The *Journal* is the official publication of the British Society for the History of Science. It appears in March, July and November each year, the three issues making a volume. The 1986 subscription rate is £30 (UK), £36 (overseas) and \$52 (USA and Canada), post free: orders and subscriptions should be sent to Blackwell Scientific Publications Ltd, PO Box 88, Oxford, England.

Contributions are welcome and should be sent to the Editor. They are considered on the understanding that they are unpublished and are not on offer to another journal. Two copies should be submitted, typed in double-spacing with a margin on A4 or American Quarto paper. Include an abstract of 150–200 words. Quotations when long should be inset; when short, in single quotation marks. Spelling should follow the *Oxford English dictionary*, and arrangement H. Hart, *Rules for compositors*, Oxford, many edns. Be clear and consistent.

All papers should be rigorously documented, with references to primary and secondary sources typed separately from the text in double spacing, and numbered consecutively. Cite as follows:

14 J. Smith and J. Bloggs, *Early chemistry and the Royal Society*, 2nd edn. (ed. H. Jones, tr. R. Roe), 5 vols. in 6, Edinburgh & London, [1896]–1914; reprinted, New York, 1965, i(ii), chapter VI, especially pp. 123–31. Only name the publisher for good reason. For a symposium: 15 J. Doe (ed.) *Science yesterday*, 2 vols., Oxford 1977, i. 16. Subsequent references may be written: 17 Doe, op. cit. (15), ii, 34. Standard works like *D.N.B.*, *D.S.B.*, may be cited thus; also Plato, *Timaeus*, 27C–32C, *Genesis*, I, 6, identifying translation or edition if necessary. Articles—use bold for volume numbers, Roman numbers for series: e.g. 7 J. J. Thomson, ‘Cathode-rays’, *Phil. Mag.* (1897) V, **44**, pp. 293–316; a comma after unabbreviated titles, e.g. [*Liebig's*] *Annalen*, (1843). For theses, cite University Microfilm order number, or at least Dissertations Abstract number. Line drawings should be drawn boldly in black ink on stout white paper, feint-ruled graph paper or tracing paper. Photographs should be glossy prints of good contrast and well matched for tonal range. The place of an illustration should be indicated in the margin of the text. Each illustration must carry the name of the author and article, its number, and a caption. Xerox copies may be sent when the article is first submitted for consideration.

© British Society for the History of Science. The British Society for the History of Science retains copyright for all articles published: it is the author's responsibility to secure any necessary permission for publication. Single copies of articles may be made for research or private study without further ado. Permission to make multiple copies should be obtained from the Society. Authors will receive twenty-five offprints of articles free. The editor cannot accept responsibility for loss of a typescript, but will take every care of it; typescripts are not normally returned to authors. In all matters concerning the publication of the article, the Editor's decision is final.

The journal is delivered to North America by accelerated surface post (a.s.p.) and subscribers there can expect to receive their copies within two weeks of British publication. Current issues for the Indian Sub-Continent, Australasia and the Far East are sent by air to regional distribution points from where they are forwarded to subscribers by surface mail. Any back numbers are normally despatched by surface to all regions, except North America, where they are sent by a.s.p., and India, where they are sent by air freight.
