 7, ALBEMARLE STREET, LONDON, W.1.

BURBERRY

AIRMEN'S SAFEGUARDS

ensure Healthful Warmth and Protection
at all altitudes, yet Ventilate Naturally.

The Burberry Air-Warm

provides a lightweight, yet warm and dependable
defence against rain, mist or cold.

The inside is of luxuriously soft thick Camel Fleece,
The coat is workmanlike in every detail, and has nothing
about it to catch in any part of the machine.

Its two parts can be worn separately or together—the
outside alone providing a Weatherproof that excludes
wet or wind without rubber or other airtight material;
the Fleece lining, a smart British Warm; and the
two together the staunchest self-ventilating safeguard
possible.

*During the War, Officers' Service "Burberrys,"
Tielockens and Burberry Trench- and Air-Warms
Cleaned and Re-proofed FREE OF CHARGE.*

BURBERRYS HAYMARKET,

THE "GUARDIAN ANGEL" PARACHUTES.

For Life Saving uses on the Training Grounds : and for special Naval and Military operations. Open automatically, and dropped from Aeroplanes, always carry their man within $2\frac{1}{2}$ seconds. Open instantaneously, and bring their man safely to the ground from any height above 200 feet. All the Airman has to do is to jump overboard, everything else is done for him automatically. Pilots can in the last resort charge enemy Aeroplanes with every prospect of their own safety. Non-spinning Shock-Absorber Slings, taking all shocks off the Parachutist and Parachute. Aviator's Harness, to carry safely a wounded or insensible man. Instant release on landing. Standardised in every detail, air and waterproof, they can be carried continuously for six months. These Parachutes are under static and kinetic control in all the phases of their action. There is no possibility of the entanglement of their rigging in the fiercest air current. These Parachutes can be dropped with absolute safety from Aeroplanes flying at any speed. These Parachutes reduce free-fall to its minimum, thus preserving the Airman's nerves. Adapted for use with every type of Aircraft, kite and free balloons, airships and aeroplanes. Special adaptations made for special purposes : they are adaptable to every kind of purpose. These Parachutes are sealed to prevent tampering : the seals are broken

only in the act of usage.

RELIABILITY, first—RELIABILITY, second—
RELIABILITY ALL THE TIME.

**The Company's Entire Output is being
Taken by the Air Board.**
