

An Introduction to Abstract Algebra

Volume 2

F. M. HALL

This book is intended for those reading for a first degree or similar qualification in mathematics, and for students in colleges of education. Though continuing from Volume 1 the account is self-contained. Comment on Volume 1:

'The informal approach adopted makes it ideal for self-study. The author is to be congratulated on his meticulous efforts and the reviewer looks forward with keen anticipation to the appearance of Volume 2.'

A Second Course in Mathematical Analysis

J. C. BURKILL, F.R.S.
and H. BURKILL

This book continues Dr J. C. Burkill's successful work *A First Course in Mathematical Analysis* to more advanced topics studied by mathematicians in the final years of their degree course. It gives a modern exposition of both real and complex analysis and includes numerous examples (with solutions).

... 'a book which, for the English reader, has no superior and few equals.'

CAMBRIDGE UNIVERSITY PRESS

GLASGOW MATHEMATICAL JOURNAL

Edited by

R. A. RANKIN, R. P. GILLESPIE,
T. S. GRAHAM, A. GEDDES

This is a continuation of the *Proceedings of the Glasgow Mathematical Association*, which was founded in 1952.

Although the Journal is intended primarily for the publication of original work in Pure Mathematics, papers on Applied Mathematics are also included.

Published twice yearly in JANUARY and JULY

The 1970 volume is number 11

Annual subscription 50s U.S.A. \$7.00
Single part 25s. U.S.A. \$3.50 plus postage 1s.

Seven volumes of the *Proceedings* were issued between 1952 and 1966. Complete sets of back volumes are still available.

Inquiries and subscription orders should be sent to the publishers

UNIVERSITY MATHEMATICAL TEXTS

Editors ALAN JEFFREY and IAIN ADAMSON

The aim of this series is to provide compact and inexpensive textbooks for undergraduates on standard topics of mathematics. A selection from the series is listed below. You are invited to write to us for a copy of our descriptive leaflet which gives full details of the ground covered in each of the thirty-eight titles now available.

		<i>Paperback</i>	<i>Hardback</i>
1. Determinants and Matrices	A. C. AITKEN	10s 6d	13s 6d
4. Integration of Ordinary Differential Equations	E. L. INCE	12s 0d	—
7. Functions of a Complex Variable	E. G. PHILLIPS	10s 6d	13s 6d
11. Electricity	C. A. COULSON	13s 6d	17s 6d
13. Introduction to the Theory of Finite Groups	W. LEDERMANN	10s 6d	13s 6d
14. Classical Mechanics	D. E. RUTHERFORD	13s 6d	17s 6d
29. Numerical Methods: I	B. NOBLE	10s 6d	13s 6d
30. Numerical Methods: II	B. NOBLE	13s 6d	17s 6d
31. Elementary Abstract Algebra	E. M. PATTERSON and D. E. RUTHERFORD	13s 6d	17s 6d
33. Magnetohydrodynamics	A. JEFFREY	13s 6d	17s 6d
34. An Introduction to Modern Mathematics	A. MONJALLON	13s 6d	17s 6d
35. Quantum Mechanics	R. A. NEWING and J. CUNNINGHAM	17s 6d	27s 6d
36. Probability	J. R. GRAY	17s 6d	27s 6d
37. Series Expansions for Mathematical Physicists	H. MESCHKOWSKI	21s 0d	27s 6d
38. Calculus of Variations	J. C. CLEGG	21s 0d	27s 0d
