

VOLUME 33, 2001

ANNALS OF GLACIOLOGY

CONTENTS Vol. 33, 2001

STRUCTURAL AND COMPOSITIONAL VARIABILITY OF SEA ICE

- 1 **T. Kawamura, K. Shirasawa, N. Ishikawa, A. Lindfors, K. Rasmus, M. Granskog, J. Ehn, M. Leppäranta, T. Martma and R. Vaikmäe**
Time-series observations of the structure and properties of brackish ice in the Gulf of Finland

- 5 **Stephen J. Jones and Brian T. Hill**
Structure of sea ice in McMurdo Sound, Antarctica

- 13 **J.-L. Tison and V. Verbeke**
Chlorinity/salinity distribution patterns in experimental granular sea ice

- 21 **Inga J. Smith, Patricia J. Langhorne, Timothy G. Haskell, H. Joe Trodahl, Russell Frew and M. Ross Vennell**
Platelet ice and the land-fast sea ice of McMurdo Sound, Antarctica

BRINE PERCOLATION, FLOODING AND SNOW-SEA-ICE INTERACTIONS AND PROCESSES

- 28 **K. M. Golden**
Brine percolation and the transport properties of sea ice

- 37 **Ted Maksym and Martin O. Jeffries**
Phase and compositional evolution of the flooded layer during snow-ice formation on Antarctic sea ice

- 45 **V. I. Lytle and S. F. Ackley**
Snow-ice growth: a fresh-water flux inhibiting deep convection in the Weddell Sea, Antarctica

- 51 **Martin O. Jeffries, H. Roy Krouse, Barbara Hurst-Cushing and Ted Maksym**
Snow-ice accretion and snow-cover depletion on Antarctic first-year sea-ice floes

- 61 **Kim Morris and Martin O. Jeffries**
Seasonal contrasts in snow-cover characteristics on Ross Sea ice floes

REMOTE SENSING OF SEA-ICE AND SNOW-COVER CHARACTERISTICS

- 69 **Christian Haas**
The seasonal cycle of ERS scatterometer signatures over perennial Antarctic sea ice and associated surface ice properties and processes

- 74 **Mark R. Anderson and Sheldon D. Drobot**
Spatial and temporal variability in snowmelt onset over Arctic sea ice

- 79 **Sheldon D. Drobot and Mark R. Anderson**
Comparison of interannual snowmelt-onset dates with atmospheric conditions

- 85 **Richard R. Forster, David G. Long, Kenneth C. Jezek, Sheldon D. Drobot and Mark R. Anderson**
The onset of Arctic sea-ice snowmelt as detected with passive- and active-microwave remote sensing

- 94 **M. J. Paget, A. P. Worby and K. J. Michael**
Determining the floe-size distribution of East Antarctic sea ice from digital aerial photographs

- 102 **Walter N. Meier, Michael L. Van Woert and Cheryl Bertoia**
Evaluation of operational SSM/I ice-concentration algorithms

- 109 **Stefan Kern and Georg Heygster**
Sea-ice concentration retrieval in the Antarctic based on the SSM/I 85.5 GHz polarization

- 115 **Takeshi Matsuoka, Seiho Uratsuka, Makoto Satake, Tatsuharu Kobayashi, Akitsugu Nadai, Toshihiko Umehara, Hideo Maeno, Hiroyuki Wakabayashi, Kazuki Nakamura and Fumihiko Nishio**
CRL/NASDA airborne SAR (Pi-SAR) observations of sea ice in the Sea of Okhotsk

- 120 **Hiroyuki Wakabayashi, Takeshi Matsuoka, Kazuki Nakamura and Fumihiko Nishio**
Estimation of sea-ice physical parameters using polarimetric SAR: results from Okhotsk and Lake Saroma campaign

SEA-ICE MOTION AND DEFORMATION

- 125 **Mark R. Drinkwater, Xiang Liu and Sabine Harms**
Combined satellite- and ULS-derived sea-ice flux in the Weddell Sea, Antarctica
- 133 **Yunhe Zhao and Antony K. Liu**
Principal-component analysis of sea-ice motion from satellite data
- 139 **P. Heil, C.W. Fowler, J. A. Maslanik, W. J. Emery and I. Allison**
A comparison of East Antarctic sea-ice motion derived using drifting buoys and remote sensing
- 145 **Walter N. Meier and James A. Maslanik**
Synoptic-scale ice-motion case-studies using assimilated motion fields
- 151 **Matti Leppäranta, Zhanhai Zhang, Jari Haapala and Tapani Stipa**
Sea-ice kinematics measured with GPS drifters
- 157 **W. D. Hibler, III**
Modeling the formation and evolution of oriented fractures in sea ice

ICE THICKNESS AND MORPHOLOGY

- 165 **P. Wadhams and N. R. Davis**
Arctic sea-ice morphological characteristics in summer 1996
- 171 **Donald K. Perovich, Jacqueline A. Richter-Menge and Walter B. Tucker, III**
Seasonal changes in Arctic sea-ice morphology
- 177 **A. P. Worby, G. M. Bush and I. Allison**
Seasonal development of sea-ice thickness distribution in East Antarctica: measurements from upward-looking sonar data
- 181 **Nadja Steiner**
Introduction of variable drag coefficients into sea-ice models
- 187 **Tina Tin and Martin O. Jeffries**
Sea-ice thickness and roughness in the Ross Sea, Antarctica

SURFACE HEAT BUDGET OF THE ARCTIC OCEAN (SHEBA)

- 194 **H. Eicken, W. B. Tucker, III and D. K. Perovich**
Indirect measurements of the mass balance of summer Arctic sea ice with an electromagnetic induction technique
- 201 **Jackie A. Richter-Menge, Donald K. Perovich and W. Scott Pegau**
Summer ice dynamics during SHEBA and its effect on the ocean heat content
- 207 **Donald K. Perovich and Bruce C. Elder**
Temporal evolution of Arctic sea-ice temperature
- 213 **Matthew Sturm, Jon Holmgren and Donald K. Perovich**
Spatial variations in the winter heat flux at SHEBA: estimates from snow–ice interface temperatures
- 221 **W. Scott Pegau and Clayton A. Paulson**
The albedo of Arctic leads in summer

SEA-ICE HEAT AND MASS BALANCE

- 225 **R. W. Lindsay**
Arctic sea-ice albedo derived from RGPS-based ice-thickness estimates

- 230 **Takenobu Toyota and Masaaki Wakatsuchi**
Characteristics of the surface heat budget during the ice-growth season in the southern Sea of Okhotsk
- 237 **Jouko Launiainen, Cheng Bin, Juha Uotila and Timo Vihma**
Turbulent surface fluxes and air–ice coupling in Baltic–Air–Sea–Ice Study (BASIS)
- 243 **Bin Cheng, Jouko Launiainen, Timo Vihma and Juha Uotila**
Modelling sea-ice thermodynamics in BALTTEX-BASIS
- 248 **Xuanji Wang and Jeffrey R. Key**
Spatial variability of the sea-ice radiation budget and its effect on aggregate-area fluxes
- 253 **Jinro Ukita and Douglas G. Martinson**
An efficient adjustable-layering thermodynamic sea-ice model formulation for high-frequency forcing
- 261 **M. J. McGuinness, K. A. Landman, H. J. Trodahl and A. E. Pantoja**
Solar radiative heating in first-year sea ice
- 267 **Xiaobing Zhou, Shusun Li and Kim Morris**
Measurement of all-wave and spectral albedos of snow-covered summer sea ice in the Ross Sea, Antarctica
- 275 **Gerd Wendler and Anthony P. Worby**
The surface energy budget in the Antarctic summer sea-ice pack

SEA-ICE ECOLOGY AND BIO/GEOCHEMISTRY

- 280 **Christian H. Fritsen, Susan L. Coale, Diann R. Neenan, Angela H. Gibson and David L. Garrison**
Biomass, production and microhabitat characteristics near the freeboard of ice floes in the Ross Sea, Antarctica, during the austral summer
- 287 **Sven Günther and Gerhard S. Dieckmann**
Vertical zonation and community transition of sea-ice diatoms in fast ice and platelet layer, Weddell Sea, Antarctica
- 297 **David N. Thomas, Gerhard Kattner, Ralph Engbrodt, Virginia Giannelli, Hilary Kennedy, Christian Haas and Gerhard S. Dieckmann**
Dissolved organic matter in Antarctic sea ice
- 304 **Karen Junge, Christopher Krembs, Jody Deming, Aaron Stierle and Hajo Eicken**
A microscopic approach to investigate bacteria under in situ conditions in sea-ice samples
- 311 **M. A. Granskog and J. Virkanen**
Observations on sea-ice and surface-water geochemistry — implications for importance of sea ice in geochemical cycles in the northern Baltic Sea
- 317 **Virginia Giannelli, David N. Thomas, Christian Haas, Gerhard Kattner, Hilary Kennedy and Gerhard S. Dieckmann**
Behaviour of dissolved organic matter and inorganic nutrients during experimental sea-ice formation

SEA-ICE–OCEAN-WAVE INTERACTION

- 322 **Hyuck Chung and Colin Fox**
Calculation of wave propagation into land-fast ice
- 327 **Vernon A. Squire and Tony W. Dixon**
How a region of cracked sea ice affects ice-coupled wave propagation

- 333 **P. J. Langhorne, V. A. Squire, C. Fox and T. G. Haskell**
Lifetime estimation for a land-fast ice sheet subjected to ocean swell
- 339 **Colin Fox, Tim G. Haskell and Hyuck Chung**
Dynamic, in situ measurement of sea-ice characteristic length
- 345 **Josh Downer and Timothy G. Haskell**
Ice-floe kinematics in the Ross Sea marginal ice zone using GPS and accelerometers
- 350 **Colin Fox and Tim G. Haskell**
Ocean wave speed in the Antarctic marginal ice zone
- 355 **Mark A. Hopkins and Hayley H. Shen**
Simulation of pancake-ice dynamics in a wave field
- 361 **Hayley H. Shen, Stephen F. Ackley and Mark A. Hopkins**
A conceptual model for pancake-ice formation in a wave field
- POLYNYAS, SEA-ICE AND OCEAN-SALT BUDGETS**
- 368 **V. I. Lytle, A. P. Worby, R. A. Massom, M. Paget, I. Allison, X. Wu and A. Roberts**
Ice formation in the Mertz Glacier polynya, East Antarctica, during winter
- 373 **I. Dmitrenko, J. A. Hölemann, K. Tyshko, V. Churun, S. Kirillov and H. Kassens**
The Laptev Sea flaw polynya, Russian Arctic: effects on the mesoscale hydrography
- 377 **Andrew Roberts, Ian Allison and Victoria I. Lytle**
Sensible- and latent-heat-flux estimates over the Mertz Glacier polynya, East Antarctica, from in-flight measurements
- 385 **Leif Toudal and Max D. Coon**
Interannual variability of the sea-ice-induced salt flux in the Greenland Sea
- 391 **R. A. Massom, K. L. Hill, V. I. Lytle, A. P. Worby, M. J. Paget and I. Allison**
Effects of regional fast-ice and iceberg distributions on the behaviour of the Mertz Glacier polynya, East Antarctica
- 399 **N. L. Bindoff, G. D. Williams and I. Allison**
Sea-ice growth and water-mass modification in the Mertz Glacier polynya, East Antarctica, during winter
- 407 **Michael L. Van Woert, Walter N. Meier, Cheng-Zhi Zou, Andy Archer, Andrea Pellegrini, Paolo Grigioni and Cheryl Bertoia**
Satellite observations of upper-ocean currents in Terra Nova Bay, Antarctica
- 413 **K. J. Wilson, D. J. King and D. G. Barber**
A case-study in tracking 1998 polynya ice dynamics in Smith Sound, North Water polynya region, Canadian Arctic, using RADARSAT-1 data
- 419 **R. Timmermann, A. Beckmann and H. H. Hellmer**
The role of sea ice in the fresh-water budget of the Weddell Sea, Antarctica
- 425 **S. F. Ackley, C. A. Geiger, J. C. King, E. C. Hunke and J. Comiso**
The Ronne polynya of 1997/98: observations of air–ice–ocean interaction
- 430 **Jörg Haarpaintner, Peter M. Haugan and Jean-Claude Gascard**
Interannual variability of the Storfjorden (Svalbard) ice cover and ice production observed by ERS-2 SAR
- 437 **Jörg Haarpaintner, Jane O’Dwyer, Jean-Claude Gascard, Peter M. Haugan, Ursula Schauer and Svein Østerhus**
Seasonal transformation of water masses, circulation and brine formation observed in Storfjorden, Svalbard
- SEA-ICE AND CLIMATE VARIABILITY: OBSERVATIONS**
- 444 **John E. Walsh and William L. Chapman**
20th-century sea-ice variations from observational data
- 449 **Kazutaka Tateyama and Hiroyuki Enomoto**
Observation of sea-ice thickness fluctuation in the seasonal ice-covered area during 1992–99 winters
- 457 **Josefino C. Comiso**
Satellite-observed variability and trend in sea-ice extent, surface temperature, albedo and clouds in the Arctic
- 474 **Niels Reeh, Henrik Højmark Thomsen, Anthony K. Higgins and Anker Weidick**
Sea ice and the stability of north and northeast Greenland floating glaciers
- 481 **Jia Wang and Moto Ikeda**
Arctic sea-ice oscillation: regional and seasonal perspectives
- 493 **Raymond C. Smith and Sharon E. Stammerjohn**
Variations of surface air temperature and sea-ice extent in the western Antarctic Peninsula region
- 501 **Hezi Gildor and Eli Tziperman**
Sea ice, as the glacial cycles’ climate switch, and inter-hemispheric thermohaline teleconnections
- 507 **Sharon Jeffers, Tom A. Agnew, Bea Taylor Alt, Roger De Abreu and Steve McCourt**
Investigating the anomalous sea-ice conditions in the Canadian High Arctic (Queen Elizabeth Islands) during summer 1998
- SEA-ICE AND CLIMATE VARIABILITY: MODELLING**
- 513 **Larissa Nazarenko, James Hansen, Nikolai Tausnev and Reto Ruedy**
Response of the Northern Hemisphere sea ice to greenhouse forcing in a global climate model
- 521 **John W. Weatherly and Julie M. Arblaster**
Sea ice and climate in 20th- and 21st-century simulations with a global atmosphere–ocean–ice model
- 525 **H. Goosse, F. M. Selten, R. J. Haarsma and J. D. Opsteegh**
Decadal variability in high northern latitudes as simulated by an intermediate-complexity climate model
- 533 **K. Gørgen, J. Bareiss, A. Helbig, A. Rinke and K. Dethloff**
An observational and modelling analysis of Laptev Sea (Arctic Ocean) ice variations during summer
- 539 **Yuxia Zhang and Albert J. Semtner**
The Antarctic Circumpolar Wave in a global, high-resolution, coupled ice–ocean model
- 545 **W. Maslowski, D. C. Marble, W. Walczowski and A. J. Semtner**
On large-scale shifts in the Arctic Ocean and sea-ice conditions during 1979–98
- 551 **Andrey Proshutinsky, Mark Johnson and Tatiana Proshutinsky**
Understanding climatic controls on sea-ice transport pathways in the Arctic Ocean

555	Jari Haapala, Arja Juottonen, Marika Marnela, Matti Leppäranta and Heikki Tuomenvirta Modelling the variability of the sea-ice conditions in the Baltic Sea under different climate conditions	577	Xingren Wu, W. F. Budd, A. P. Worby and Ian Allison Sensitivity of the Antarctic sea-ice distribution to oceanic heat flux in a coupled atmosphere–sea-ice model
560	Larissa Nazarenko and Nickolai Tausnev Modeling of the Beaufort ice–ocean climatology change	585	John Turner, William Connolley, Doug Cresswell and Steven Harangozo The simulation of Antarctic sea ice in the Hadley Centre Climate Model (HadCM3)
567	Ye. Aksenov and A. C. Coward The Arctic Ocean Circulation as simulated in a very high-resolution global ocean model (OCCAM)	593	Programme of sessions
