

# We couldn't make Medi-Scrub™ kill germs deader. So we made it kill them faster.

Any medicated health care **handwash** will kill germs. But will it kill them in the time your staff actually devotes to handwashing? Medi-Scrub will. It's gentle enough to use dozens of times a day, and is proven to work in **half the time** recommended by CDC guidelines.

## A 97% kill in 15 seconds.

In a series of tests conducted by independent laboratories, **Medi-Scrub** was used on hands contaminated with *Serratia marcescens*, and killed **99.9%** when used in a full 30 second handwash. More impressive, in a series of 15 second handwashes, **Medi-Scrub** killed 97% of the transient bacteria. While our special blend of aloe vera and lanolin made hands feel softer. Not one test participant showed or reported any sign of irritation. This is real-world testing, to prove that **Medi-Scrub** works the way your staff will actually use it.

## Disposable dispensing system.

Medi-Scrub comes packed in our patented **DisposaCare** cartridge, factory sealed with a built-in measuring pump. The matching wall-mount holder puts Medi-Scrub exactly

where you need it. The unique design lets you see the label and product level at a glance. And when the container is empty, you just throw it away Pump and all.

## Proven educational support.

Medi-Scrub is backed by an educational program which includes video, bilingual filmstrips, posters, buttons and more. All to help you get Medi-Scrub out of the dispenser and onto their hands. And your Huntington representative is always ready with technical and training assistance. For test data and more information on **Medi-Scrub**, call us now toll-free.

"HANDS-OFF"

INJECTOR  
**Tubex**<sup>®</sup>  
(closed injection system) Ayerst

TUBEX<sup>®</sup>, the unique, *safer*, hands-off injector that puts you farther from the needle and cartridge than any other injection system.

There's no touching... shaking... manipulation of cartridge or needle. Just twist and drop.

Nurses preferred TUBEX almost 3:1 for the prevention of accidental needle stick injuries in a study comparing TUBEX Injector and Carpuject<sup>®</sup>\*1 Which is one more reason to

adopt TUBEX- the injection system designed as if your life depended on it.
