

## INSTRUCTIONS FOR CONTRIBUTORS

### SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via our manuscript submission and tracking site, <http://www.editorialmanager.com/psm/>. Full instructions for electronic submission are available directly from this site. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

Papers for publication from Europe (except those on genetic topics, irrespective of country), and all papers on imaging topics, should be submitted to the UK Office.

Papers from the Americas, Asia, Africa, Australasia and the Middle East (except those dealing with imaging topics), and all papers dealing with genetic topics, irrespective of country, should be sent to US Office.

Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

**Declaration of Interest:** A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

**REFERENCES** (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be supplied in alphabetical order (authors' names in **bold**, journal titles in full), following the text. Some examples follow:

**Miller PM, Byrne M, Hodges A, Lawrie SM, Johnstone EC** (2002). Childhood behaviour, psychotic symptoms and psychosis onset in young people at high risk of schizophrenia: early findings from the Edinburgh high risk study. *Psychological Medicine* **32**, 173–179.

**Cleckley HJ** (1941). *The Mask of Sanity*, 2nd edn. Mosby: St. Louis, MO.

**Brewer WJ, Wood SJ, DeLuca C, Pantelis C** (2006). Models of olfaction for exploring neurodevelopment. In *Olfaction and the Brain* (ed. W. J. Brewer, D. Castle and C. Pantelis), pp. 97–121. Cambridge University Press: Cambridge.

Accessed 15 February 2006.

[Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.]

**FIGURES AND TABLES** Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

**PROOFS AND OFFPRINTS** Page proofs will be sent to the author designated to receive correspondence. corrections other than to printer's errors may be charged to the author. The corresponding author of each paper will receive a PDF file of their article and hard copy offprints may be purchased if they are ordered on the form supplied when the proof is returned.

# PSYCHOLOGICAL MEDICINE

## CONTENTS

### ORIGINAL ARTICLES

- Prevalence of psychiatric diagnoses in preterm and full-term children, adolescents and young adults: a meta-analysis**  
Burnett AC, Anderson PJ, Cheong J, Doyle LW, Davey CG & Wood SJ 2463
- Testing the validity and acceptability of the diagnostic criteria for Hoarding Disorder: a DSM-5 survey**  
Mataix-Cols D, Fernández de la Cruz L, Nakao T & Pertusa A 2475
- Long working hours and symptoms of anxiety and depression: a 5-year follow-up of the Whitehall II study**  
Virtanen M, Ferrie JE, Singh-Manoux A, Shipley MJ, Stansfeld SA, Marmot MG, Ahola K, Vahtera J & Kivimäki M 2485
- Risk factors prospectively associated with adult obsessive-compulsive symptom dimensions and obsessive-compulsive disorder**  
Grisham JR, Fullana MA, Mataix-Cols D, Moffitt TE, Caspi A & Poulton R 2495
- Is childhood OCD a risk factor for eating disorders later in life? A longitudinal study**  
Micali N, Hilton K, Natatani E, Heyman I, Turner C & Mataix-Cols D 2507
- Drug-free patients with major depression show an increased electrophysiological response to valid and invalid feedback**  
Mies GW, van der Veen FM, Tülen JHM, Birkenhäger TK, Hengeveld MW & van der Molen MW 2515
- Familial clustering of suicide risk: a total population study of 11.4 million individuals**  
Tidemalm D, Runeson B, Waern M, Frisell T, Carlström E, Lichtenstein P & Langström N 2527
- The relationship between coping and subclinical psychotic experiences in adolescents from the general population – a longitudinal study**  
Lin A, Wigman JTW, Nelson B, Vollebergh WAM, van Os J, Baksheev G, Ryan J, Raaijmakers QAW, Thompson A & Yung AR 2535
- Self-rating scales assessing subjective well-being and distress correlate with rCBF in PTSD-sensitive regions**  
Nardo D, Högberg G, Flumeri F, Jacobsson H, Larsson SA, Hällström T & Pagani M 2549
- Decreased regional cerebral blood flow in medial prefrontal cortex during trauma-unrelated stressful imagery in Vietnam veterans with post-traumatic stress disorder**  
Gold AL, Shin LM, Orr SP, Carson MA, Rauch SL, Macklin ML, Lasko NB, Metzger LJ, Dougherty DD, Alpert NM, Fischman AJ & Pitman RK 2563
- Heart rate after trauma and the specificity of fear circuitry disorders**  
Bryant RA, Creamer M, O'Donnell M, Silove D & McFarlane AC 2573
- A randomized controlled trial of an Internet-based cognitive-behavioural skills package for carers of people with anorexia nervosa**  
Grover M, Naumann U, Mohammad-Dar L, Glennon D, Ringwood S, Eisler I, Williams C, Treasure J & Schmidt U 2581
- Cool and hot executive functions in medication-naïve attention deficit hyperactivity disorder children**  
Yang B-R, Chan RCK, Gracia N, Cao X-Y, Zou X-B, Jing J, Mai J-N, Li J & Shum D 2593
- Visual memory as potential cognitive endophenotype of attention deficit hyperactivity disorder**  
Shang CY & Gau SS 2603
- Prospective relationships of ADHD symptoms with developing substance use in a population-derived sample**  
Sihvola E, Rose RJ, Dick DM, Korhonen T, Pulkkinen L, Raevuori A, Marttunen M & Kaprio J 2615
- Impulsivity and cognitive distortions in pathological gamblers attending the UK National Problem Gambling Clinic: a preliminary report**  
Michalczuk R, Bowden-Jones H, Verdejo-Garcia A & Clark L 2625
- Psychological well-being (PWB): a natural life outlook? An Italian twin study on heritability of PWB in young adults**  
Gigantesco A, Stazi MA, Alessandri G, Medda E, Tarolla E & Fagnani C 2637
- Confirmation bias: why psychiatrists stick to wrong preliminary diagnoses**  
Mendel R, Traut-Mattausch E, Jonas E, Leucht S, Kane JM, Maino K, Kissling W & Hamann J 2651
- The structure of mental health research: networks of influence among psychiatry and clinical psychology journals**  
Haslam N & Lusher D 2661
- Mediators of change in cognitive behaviour therapy and mebeverine for irritable bowel syndrome**  
Reme SE, Stahl D, Kennedy T, Jones R, Darnley S & Chalder T 2669
