martin. On strong Rieszian summability	123
Hunter J. A note on integer solutions of the diophantine equation $x^2 - dy^2 = 1$	55
Hunter, J. The minimum discriminants of quintic fields	57
McLain, D. H. Remarks on the upper central series of a group	38
MacRobert, T. M. On recurrence formulae	36
MacRobert, T. M. Integrals allied to Airy's integrals	91
MacRobert, T. M. Integrals involving hypergeometric functions and E - functions	196
Michael, J. H. Completely continuous movements in topological vector spaces	135
Munn, W. D. Semigroups satisfying minimal conditions	145
Neumann, B. H. On a conjecture of Hanna Neumann	13
Preston, G. B. The structure of normal inverse semigroups	1
Ragab, F. M. Integration of E -functions with regard to their parameters .	94
Ragab, F. M. Expansion of an E -function in a series of products of E - functions	194
Rajagopal, C. T. On Tauberian theorems for Abel-Cesàro summability .	176
Rankin, R. A. The construction of branched covering Riemann surfaces .	199

	PAGE
Robertson, A. P. On rearrangements of infinite series	182
Robertson, Alex. P., and Robertson, Wendy. On the closed graph theorem	9
Sharma, K. C. Infinite integrals involving products of Legendre functions .	111
Shukla Harishanker. On certain relations between products of bilateral hypergeometric series	141
Singh, V. N. Certain expansions involving E -functions	119
Sneddon, I. N. <i>See</i> Fulton, J., and Sneddon, I. N.	
Wintner, Aurel. On stratifications of Mittag-Leffler's transcendents . . .	170
Yacoub, K. R. On semi-special permutations I	18
Yacoub, K. R. A note on semi-special permutations	164
