THE MATHEMATICAL ASSOCIATION

The fundamental aim of the Mathematical Association is to promote good methods of mathematical teaching. A member receives each issue of the Mathematical Gazette and/or Mathematics in School (according to the class of membership chosen), together with Newsletters. Reports are published from time to time and these are normally available to members at a reduced Those interested in becoming members should contact MA rate. Headquarters for information and application forms. The address of the Association Headquarters is 259 London Road, Leicester LE2 3BE, UK (telephone 0116 221 0013). The Association should be notified of any change of address. If copies of the Association periodicals fail to reach a member through lack of such notification, duplicate copies can only be supplied at the published price. If change of address is due to a change of appointment, the Association will be glad to be informed. Subscriptions should be submitted to the Treasurer via Headquarters. Correspondence relating to Teaching Committee should be addressed to Dr Chris Pritchard. The Association's Library is housed in the University Library, Leicester.

Views expressed in the *Mathematical Gazette* by authors or advertisers are not necessarily those of the Association.

THE MATHEMATICAL GAZETTE

Editor:	Problem Corner:
Dr Gerry Leversha,	Mr Nick Lord,
15 Maunder Road,	Tonbridge School,
Hanwell,	Tonbridge,
London W7 3PN	Kent TN9 1JP
g.leversha@btinternet.com	njl@tonbridge-school.org
Production Editor:	Reviews Editor:
Mr Bill Richardson,	Mr Owen Toller,
Kintail,	St Paul's School,
Longmorn,	Lonsdale Road,
Elgin IV30 8RJ	London SW13 9JT
W.P.Richardson@open.ac.uk	gazette-reviews@m-a.org.uk

Potential advertisers should send an e-mail to: advertisingcontroller@m-a.org.uk

Material for publication should be sent to the Editor. Books for review should be sent to the Reviews Editor.

Advice to authors of notes and articles.

Study the format of articles in the *Gazette*. Please note the format for references, which should be listed in their order of appearance in an article. MSS may be submitted electronically, preferably in pdf format, or, if sent by post, should be typed and two copies included. (Mathematical expressions may be hand written.) Please send by e-mail not on floppy discs. This edition of the *Gazette* was produced on an Acom machine using TechWriter and Draw.

CONTENTS

Articles		
The Steiner-Lehmus angle-bisector theorem	John Conway and Alex Ryba	193
Runs, strings and alphabets	Barry Lewis	204
Inequalities for the perimeter of an ellipse	G. J. O. Jameson	227
A fresh look at Euler's limit formula for the gamma function	G. J. O. Jameson	235
Two girls – the value of information	Keith Parramore and Joan Stephens	243
Quotient polynomials with positive coefficients	Mark B. Villarino	250
Graph-theoretic models for the Fibonacci family	T. Koshy	256
Conics and convexity	K. Robin McLean	266
Wind over tide	John D. Mahony	273
A cubic surface of revolution	Mark B. Villarino	281
Cryptic crossnumber puzzles: a setter's perspective	Alastair Cuthbertson (Oyler)	291
Ordering 15 marbles with a three-way scale	Charles Audet	304
Notes 98.09 to 98.19		
Nint reciprocity	Stan Dolan	317
Associativity of symmetric set difference	Des MacHale	319
Rearranging the signs of the alternating harmonic series	J. R. Nurcombe	321
A convergent series with zero sum	J. A. Scott	325
Some double series related to ζ (3)	Tim Jameson	327
An unexpected closed form	J. A. Scott	331
A class of dense subsets on the real line	István Mező	332

Notes 98.09 to 98.19 (continued)

A variation of Miquel's theorem and its generalisation	Michael de Villiers	334
The return of the returning explorer	Jeremy D. King and Nick Lord	339
Another look at the orthocentroidal disc	J. A. Scott	343
A new proof that the rationals are countable	K. B. Subramaniam	345
Teaching Notes		
A non-calculator challenge:	Nick Lord	346
show that $\ln 2 < \frac{1}{\sqrt{2}}$		
Evaluating $\sum_{1}^{n} r^2$ and $\sum_{1}^{n} r(r+1)$ using moments	Nick Lord	346
Discrete random variables having equal mean and variance	Nick Lord	347
Cubics whose vertical translates factorise	Nick Lord	349
Approximate constructions of 1 radian	Jim Dickson and Nick Lord	350
Orbits made easy by complex numbers	Tim Jameson	353
Feedback		356
Problem Corner	Nick Lord	358
Student Problems	Stan Dolan	367
Reviews		370

HP Prime Graphing Calculator

Full color. Touch-enabled. Revolutionary functionality.

Experience math in the age of touch with HP Prime—a sleek, full-color graphing calculator with touch-screen and keypad, an array of powerful apps, and a rechargeable lithium ion battery.

- Explore math concepts with Dynamic Geometry, programmable CAS and spreadsheet applications.
- Graph virtually anything on X and Y with the Advanced Graphing app.
- Turn HP Prime into a customizable testing tool with Exam mode Configuration that makes only pre-approved functions available.
- Conduct student polling, distribute data and view student work in real time with the HP Wireless Connectivity kit.

If you are an educator and would like to request an HP Prime emulator for free please visit **hp.com/go/calculatoremulators**
