

CORRIGENDUM

Alkali treatment as a method of processing whole grain for cattle

By E. R. ØRSKOV AND J. F. D. GREENHALGH

J. agric. Sci., Camb. (1977), **89**, 253–255

The authors regret the following error:

p. 254, column 1, lines 15 and 16 should read 78·9, 67·2 and 75·2% respectively, and not 78·9, 75·2 and 67·2% as printed.

Pesticides and Human Welfare

Edited by D. L. Gunn and J. G. R. Stevens

There is currently much confusion about the merits and demerits of modern pesticides. This book seeks to provide objective information on the uses of pesticides in agriculture and for human and animal health, and to weigh the possible risks, and effects on the environment, against the benefits to mankind. Economic aspects, regulatory controls, and possible alternatives to pesticides are discussed. £5 paper covers £1.75

Farming Systems in the Tropics

H. Ruthenberg

The student of tropical agriculture or the agricultural development worker will find in this book a complete analysis of the important farming systems of the tropics, together with an introduction to the farm-management problems that arise in each particular case, and suggestions as to how these may be solved. Second edition illustrated £10 paper covers £4.95

Food Crops of the Lowland Tropics

Edited by C. L. A. Leakey and J. B. Wills

This book brings together information on current research and development in food crops in the lowland tropics. The emphasis is on the food crops of West Africa, nearly all of which, with the exception of maize, are surveyed in depth. There are also chapters on grain storage, research strategies, mechanization, irrigation, and land tenure. £9
