

TERRORISM AND HOSTAGES IN INTERNATIONAL LAW

– A COMMENTARY ON THE HOSTAGES CONVENTION 1979

Joseph J. Lambert

This book provides an in-depth commentary on the Hostages Convention and, to a lesser extent, the seven other agreements dealing with offences related to terrorism.

The first part examines the general background to the Hostages Convention, the growth in the phenomenon of international terrorism and the various efforts of the world community to deal with it.

The second and largest part of the book is an entirely new and comprehensive article-by-article commentary on the Hostages Convention itself. Drawing principally upon the preparatory work of this Convention and the other anti-terrorism conventions, the author analyzes in detail each provision of the Convention as well as its efficacy as a whole in the fight against terrorism.

Among the legal issues examined in relation to international terrorism are extradition, asylum, mutual assistance in criminal matters, State responsibility, international efforts to prevent terrorism, the establishment of extra-territorial jurisdiction, the principle of *non-refoulement*, the relationship between terrorism and the laws of armed conflict, and the use of force in response to terrorism.

LOCAL REMEDIES IN INTERNATIONAL LAW

C. F. Amerasinghe

Executive Secretary of the World Bank Administrative Tribunal

This book examines the local remedies rule in modern international law generally and also in the area of human rights protection. The law is presented in the light of State practice and the jurisprudence of international courts and tribunals.

The author not only discusses the jurisprudential basis of the rule and its established aspects but ventures into some important areas, such as the incidence of the rule, limitations, the burden of proof, and the application of the rule to procedural remedies, in which the law is not so clear. While there is a strict adherence to the requirements of juristic exposition and analysis where the law has been more or less determined, the author does not hesitate to offer criticisms and to make suggestions for improvement of the law in the light of modern policy considerations. The book takes into account the recent work on the subject by the International Law Commission which has not hitherto been examined.

There is also an appendix on the relevance of the rule to the law relating to international organizations.

Rules, Norms and Decisions

On the Conditions of Practical and Legal Reasoning in International Relations and Domestic Affairs

FRIEDRICH V. KRATOCHWIL

Professor Kratochwil argues that norms affect decision making not by causing actions but by providing reasons for decisions and that, under a set of norms, reasoning can vary in style. He applies his theories to the practice of international law examining the norms provided both by specific treaties and by informal customs and understandings.
