Rural Rides of the British Churchgoer

Joseph Leech

In 1843 the first *Churchgoer* articles appeared on the back page of the *Bristol Times* and within a few weeks became a major talking point in Bristol. The first series dealt with the churches of Bristol city but, in 1844, the anonymous *Churchgoer* began the *Rural Rides* on his trusty cob "John Bunyan," ready to report on the shortcomings of any parish, church, congregation and sermon in the Bristol area. These comments and descriptions of the rural parishes are now of interest to social historians and to the general reader interested in Bristol and its environs 140 years ago. This book is beautifully produced and copiously illustrated, including a fold-out map of the region.

Churchill: Retreat from Empire

by **Raymond Callahan**

Churchill's fondest goal, "to see the British Empire preserved for a few more generations in its strength and splendor," was defeated through his own heroic determination to "defend our island, whatever the cost may be." In this new book, Callahan examines the significance and ironies of Churchill's political leadership during and after the Second World War, synthesizing with trenchant brevity the many important primary and secondary sources now available on this complex man.

"There is so much written by and about Churchill that it is immensely useful to have this concise account and analysis of his long career. It is hard to imagine a better brief presentation of one of the greatest figures of this century." — Peter Stansky, Stanford University

"This most welcome book provides a sympathetic yet clear-eyed portrait of Churchill as war leader and an enlightening tour through the thickets of wartime controversy. Of particular note is Callahan's placing of Churchill's writings within the context of WW II historiography. Nowhere is the power of Churchill's work more persuasively documented." — Theodore A. Wilson, University of Kansas

That Noble Science of Politics

A Study in Nineteenth-Century Intellectual History

STEFAN COLLINI, DONALD WINCH,
and JOHN BURROW

Three eminent historians reassess the way in which Victorians conceived of the "science of politics" by reinterpreting the thought of a wide range of influential Victorians including Ricardo, Marshall, Macaulay, James and John Stuart Mill, Bagehot, Maine, Sidgwick, and Wallas.

"The authors begin by telling us how intellectual history should be done, which is salutary; but their real *tour de force* comes in showing us how it should be done."—*London Review of Books* Cloth \$49.50 Paper \$14.95

John Ruskin's Labour

A Study of Ruskin's Social Theory

P.D. ANTHONY

VICTORIAN EDUCATION AND THE IDEAL OF WOMANHOOD

Joan Burstyn

Burstyn explains why the movement in Britain for higher education for women challenged the Victorian belief in separate spheres for men and women and threatened to destroy the ideal of womanhood. Higher education for women was accepted by the end of the nineteenth century because many families found the ideal unattainable, especially those with daughters who wanted work comparable to their social status. *Describes women's struggle to enter the forbidden gate of higher education at a time when they were idealized as domestic priestesses of home, husband, and children.* Harvard Educational Review

The Governance of Anglo-Saxon England, 500-1087

H. R. Loyn. This is the first book in THE GOVERNANCE OF ENGLAND SERIES—a three-volume synthesis of recent research on English medieval government from the Anglo-Saxon period to the triumph of the House of York in 1461. Providing the considered perspectives of three leading historians of the period, the series is under the general editorship of A. L. Brown. Part I of Professor Loyn's book shows how the idea of belonging to a territorial community that was part of England came to replace the more primitive notions of tribal society. Part II deals with the true "making of England" in the 10th and 11th centuries. Part III sums up the immediate consequences of the Norman Conquest on the principal governmental structures of England. Clarendon and the English Revolution

R. W. Harris. Set against the background of some of the most dramatic and important years in English history, this is the first full biography in nearly 150 years of Edward Hyde, Earl of Clarendon (1609-1674), the greatest Royalist and statesman of the 17th century and the first of the great English historians. As a trusted minister, Clarendon did all he could to save Charles I from execution, and to him the Stuarts largely owed their restoration. As a writer and historian, Clarendon occupies a high place in English literature, and his *History of the Rebellion* remains an enduring classic. This new account of Clarendon's life and thought does full justice to a man of warmth and character who, in the words of Hugh Trevor-Roper, "turned the course of history and made his philosophy come true."
