Instructions for authors

1. Submitting an article for publication

Manuscripts should be submitted electronically. Please e-mail attached files with Subject Header "Submission for Language and Cognition" to: submissions@languageandcognition.net. Please include your name, full contact details, the title of your paper AND the abstract in the main body of your e-mail message.

If your manuscript uses fonts with non-Roman script, it is best to use a Unicode font to ensure readability. Alternatively, submit your manuscript as a PDF file.

Contributions should be in English, and should deploy the spelling and punctuation conventions of either British or American English. Contributors whose native language is not English are requested to have their article carefully checked by a native speaker prior to submission.

2. Peer review

The journal operates a single-blind peer review—authorship of submitted papers must be clearly indicated, while the anonymity of reviewers' is preserved. The review process usually takes around 3 months. Submissions are usually sent to at least 2 reviewers.

3. Formatting and style

Language and Cognition does not require that authors conform to a specific format when submitting articles for review. However, please observe the following conventions:

- Include an abstract of 200 words or less placed before the main body of the text followed by 3–10 keywords.
- The entire text should be double spaced, with ample margins, and the pages should be numbered.
- Place figures, graphs and tables etc. at the appropriate point within the running text.
- Submit the manuscript as a single file, rather than sending references, figures etc., as separate files.
- Footnotes are preferred to endnotes.
- Include your name(s) and institutional affiliation(s) immediately beneath the paper title.

Manuscripts that are accepted for publication will need to conform to the journal style guide.

Please see our style sheet for details regarding journal style which can be found on the journal website at:

http://www.languageandcognition.net/Submissions_files/Mouton_journal_style_sheet.pdf

4. Manuscript length

There is no specific limit for article length. Please be advised, however, that reviewers will be instructed to pay careful attention to length-to-content ratios. Succinct articles are encouraged.

5. Proofs

Authors are asked to check their manuscripts *very carefully* before submitting them in order to prevent delays and extra costs at proofing. Authors will receive PDF proofs for correction which must be returned by dates given in the publication schedule.

6. Offprints

Upon publication, authors will receive electronic offprints (in PDF format) of their contribution. Guest editors of special issues will receive complimentary print copies of the issue.
