

Canadian Association of Emergency Physicians

CAEP is here for you.

CAEP is here to advocate on behalf of you and your patients, connect you with your colleagues, lead EM education, and provide a forum for research to improve patient care.

Join 2500+ of your colleagues to strengthen the voice of EM in Canada.

“CAEP and emergency medicine in Canada have come a long way since the early days when we were fighting for recognition and respect. Through advocacy and determination, we have improved front line emergency care and produced world class research and education. CAEP could never have accomplished this without strong and committed members. We can achieve so much more by advocating together, collaborating and sharing our skills and talents. Thank you for joining the CAEP team.”

Paul Pageau, MD CCFP(EM)
CAEP President

Who can join?

Membership is open to anyone with an interest in emergency medicine - full or part time physicians, residents engaged in postgraduate emergency medicine training, medical students, and allied health professionals such as nurses, paramedics, pharmacists, physician assistants, and research assistants.

Category	Price
Physician Member - Active	\$490
Physician Member - Affiliate or International	\$455
Physician Member - AMUQ Member	\$343
Physician Member - Spouse	\$390
Physician Member - Retired	\$145
Bridge Physician Member - 1st/2nd Year of Practice	\$295
Resident Member	\$130
Resident AMUQ Member	\$120
Student Member	\$75
Associate Member (Nurse, Paramedic, Research Associate, etc.)	\$250

CAEP Academic Consultation Service

In order to address the variability across Canada's academic emergency medicine departments, and tap into the expertise of CAEP academic leaders, the Academic Section is providing an **Academic Consultation Service**.

At your department's request, the consultant will meet with members of your department and university administration, and provide an in-depth analysis and best practices to improve your department's performance across any of the three areas of Academic Section expertise: **leadership/administration, education, and research**.

The most valuable part was “bringing all key stakeholders together to get a real picture of the current reality, challenges and hoped direction.”

The most valuable part was “an outside formal opinion to reiterate the moves, which must be made to upgrade research.”

The most valuable part was “having an academic expert from outside our region give us support and recommendations for our own academic department. This was useful in working with the Dean, as we work on our own proposal.”

Financial support is available from CAEP.
Contact kwyatt@caep.ca to book your consultation.

The emergency department is the front door for the sickest and most acute patients in Canada. To treat patients with the utmost attention and with the latest techniques, EM physicians need access to the very best knowledge and standards of practice. **This is only achieved through research.**

CAEP funds **junior investigators** and **EM seed projects**. We established our research funding program in 1996, and over the past 20 years have assisted over 100 researchers. Since the inception of our grant program, we have provided over \$500,000 in funding to EM researchers. Typically, five grants of up to \$5,000 each are awarded annually. As catalysts for future research, our grants play a vital role in advancing EM research.

Due to the success of our membership fundraising campaign, we expanded the 2016/17 competition to include three grants of up to \$10,000 each, as well as a new partnership to provide matched funds for an additional grant over the next five years.

This is not enough. Funding for EM research in Canada is limited, particularly for junior physician-scientists. **The demand for research funding currently exceeds our capacity**, but with your support we are aiming to double our EM grant program.

**Give Today. Give Generously.
Support Research. Improve Care.**

EDTUX Resuscitation

Gain confidence in using ultrasound to help guide resuscitation room care.

Vancouver, BC | June 3, 2017
Ottawa, ON | December 1, 2017

REGISTER NOW

Space is limited.

One day course with high instructor ratio!  Hands-on instruction.

EDTUX

A series of advanced courses for those who've completed and consolidated their basic skills.

Course Overview

Advanced cardiac skills

Inferior vena cava assessment

Lung evaluation

US guided-central venous catheterization

EDTUX will prepare you to...

- > Generate advanced cardiac and lung views
- > Identify cardiac and lung pathology
- > Identify abnormal inferior vena cava, either flat vs. plethoric
- > Integrate cardiac and lung scanning for patients presenting shortness of breath, chest pain and shock
- > Discuss potential pitfalls and errors in performing and interpreting these scans
- > Accurately track a needle for central venous catheterization
