

## Law & Society Review Condensed Style Sheet

Type manuscripts **double-spaced** on one side of the paper only. While manuscripts need not conform to this style sheet at the time of submission, all manuscripts must include an abstract, footnotes, and a list of references, and all accepted manuscripts must be revised by the authors to conform to the *Review's* style. **The rules listed below supplement the manuscript information on the inside front cover of the *Review*.** Authors are urged to consult *Review* issues in volume 26 or later for further illustrations. A detailed style sheet is available from the Editorial Office.

1. **Abstracts.** All manuscripts should include an abstract of not more than 100 words. No abstracts are required for review essays or comments.
2. **Footnotes.** Footnotes should be numbered sequentially (except for the author's footnote) and printed on pages immediately following the text (not at the foot of the page). They should contain only substantive comments and additional references not immediately relevant to the text.
3. **Tables and Figures.** Tables should approximate the appearance of printed tables. Figures should be camera ready; provide originals, not xerographic copies. Tables and/or figures should be placed at the end of the text, after footnotes, appendixes, and references. Their location within the text should be indicated as follows:

Table 1 about here

4. **Citations.** All notes that consist merely of supporting citations should be placed in parentheses in the text. For example:

In a thoughtful essay, Hayden (1991) . . .

OR

Media stories often portray the civil jury as generous (Daniels & Martin 1986:236; Hans 1989; Huber 1988).

The same general rules apply to footnote text.

5. **References.** References are placed at the end of the manuscript following the footnotes. The list should contain only those sources actually cited in text or notes. Give authors' names as they appear in the original source. For more than one publication by the same author, list them in chronological order, with the older item first. For more than one publication in one year by the same author, use small (lower-case) letters to distinguish them (e.g., 1970a, 1970b).

## NET LOSS

**INTERNET PROPHETS, PRIVATE PROFITS,  
AND THE COSTS TO COMMUNITY**

**Nathan Newman**

*An analysis of the Internet political economy that challenges the dominant cyberlibertarian antigovernment approach.*

"Nathan Newman has written a fascinating history of the Silicon Valley that chronicles the federal government's leading role in creating, and then privatizing, the Internet. *Net Loss* not only dispels the myth that the Internet emerged full-blown as a result of entrepreneurial risk in a competitive marketplace, but also explains in depth how forces of globalization have undermined regional economies in California while reshaping social and political life in local communities. This groundbreaking book is a must read for anyone concerned with the power of global corporations and the future of democratic governance."

## REAL CHOICES

**FEMINISM, FREEDOM,  
AND THE LIMITS OF LAW**

**Beth Kiyoko Jamieson**

"Certain to be thought-provoking and even controversial, Jamieson's book offers a critique of existing feminist theory and seeks to reconstruct a vision of feminism that is securely wedded to the Western liberal tradition. Troubled by some feminist theories that depict a thin and unidimensional view of liberalism, Jamieson critically examines the works by some of the major thinkers in the Western political tradition and paints a more nuanced view of liberalism—one that is compatible with, and indeed integral to, feminist political principles and policy goals. The grace with which the author interweaves normative political theory with contextualized case analyses of timely policy issues makes the book an important contribution to legal and policy debates."

Robert Cooter argues that constitutional theory should trouble itself less with literary analysis and arguments over founders' intentions and focus much more on the real-world consequences of various constitutional provisions and choices.

"For anyone looking for a textbook that provides a systematic introduction to the economic analysis of constitutional law in an accessible manner while covering a wide range of topics, it would ... be hard to find a more suitable book.... # Welfare and Punishment In the Bush Era

Essays in this issue of *Social Justice* (Vol. 28, No. 1) address the Bush initiative on “faith-based” welfare programs. Long-time critics of U.S. welfare policies point to the dangers of mixing church and state in the funding and support of community-based services and look at the long-term consequences of devolution of welfare policy from the federal to state governments. Authors critique the ideological source of “compassionate conservatism” and examine current initiatives in terms of Republican electoral strategies and the labor market conditions of the New Economy. The “Multicultural Chronology” is a classroom resource that ties together past and present welfare policies.
