## Subject Index

- astrobiology – 385, 419, 443, 455, 478
- atomic data – 478
  
- binaries: close – 75
- binaries: spectroscopic – 171
  
- catalogs – 496
- convection – 161, 197
- cosmic rays – 446
  
- dark matter – 410
  
- Earth – 301, 336, 410, 449
- Earth: global temperature – 320
  
- gravitational waves – 449
  
- helicity – 181
  
- image processing – 493
- instabilities – 171
- instrumentation: adaptive optics – 93, 499
- instrumentation: heliometers – 487
- instrumentation: high angular resolution – 499
- instrumentation: interferometers – 493
- instrumentation: photometers – 49
- instrumentation: spectrographs – 81, 484
- interplanetary medium – 326
- ISM: cosmic rays – 427, 507
  
- line: formation – 191
  
- magnetohydrodynamics – 33, 507
- magnetic fields – 385
- meteors – meteoroids – 55, 105, 202, 279, 343, 413, 434, 475
- methods: laboratory – 443
- methods: numerical – 350
- methods: statistical – 49, 105
- MHD – 161, 171, 181, 197
- Moon – 410, 475
- multifractal spectrum – 66
  
- open clusters and associations: general – 87
- open clusters and associations: individual (IC 4651) – 87
  
- planetary – 3
- planetary systems – 120, 385, 395, 440
  
- planetary systems: formation – 401
- planets and satellites: general – 419, 455
- protoplanetary disks – 401
  
- radiative transfer – 231
  
- scattering – 356
- site testing – 484, 499
- solar system: formation – 475
- solar system: general – 410, 452
- solar wind – 310, 326, 359, 363, 452
- solar-terrestrial relations – 63, 78, 84, 105, 279, 301, 310, 336, 343, 350, 359, 404, 407, 446, 427, 459
  
- stars: convection – 219
- stars: rotation – 219
- stars: abundances – 478
- stars: activity – 3, 57, 60, 75, 90, 120, 136, 146, 161, 222, 267, 375, 395, 440, 469
- stars: atmospheres – 270
- stars: chemically peculiar – 270
- stars: chromospheres – 136, 267
- stars: coronae – 136, 478
- stars: early-type – 507
- stars: evolution – 375
- stars: flare – 375, 443
- stars: imaging – 130
- stars: individual (HD 128620, HD 128621) – 146
- stars: interiors – 219
- stars: late-type – 60, 90, 120, 130, 213, 288
- stars: magnetic fields – 120, 130
- stars: mass loss – 75, 136
- stars: oscillations – 55, 57
- stars: outflows – 75, 385
- stars: planetary systems – 413, 478
- stars: pre-main-sequence – 395
- stars: rotation – 60
- stars: spots – 60, 75, 90, 136, 213, 267, 270, 440
- stars: statistics – 469
- stars: ultraviolet – 443
- stars: variables – 87, 434
- stars: variables: other – 496
- stars: winds – 75, 385
- stars: X-rays – 146, 478
- stars flares – 288
  
- stellar dynamics – 507

- Sun: activity – 3, 33, 39, 49, 57, 66, 72, 78, 81, 84, 102, 105, 111, 120, 150, 155, 161, 202, 210, 222, 231, 257, 276, 292, 301, 320, 336, 343, 359, 404, 407, 427, 446, 449, 452, 459, 469
- Sun: atmosphere – 66
- Sun: atmosphere – 231, 507
- Sun: chromosphere – 93
- Sun: corona – 96, 99, 102, 210, 276, 292, 295, 356
- Sun: coronal mass ejections (CMEs) – 257, 273, 326, 369, 385, 459
- Sun: evolution – 155, 295, 356, 375
- Sun: filaments – 99, 469
- Sun: flares – 39, 66, 72, 257, 273, 282, 343, 459, 469
- Sun: fundamental parameters – 21, 49, 72, 292, 487
- Sun: gamma rays – 63, 282, 301, 401
- Sun: granulation – 63, 72
- Sun: helioseismology – 33, 507
- Sun: infrared – 96
- Sun: interior – 161, 181
- Sun: magnetic fields – 33, 63, 84, 96, 99, 102, 105, 111, 161, 181, 191, 197, 210, 222, 231, 241, 251, 257, 295, 326, 369, 499
- Sun: oscillations – 57
- Sun: particle emission – 3, 39, 105
- Sun: photosphere – 49, 102, 191, 210, 363
- Sun: radio radiation – 72, 81, 273, 279, 285, 484
- Sun: radius – 285
- Sun: rotation – 241
- Sun: solar wind – 369
- Sun: spicules – 285
- Sun: UV radiation – 78, 276, 507
- Sun: X-rays – 282, 507
- sunspots – 111, 155, 202, 241, 301, 310, 407
- survey – 434
- techniques: image processing – 434
- techniques: interferometric – 493
- techniques: photometric – 75, 487
- techniques: polarimetric – 171, 191, 413
- techniques: spectroscopic – 213, 276
- time – 404, 407
- turbulence – 161, 181, 279, 356, 363
