## ***The New Specific for Nasal Affections.***

# “ASTHMOL”

(SYN. Liq. Supraralin Co. Rouse).

## THE “POCKET” ALL-GLASS NEBULIZER (ROUSE).

**A Specific for Asthma, Hay Fever,  
Nasal Catarrh, and inflamed condi-  
tions of the mucous membrane.**

**ASTHMOL** is a preparation obtained from the interaction of Supraralin and Atropa derivatives with Hyponitrous Gas in a non-oily solution.

This compound differs materially from the many so-called remedies introduced from time to time, inasmuch as it is invariably successful in chronic conditions.

**ASTHMOL** has been prescribed with remarkable success as a Specific for Asthma and Hay Fever, and is also exceedingly useful for those obscure complaints which centre in the nose and throat.

**ASTHMOL** is administered either with the special all-glass Pocket Nebulizer, or the “Rouse” Nebulizer, which, producing an extremely fine cloud of vapour, is directed on to the seat of the disease.
