## PUBLICATIONS FROM UNITED NATIONS

### STATISTICAL YEARBOOK 1973

Important compilation of statistics from countries throughout the world covering a wide range of economic and social subjects, including: population, agriculture, manufacturing, construction, transport, trade, balance of payments, national income, education and culture. Improved statistical coverage has enabled the *Yearbook* to widen the territorial scope of many of its tables and to provide more comprehensive and accurate world and continental aggregates.

Order No. E.74.XVII.1 Clothbound \$35.00

### COMPENDIUM OF HOUSING STATISTICS 1971

This world-wide compilation of housing and related statistics is prepared by the Statistical Office of the United Nations with the assistance of the Population Division and in co-operation with the Centre for Housing, Building and Planning. Its main purpose is to make available information derived from national housing censuses and to provide for a more complete interpretation of this information than would otherwise be possible by presenting other data that have a bearing on the housing situation. These include data on population and its growth, dwelling construction, the cost of housing, and capital formation in housing.

Order No. E/F.73.XVII.4

\$14.50

### YEARBOOK OF CONSTRUCTION STATISTICS 1963-1972

This is the first in a new series of annual compilations of statistics on world construction activity and has been prepared to make available the information derived from annual surveys in this field undertaken all over the world.

The data presented in this publication are primarily based on replies to the Construction Statistics Questionnaire of the United Nations, distributed in 1972 for the first time. The information received has been supplemented in a few instances with data obtained from published sources, as well as with the work undertaken by the Statistical Office on the compilation of construction statistics in the United Nations *Statistical Yearbook*.

Order No. E.74.XVII.9 Clothbound \$18.00

### DEMOGRAPHIC YEARBOOK 1973

The twenty-fifth issue of the *Demographic Yearbook* contains 1973 statistics of area, population, natality, mortality, nuptiality and divorce for every country of the world, latest available data on expectation of life and a 7-year trend of international arrivals and departures. Data on the economic characteristics of the population are shown, including labour force participation rates by age and sex as well as various cross-classifications of population by industry, occupation, status, age and sex.

Order No. E/F.74.XIII.1 Clothbound \$38.00

United Nations Publications, Room LX-2300, New York, N.Y. 10017

Selected bibliography of literature on world politics and international economics	343

## MANUSCRIPT SUBMISSION

**International Organization**, the principal scholarly periodical in its field, publishes analytical articles, review essays of current literature in the field, brief notes dealing with problems of both theoretical and methodological interest, and comments designed to encourage lively interchanges of views on issues of wide interest, public policy, and previously published articles, review essays, notes, and comments.

Manuscripts submitted for publication should focus primarily on the development, functioning, or political factors associated with international agencies and regional arrangements, or on their dynamic relationships with the international political and economic environments in which they operate.

The Board of Editors welcomes fresh critical analyses along the foregoing lines. It is not interested in descriptions or chronological treatments of institutions with little assessment and interpretation. Manuscripts should provide original, insightful interpretations and evaluations of significant developments or trends; they should not repeat material familiar and elsewhere available to specialists in international affairs.

All manuscripts should be sent in triplicate to the Editor, **Robert O. Keohane**, at the address below. Articles and review essays submitted for consideration should not exceed 35 double-spaced typewritten pages (8½" × 11"). Notes on theory and method and comments should not exceed 2,000 words. All footnotes must be placed together at the end of each manuscript—not at the bottom of each page. The style should be consistent with the University of Chicago's **A Manual of Style**.

Decisions on publication are made pursuant to independent critical comment by two or more competent readers including the Editor. Authors may expect a decision within six weeks of the Editor's receipt of a manuscript.
