Editors

Giacomo Bonanno, University of California, Davis, USA
Martin van Hees, University of Groningen, Netherlands
Christian List, London School of Economics, UK
Bertil Tungodden, Norwegian School of Economics and
Business Administration, Norway

Economics and Philosophy examines the foundations of economics and its cognate disciplines from a philosophical perspective. Topics include the methodology and epistemology of economics, the foundations of decision theory and game theory, the nature of rational choice and the use of economic techniques in ethical theory.

Editor-in-Chief

Geoffrey M. Hodgson, University of Hertfordshire, UK

Institutions are the stuff of social and economic life. The importance of understanding the role of institutions in economic growth is now widely appreciated. The *Journal of Institutional Economics* is devoted to the study of the nature, role and evolution of institutions in the economy, including firms, states, markets, money, households and other vital institutions and organizations. It welcomes contributions by all schools of thought that can contribute to our understanding of the features, development and functions of real world economic institutions and organizations.

INSTRUCTIONS FOR CONTRIBUTORS

1. Manuscripts should be submitted online via the website <http://mc.manuscriptcentral.com/ede>. Instructions can be found at the website by clicking the 'Instructions and Forms' link (under 'Resources') and then clicking the 'Online Submission Instructions for Authors' link. Manuscripts should be written in English. Preferred file formats are Word or pdf files for the text, eps files for the figures, and Excel files for any graphs or charts.
 2. **General guidelines** – Manuscripts should have a 12 point font, double spacing throughout, and 2.54 cm (1 inch) margins on all sides. The first page of the manuscript should be a **title page** containing: the name and affiliation of all authors; a designated contact author and his/her complete correspondence address, including email address; and an abstract of 150 words maximum. The text, including footnotes, references and appendices but excluding the title page, should not exceed 8,000 words. The entire manuscript, including tables and figures, should generally not exceed 35 pages.
 3. **Tables** should be numbered sequentially through the text. Tables should be put at the back of the manuscript, with the appropriate location marked in the text. Titles and headings should be brief and descriptive. The text should include references to all tables.
 4. **Illustrations** should be placed, one per page, at the back of the manuscript (or in a separate file), with the appropriate location marked in the text. Quality should be high enough for **direct reproduction**, and designed to allow a reduction of 50%. Illustrations should be numbered sequentially through the text and each should have a caption. References should be made in the text to each illustration. The journal does not publish colour illustrations.
 5. **References** – In the text refer to the author's name and year of publication, separated by a comma (Smith, 2003). If there are more than two authors, the name of the first author should be used followed by 'et al.' (Smith et al., 2004). If two or more references are cited together in the text, they should be arranged chronologically (Sorensen, 1997; Goring, 1999). Publications by the same author(s) in the same year should be listed as 1994a, 1994b, etc. Personal communications should be cited as e.g. '(G. McNeal, personal communication, 2006)' but not included in the list of references. Do not abbreviate the titles of periodicals.
- Use the following style for references:**
- Journal articles:* Pearce, D., K. Hamilton, and G. Atkinson (1996), 'Measuring sustainable development: progress on indicators', *Environment and Development Economics* 1: 85-101.
- Articles in edited works:* Smith, V.K. and J.V. Krutilla (1982), 'Toward formulating the role of national resources in economics models', in V.K. Smith and J.V. Krutilla (eds.), *Exploration in Natural Resource Economics*, Baltimore: John Hopkins Press, pp. 1-43.
- Books:* Mäler, K.-G. (1974), *Environmental Economics: A Theoretical Inquiry*, Baltimore: Johns Hopkins Press for the Resource for the Future, Inc.
- Unpublished reports, departmental working papers, etc.:* Gren, I.-M. (1992), 'Benefits from restoring wetlands for nitrogen abatement: a case study of Gotland', Beijer Discussion Paper Series No. 14, The Beijer International Institute of Ecological Economics, Stockholm.
6. **Formulae** should be clearly written, with the meaning of all symbols explained immediately after they are first used. Number equations serially at the right-hand side in parentheses, but only equations referred to in the text need be numbered. Greek letters and mathematical symbols should be italicised.
 7. **Footnotes** should only be used when essential, and kept as short as possible. They should be numbered in superscript in the text, following any punctuation.
 8. **Copyright** – Submission of an article implies that it has not been published or accepted for publication elsewhere. Authors are responsible for obtaining written permission to reproduce any material (in both print and electronic media) for which they do not own copyright, and for ensuring that the appropriate acknowledgements are included in their manuscript. Authors of published articles assign copyright to Cambridge University Press (with certain rights reserved).
 9. Further information can be obtained via email from the journal's editorial office ede@aub.gr or the journal's web page <http://journals.cambridge.org/ede>

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

Printed in the United Kingdom at the University Press, Cambridge.

ENVIRONMENT AND DEVELOPMENT ECONOMICS

Published in association with the Beijer Institute

CONTENTS

VOLUME 14 PART 5 OCTOBER 2009

THEORY AND APPLICATIONS

- ARIASTER B. CHIMELI and JOHN B. BRADEN A capital scarcity theory of the environmental Kuznets curve 541
- EFTICHIOS S. SARTZETAKIS and PANAGIOTIS D. TSIGARIS Uncertainty and the double dividend hypothesis 565
- WISDOM AKPALU, EDWIN MUCHAPONDWA, and PRECIOUS ZIKHALI Can the restrictive harvest period policy conserve mopane worms in southern Africa? A bioeconomic modelling approach 587
- RACHEL A. BOUVIER Sulfur dioxide emissions and per capita income: a disaggregation of the effects of long-run and short-run income growth 601
- MAYA PAPINEAU, KRISTIN AUNAN, and TERJE BERNTSEN Distributional determinants of household air pollution in China 621
- ANKE REICHHUBER, EVA CAMACHO, and TILL REQUATE A framed field experiment on collective enforcement mechanisms with Ethiopian farmers 641
