

SUBSCRIPTION RATES

Subscription rates (post free) for volume 38 (2001) of the *Journal of Applied Probability* are as follows:

US\$238.50; \$A376.35; £145.50 for libraries and institutions;
US\$79.50; \$A125.45; £48.50 for individuals belonging to a recognised scientific society.

Members of the London Mathematical Society should apply direct to the Secretary of the Society for copies of the *Journal*.

Please send all enquiries to: Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK.

We can provide back issue prices on application. Cheques, money orders, etc. should be made out to APPLIED PROBABILITY. Payment is accepted in US, UK or Australian currency or by VISA or Mastercard (phone: +44 114 222 3922; fax: +44 114 272 9782).

NOTES FOR CONTRIBUTORS

Papers published in the *Journal* are of two kinds:

- (1) *research papers* not exceeding 20 printed pages;
- (2) *short communications* of a few printed pages in the nature of notes or brief accounts of work in progress.

Review papers, longer research papers and letters to the editor are published in *Advances in Applied Probability*, a companion journal. (Note: Letters relating specifically to papers which have appeared in the *Journal of Applied Probability* will continue to appear in the *Journal*.)

The editors may publish accepted papers in either journal, according to the space available, in order to meet the 15-month deadline in publication referred to below.

Submission of papers

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Papers will not be reprinted without the written permission of the Trust. It is the policy not to accept for publication papers which cannot appear in print within 15 months of the date of receipt of the final version. Fifty reprints of each paper will be provided free; additional reprints are available at cost.

Papers should be written in English or French; papers in other languages may be accepted by the editors, but will appear (subject to the author's agreement) in English or French translation. Please supply *three* double-spaced hard copies, at least one of which should be printed on one side of the paper only. The paper should include: (1) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results; (2) list of keywords detailing the contents for the purpose of computerised information retrieval; (3) primary and secondary classifications according to the 2000 Mathematics Subject Classification.

Authors are advised to consult *The Author's Guide to the Applied Probability Journals* when preparing papers for submission. A copy of this guide may be obtained free of charge from the Applied Probability Office. An updated version of the guide, with LATEX style files, can be obtained in electronic form on <http://www.appliedprobability.org> or on PC-compatible disk from the Applied Probability Office. For instructions on how papers may be submitted electronically, please consult the notes for contributors at the above URL.

For efficiency in processing, authors are requested to send all submissions to the Applied Probability Office in Sheffield, rather than to individual editors. The address for all submissions is:

**Executive Editor, Applied Probability, School of Mathematics and Statistics,
University of Sheffield, Sheffield S3 7RH, UK.**

COPYRIGHT

The copyright of all published papers is vested in the Trust. When a paper is accepted for publication, the Trust asks the author(s) to assign copyright to the Trust by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$00.70 per copy, plus .20 per page is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021-9002/01 \$00.70 + .20.

Research Papers

- 815 C. DOUGLAS HOWARD. Differentiability and monotonicity of expected passage time in Euclidean first-passage percolation
- 828 DAYUE CHEN. On the infinite cluster of Bernoulli bond percolation in Scherk's graph
- 841 TIMOTHY I. MATIS AND RICHARD M. FELDMAN. Transient analysis of state-dependent queueing networks via cumulant functions
- 860 LIRONG CUI AND M. XIE. Availability analysis of periodically inspected systems with random walk model
- 872 F. G. BADÍA, M. D. BERRADE AND CLEMENTE A. CAMPOS. Optimization of inspection intervals based on cost
- 882 JEAN-LOUIS BON AND EUGEN PĂLTĂNEA. Convergence of the number of failed components in a Markov system with nonidentical components
- 898 OTSO OVASKAINEN. The quasistationary distribution of the stochastic logistic model
- 908 JAMES C. FU. Distribution of the scan statistic for a sequence of bistate trials
- 917 CLAUDIO MACCI. Continuous-time Markov additive processes: composition of large deviations principles and comparison between exponential rates of convergence
- 932 TYRONE E. DUNCAN, YI YAN AND PENG YAN. Exact asymptotics for a queue with fractional Brownian input and applications in ATM networks
- 946 MITSUSHI TAMAKI. Optimal stopping on trajectories and the ballot problem
- 960 BORIS P. BELINSKIY AND PETER CAITHAMER. Energy of a string driven by a two-parameter Gaussian noise white in time
- 975 CHRISTOPHE ANDRIEU, LAIRD A. BREYER AND ARNAUD DOUCET. Convergence of simulated annealing using Foster–Lyapunov criteria
- 995 FRANK BALL AND VALERI T. STEFANOV. Further approaches to computing fundamental characteristics of birth–death processes
- 1006 KYLE SIEGRIST AND JOHN STEELE. Sequential games
- 1018 T. KOMOROWSKI AND G. KRUPA. Random walk in a random environment with correlated sites
- 1033 LIUDAS GIRAITIS, PIOTR KOKOSZKA AND REMIGIJUS LEIPUS. Testing for long memory in the presence of a general trend

Short Communications

- 1055 D. R. GREY. A note on convergence of probability measures
- 1059 XINYU HE. A probabilistic method for Navier–Stokes vortices
- 1067 HYUNG GEUN KIM AND DOUGU NAM. Optimal estimation of diffusion processes hidden by general obstacles
- 1074 AIDAN SUDBURY. Rigorous lower bounds for the critical infection rate in the diffusive contact process

Letters to the Editor

- 1079 VYACHESLAV M. ABRAMOV. On losses in $M^X/GI/1/n$ queues
- 1081 WON S. YANG AND KYUNG C. CHAE. A note on the $GI/M/1$ queue with Poisson negative arrivals
- 1086 Index
