The Military Coup d'État as a Conservative Political Process

Ecuador, 1948-1966

John Samuel Fitch

Since the end of World War II the coup d'état has been a predictable feature of the political life of Latin America, Africa, Asia, and the Middle East. What triggers a coup? What prompts the military to intervene? Investigating the case of Ecuador, which since 1948 has experienced no less than five military overthrows of its government, Fitch develops a general conceptual framework for analyzing the coup d'état. On the basis of in-depth interviews with 80 key military men and 19 political leaders, he shows that the coup in Ecuador, as in other Latin American countries, has become an institutionalized part of the political system. This first major study of recent events in Ecuador, contributes to an understanding of military behavior in the rest of Latin America. \$15.00

Minas Gerais in the Brazilian Federation, 1889-1937

John D. Wirth. This is the first of three independent but coordinated studies on Brazilian regionalism from the beginning of the Republic to the establishment of Getulio Vargas' Estado Novo in 1937. The author analyzes the complex social and political structure of Minas Gerais, with an emphasis on the role of political elites who, while wielding great political influence, found it difficult to attain regional coherence in the face of the powerful economic forces that drew the state toward Sao Paulo. \$17.50

POLITICAL BROKERS IN CHILE
LOCAL GOVERNMENT IN A CENTRALIZED POLITY
Arturo Valenzuela

In this study of the relationships among local governments, people, and the central government in Chile, Arturo Valenzuela draws on a range of modern quantitative techniques, extensive field research, and historical data to illuminate significantly the Chilean political system before the military coup. Chile has always fascinated observers because it has not conformed to the general pattern of Latin American politics. In a continent where rule by armed forces was the norm, Chile developed institutions that provided strong civilian leadership. Allende's Popular Unity government attempted to bring about fundamental change within the framework of traditional Chilean institutions. The reaction to this experiment ushered in military rule and marked the most severe political breakdown in Chile's history. It is too early to tell whether Chile's institutional system will emerge again, but whether it does or not, the unique Chilean system will be the subject of scholarly interest for years to come.

The United States and the Andean Republics

Peru, Bolivia, and Ecuador

Foreword by Edwin O. Reischauer

Fredrick B. Pike

Analyzing the political culture of the Andean republics and of the United States in the nineteenth and twentieth centuries, Fredrick Pike finds deep divergencies in values and goals. Andeans, he shows, have traditionally viewed with suspicion the tenets associated with liberal democracy, secularism, and individualistic capitalism. Pike suggests that the values of Western-style modernity are less viable than ever in Andean America and indeed may not be able to survive in the United States. *American Foreign Policy Library* \$25.00

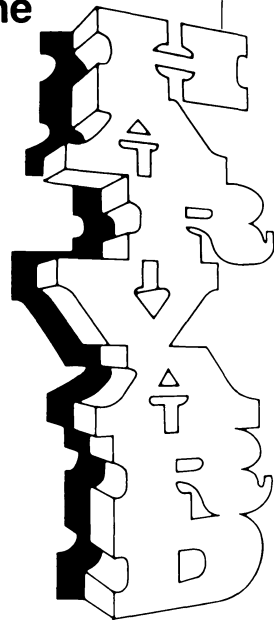

Government Policy and the Distribution of Wealth in Peru, 1963-1973

Richard C. Webb

Richard Webb shows that despite its good intentions, the Peruvian government has had little impact on the rigid imbalance of wealth in Peru. He argues that movements of capital from the modern sector of the economy to the traditional sector are needed to create new jobs for the poor and eliminate economic injustice. *Harvard Economic Studies*, 147 \$15.00

PLAS

My Missions for Revolutionary Bolivia, 1944-1962

Victor Andrade, Edited and with an Introduction by Cole Blasier

Víctor Andrade, Bolivian ambassador to Washington at various times between 1944 and 1962, offers a unique Third World perspective on U.S. politics and foreign relations. He presents a candid inside view of U.S.-Bolivian relations that will sometimes make American readers feel proud, other times ashamed. Although representing a small and poor country, Andrade mastered the art of Washington politics, establishing himself with the leading figures of his day; he describes his meetings with Roosevelt, Truman, and Eisenhower and his many encounters with journalists, cabinet members, politicians, and U.S. senators. \$11.95

Authoritarianism and Corporatism in Latin America

James M. Malloy, Editor

The sixteen previously unpublished essays in this volume provide a focus for the discussion of authoritarianism and corporatism. German Buenos Aires, 1900–1933

Social Change and Cultural Crisis

By Ronald C. Newton

This study of the German community of early twentieth century Buenos Aires is a major contribution to the literature on Argentine history and on the New World immigrant experience. Beginning with the first wave of immigration in the late nineteenth century and continuing to the outbreak of World War II, Professor Newton reconstructs the growth, development, and influence of a powerful foreign population in what was then the largest city in South America. *Texas Pan American Series*

System and Succession

The Social Bases of Political Elite Recruitment

By John D. Nagle

System and Succession provides a comparative analysis of the social composition of national political leadership in Mexico, the United States, Russia, and Germany. This comprehensive study exhibits a mastery of the intricacies of these four quite divergent political systems and offers a new methodological approach to comparative elite analysis. The author examines political elite recruitment over several generations and investigates, among other issues, elite displacements associated with revolution, economic crises, and postwar peace and prosperity.
