Organizations in the USA who are also registered with CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to CCC. This consent does not extend to multiple copying for promotional or commercial purposes. ISI Tear Sheet Service, 3501 Market Street, Philadelphia, PA 19104, USA, is authorized to supply single copies of separate articles for private use only. Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions. For all other use, permission should be sought from Cambridge University Press.

Cover Image: November 2007 storm surge eroding the western Netherlands coastal dunes near Bergen aan Zee. During the surge event, the foredune was forced back almost 10 m. This revealed a thick sedimentary archive showing evidence of Holocene coastal processes and events. Photo by: Marcel Bakker, TNO - Geological Survey of the Netherlands.

Induced Seismicity in the Groningen Gas Field, the Netherlands

Editorial	
Lucia van Geuns & Karin van Thienen-Visser	s1
Geology of the Groningen field – an overview	
Jan de Jager & Clemens Visser	s3
From checking deterministic predictions to probabilities, scenarios and control loops for regulatory supervision	
J.A. de Waal, A.G. Muntendam-Bos & J.P.A. Roest	s17
Statistical evidence on the effect of production changes on induced seismicity	
Danjela Sijacic, Frank Pijpers, Manuel Nepveu & Karin van Thienen-Visser	s27
Introduction to the Groningen static reservoir model	
Clemens A. Visser & Jose L. Solano Viota	s39
History match of the Groningen field dynamic reservoir model to subsidence data and conventional subsurface data	
Hendrik van Oeveren, Per Valvatne, Leendert Geurtsen & Jan van Elk	s47
New approaches in experimental research on rock and fault behaviour in the Groningen gas field	
Christopher J. Spiers, Suzanne J.T. Hangx & André R. Niemeijer	s55
Improved definition of faults in the Groningen field using seismic attributes	
Marloes Kortekaas & Bastiaan Jaarsma	s71
The effect of salt in dilatant faults on rates and magnitudes of induced seismicity – first results building on the geological setting of the Groningen Rotliegend reservoirs	
Michael Kettermann, Steffen Abe, Alexander F. Raith, Jan de Jager & Janos L. Urai	s87
The future of subsidence modelling: compaction and subsidence due to gas depletion of the Groningen gas field in the Netherlands	
Karin van Thienen-Visser & Peter A. Fokker	s105
Field-wide reservoir compressibility estimation through inversion of subsidence data above the Groningen gas field	
Rob M.H.E. van Eijs & Onno van der Wal	s117
Fault reactivation mechanisms and dynamic rupture modelling of depletion-induced seismic events in a Rotliegend gas reservoir	
Loes Buijze, Peter A.J. van den Bogert, Brecht B.T. Wassing, Bogdan Orlic & Johan ten Veen	s131
An empirical relationship for the seismic activity rate of the Groningen gas field	
Marc H.H. Hettema, Bastiaan Jaarsma, Barthold M. Schroot & Guido C.N. van Yperen	s149
Relocation of clustered earthquakes in the Groningen gas field	
Lisanne Jagt, Elmer Ruigrok & Hanneke Paulssen	s163
Development of statistical geomechanical models for forecasting seismicity induced by gas production from the Groningen field	
Stephen J. Bourne & Stephen J. Oates	s175
Geomechanical models for induced seismicity in the Netherlands: inferences from simplified analytical, finite element and rupture model approaches	
Jan-Diederik Van Wees, Peter A. Fokker, Karin Van Thienen-Visser, Brecht B.T. Wassing, Sander Osinga, Bogdan Orlic, Saad A. Ghouri, Loes Buijze & Maarten Pluymaekers	s183
Developing a model for the prediction of ground motions due to earthquakes in the Groningen gas field	
Julian J. Bommer, Bernard Dost, Benjamin Edwards, Pauline P. Kruiver, Michail Ntinalexis, Adrian Rodriguez-Marek, Peter J. Stafford & Jan van Elk	s203
Characterisation of the Groningen subsurface for seismic hazard and risk modelling	
Pauline P. Kruiver, Ane Wiersma, Fred H. Kloosterman, Ger de Lange, Mandy Korff, Jan Stafleu, Freek S. Busschers, Ronald Harting, Jan L. Gunnink, Russell A. Green, Jan van Elk & Dirk Doornhof	s215
Development of seismicity and probabilistic hazard assessment for the Groningen gas field	
Bernard Dost, Elmer Ruigrok & Jesper Spetzler	s235
Developing fragility and consequence models for buildings in the Groningen field	
Helen Crowley, Rui Pinho, Barbara Polidoro & Jan van Elk	s247
Hazard and risk assessments for induced seismicity in Groningen	
Jan van Elk, Dirk Doornhof, Julian J. Bommer, Stephen J. Bourne, Steve J. Oates, Rui Pinho & Helen Crowley	s259
The effect of imposed production measures on gas extraction induced seismic risk	
Annamarie G. Muntendam-Bos, Johannes P.A. Roest & Hans A. de Waal	s271
Research into induced seismicity in the Groningen field – further studies	
Jan-Dirk Jansen & Rien Herber	s279
