Volume 33 Number 1 **February 1986**

Directional wave fronts of reaction-diffusion systems
by J. Sabina .. 1

Invariant quadratic forms on finite dimensional Lie algebras
by Karl H. Hofmann and Verena S. Keith .. 21

Generalised Gaussian Fibonacci numbers
by S. Pethe and A. F. Horadam .. 37

On bounds for the Lipschitz constant of the remainder in polynomial approximation
by David Elliott .. 49

Transcendence measures by Mahler's transcendence method
by Paul-Georg Becker-Landeck .. 59

A simple proof of the Erdős-Gallai theorem on graph sequences
by S. A. Choudum .. 67

A commutativity condition for semi prime rings-II
by Murtaza A. Quadri, Mohd. Ashraf and M. A. Khan .. 71

Sub-direct product closed Fitting classes
by R. A. Bryce .. 75

Torsion in the additive group of relatively free Lie rings
by Vesselin Drensky .. 81

Hypergroup structures on the set of natural numbers
by Walter R. Bloom and Saroja Selvanathan .. 89

Metrizability of subgroups of free topological groups
by Sidney A. Morris and H. B. Thompson .. 103

Positioning matrices with respect to the boundary of the maximal group
by J. DeFranza and D. J. Fleming .. 113

A family of Hurwitz groups with non-trivial centres
by Marston Conder .. 123

A new proof of Laguerre's theorem about the zeros of polynomials
by Abdul Aziz .. 131

An asymptotic theorem for abstract differential equations
by Gaston Mandata N'Guérékata .. 139

Automorphisms of homogeneous C*-algebras
by Klaus Thomsen .. 145

ABSTRACTS OF AUSTRALASIAN PhD THESES

Slender body theory near an interface at very low Reynolds' number
by Glenn Robert Hilton .. 155

Error estimates for the approximation of functions by certain interpolation polynomials
by Stuart John Goodenough .. 157

INFORMATION FOR AUTHORS

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Timely expository articles are also welcomed.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after a careful evaluation by the Editor and an Associate Editor or other expert in the field.

As even minor revisions are generally not permitted, authors should read carefully all the details listed below and on the inside back cover.

For a paper to be acceptable for publication, not only should it contain new and interesting results but also

(i) the exposition should be clear and attractive, and
(ii) the manuscript should be in publishable form, without revision.

Nevertheless some meritorious papers will have to be rejected because speed of publication involves space limitations.

Authors should submit THREE clean, high quality copies to

The Editor, Bulletin of the Australian Mathematical Society,
Department of Mathematics, University of Queensland,
St. Lucia, Queensland, 4067, Australia

but should not send the original typescript of their papers, as material submitted to the BULLETIN will usually not be returned. Authors should note that each paper submitted must include an abstract and one or more classification numbers following the 1980 Mathematics Subject Classification.

Abstracts of PhD Theses

The BULLETIN endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 6 months of the degree being approved.
